C8 Non-Guided Halibut Rental Boat Registration
This proposed action would apply exclusively to unguided halibut rental vessels and the anglers that harvest halibut on these vessels. The measures under consideration include a registration requirement for all unguided rental vessels used for harvesting halibut; and aligning the bag and size limits for halibut harvested by anglers on unguided rental vessel with those of anglers on charter vessels. The measures under consideration would apply in the Gulf of Alaska in IPHC Regulatory Areas 2C and 3A or only Area 2C, dependent upon the Council's preferred alternative and chosen options.
