Agenda B-2: NMFS Management Report

Status of Actions

Updated daily at: <https://alaskafisheries.noaa.gov/sites/default/files/reports/amendments.pdf>

Highlights on progress since the last Council meeting include:

Final Rules

Bering Sea and Aleutian Islands 2018 and 2019 Harvest Specifications for Groundfish.
Effective: February 27, 2018

Gulf of Alaska 2018 and 2019 Harvest Specifications for Groundfish
Effective: March 1, 2018

2018 Halibut Annual Management Measures
Effective: March 9, 2018

2018 Interim Final Rule for Area 2C through 4 catch limits and charter management measures in Areas 2C and 3A
Effective: March 20, 2018

Notices of Availability and Proposed Rules

Notice of Availability: Amendments 115 (BSAI), 105 (GOA), 49 (KTC), 13 (Salmon), 2 (Arctic) -- EFH Omnibus
End of Comment Period: May 4, 2018

Notice of Availability: Amendment 117 (BSAI) 106 (GOA) -- Reclassifying squid to ecosystem component
End of Comment Period: May 29, 2018

Proposed Rule: Authorizing Area 4 IFQ transfer (leasing) to CDQ groups.
End of Comment Period: March 26, 2018

- See Attachment 1 for additional detail.

eCFR

Sustainable Fisheries has been maintaining a version of its regulations (Title 50 of the Code of Federal Regulations, parts 679 and 680) on its website for over two decades. We have maintained this version as a courtesy to the public. The Government Publishing Office (GPO) has been maintaining an electronic version of all regulations online, updated daily, known as the eCFR. The eCFR provides a more accurate record of our regulations. **Effective March 31, 2018 we will no longer be supporting a separate version on our website.** Our decision was guided by the additional workload associated with maintaining a duplicative version of the regulations, and the potential for inconsistency.

Our website will provide the link to the eCFR, in place of our current version of the regulations.

Staff Changes

In March, 2018 **Gretchen Harrington** became the Assistant Regional Administrator for the Habitat Conservation Division. Gretchen will bring superb organizational skills and extensive background to the position, but it will be a big change for those of us in Sustainable Fisheries and at the Council. Gretchen was the Alaska Region NEPA Coordinator since 2012, Fishery Management Plan Coordinator from 2003 to 2011, and a Fishery Regulation Specialist for Sustainable Fisheries from 1998 to 2003.

As many of you know, Gretchen has been instrumental in the successful completion of many of our most complicated and controversial actions over the past two decades. Little things like the Salmon FMP, Bering Sea Chinook salmon bycatch limits, something to do with crab, maybe some analytic support from time to time ☺. We will miss her tremendously valuable analytical skills and her extensive knowledge.

For the past year, Gretchen had been on detail to the Habitat Conservation Division as well as doing some “double duty” for Sustainable Fisheries. We anticipate that Gretchen will continue working with us for a while on the Salmon FMP, and various NEPA duties, before fully transitioning to the Habitat Conservation Division. We plan to advertise for a new NEPA Coordinator later this year.

Congratulations Gretchen !

Inseason Management Report

Catch during 2018 is through March 24, 2018 and is compared to catch during 2017 through March 25, 2017. All catch amounts are in metric tons. Additional information from daily catch reports and information bulletins are available at: <https://alaskafisheries.noaa.gov/fisheries-catch-landings>

Bering Sea and Aleutian Islands

Bering Sea Pollock

The 2018 Bering Sea pollock TAC is 1,364,341 mt compared to 1,345,000 mt in 2017. NMFS reallocated 1,900 mt of CDQ and 12,200 mt of Aleut Corporation pollock TAC from the Aleutian Islands to the CDQ and non-CDQ Bering Sea TACs. In 2017, fishing in the A season continued through the last week of April.

¹Rate is number of salmon per metric tons of groundfish.

Aleutian Islands Pollock

NMFS approved five catcher vessels and one shoreside processor to participate in the Aleut Corporations allocation of pollock in the Aleutian Islands. Some directed fishing of the current 2,500 mt allocation has occurred.

Aleutian Islands (AI) Pacific cod

In 2018, current fishing effort in the Aleutian Islands is low, and no AI or Western AI closures are projected at this time. Fourteen processors (catcher/processors and shoreplants) have reported 5,290 mt of Pacific cod in all targets, with three processors reporting in the Pacific cod target. In 2017, directed fishing in the AI remained open all year for sectors open for directed fishing. For the Western AI limit, directed fishing closed July 29, 2017.

Aleutian Islands Pacific cod set-aside

Catch for the AI shoreplant set-aside reached 1,000 mt by February 28, 2018. The set-aside was in place until March 15, 2018.

¹ NMFS reallocated 1,400 mt in 2018 and 1,700 mt in 2017 of the A season jig allocation to the hook-and-line or pot gear less than 60 ft length annual allocation.

² For the trawl CV sector in 2018, directed fishing for the Bering Sea Pacific cod A season limitation closed on February 11, and directed fishing for the total BSAI A season on March 4, 2018.

Pacific cod target - trawl catcher vessels

In 2018, 61 trawl CVs targeting Pacific cod reported 27,745 mt relative to 57 trawl CVs targeting Pacific cod reporting 34,853 mt in 2017. The 4,425 mt B season allocation becomes available April 1 for 48 hours. NMFS closed directed fishing on April 3, 2018.

BSAI Flatfish (includes CDQ)

The 2018 flatfish total catch is lower relative to 2017. The largest decrease in catch is for rock sole of 4,887 mt.

Gulf of Alaska**Pot gear for IFQ sablefish fishery in the GOA**

Currently for 2018, 19 vessels have registered for 9,130 pot tags. No catch by pot gear has been reported for 2018. In 2017 for the entire year, 25 vessels registered for 11,538 pot tags. In 2017, 18 vessels reported 898 mt or 10% of IFQ sablefish total catch and 16 mt of retained halibut in the IFQ fishery using pot gear.

Pacific cod - Western GOA

All sectors reached their A season allocations, except the jig sector remain open. Also, the A season directed fisheries did not open the hook-and-line catcher vessel and trawl catcher/processor sectors.

In 2017, NMFS reallocated of 1,500 mt from trawl CVs to pot CV/CP.

Pollock

Most of the A and B season allocations have been reached. However, the area 620 B season directed fishery did not open because the allocation did not support the projected effort.

2018 Seasons	610	620	630	640

¹Includes incentive buffers for 2017 and 2018 Western/Central trawl CV limit (360 Chinook), and Western/Central trawl CP limit (480 Chinook).

Non-Chinook Salmon	2018 PSC (Rate ²)	2017 PSC (Rate ²)
GOA Total	52 (0%)	84 (0.14%)

²Rate is number of salmon per metric tons of groundfish.

Halibut Mortality Data

In 2018 relative to 2017, the total halibut mortality in the BSAI is 56 mt higher and in the GOA is 167 mt lower.
