B. Boardings With Violations 01 APR 2007– 31 MAY 2007	10–11

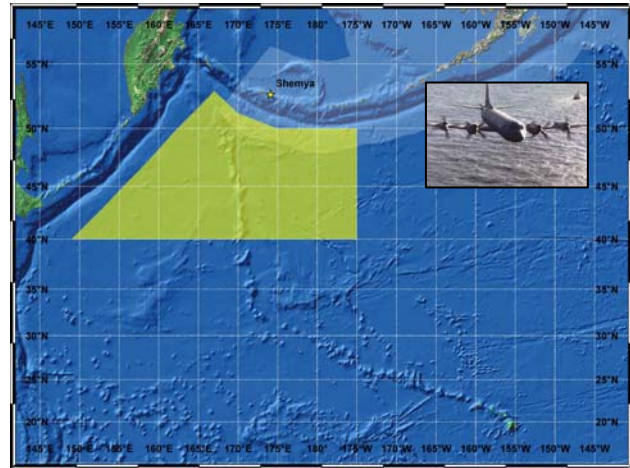

List of Abbreviations

CFVS – Commercial Fishing Vessel Safety	HSDN – High Seas Drift Net
FSB - Russian Federal Security Service	MBL – US/Russian Maritime Boundary
FF/V – Foreign Fishing Vessel	NPSC – North Pacific SAR Coordinator
GOA – Gulf of Alaska	SAR – Search and Rescue
HC-130 – USCG Fixed-Wing Aircraft	WLB – 180ft or 225ft Buoy Tender
WHEC/WMEC – High/Medium Endurance Cutters	WPB – 110ft Patrol Boat
HH65/60 – CG helicopter	

I. High Seas Drift Net Enforcement

The U.S. Coast Guard will begin north Pacific HSDN patrol flights in June along with the Canadian Air Force and the Department of Fisheries and Oceans. The joint efforts are designed to deter illegal, unregulated and unreported (IUU) fishing in the North Pacific Ocean and will continue through the summer.

The primary monitoring platforms will be long-range search aircraft including Air Station Kodiak HC-130s and Canadian Air Force CP-140 Auroras. These fixed winged aircraft carry U.S. and Canadian enforcement officials who identify and report suspected illegal, unregulated, and unreported (IUU) fishing vessels for subsequent interdiction by the U.S. Coast Guard's Pacific Area cutters. Russia's Federal Border Service, China's Fisheries Law Enforcement Command, and Japan's Coast Guard/Fisheries Agency also assist in the interdiction efforts.

Seventeenth District personnel attended a meeting in May with Chinese Fisheries Law Enforcement Command personnel in Alameda. Chinese officials also met with CG personnel in Washington, DC and Honolulu.

II. US/Russian Maritime Boundary Line (MBL) Enforcement

The Russian Pollock season in the area adjacent to the MBL opened in mid-May with very little activity so far. Cutter coverage will resume in June. Coast Guard enforcement resources detected no incursions.

III. Donut Hole

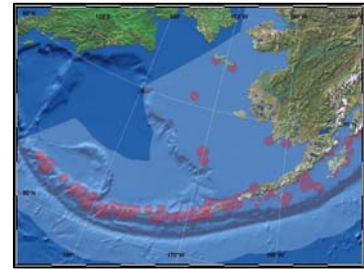

No fishing vessel activity was detected in the Donut Hole during the reporting period. South Korea and Japan indicated an interest in trial fishing this summer at the last Central Bering Sea Pollock Convention Meeting. However, the Seventeenth District has received no notices for proposed trial fishing to date for 2007.

IV. Dixon Entrance

The Seventeenth Coast Guard District participated in a U.S.-Canada border enforcement meeting last month. This meeting is held annually as part of the 1990 US-CA fisheries enforcement agreement to address enforcement issues along the disputed boundary area in Dixon Entrance. Discussions at this working level meeting included: review of 2006 season, projected fisheries openings and closures, expected patrol effort, customs issues, counter drug enforcement issues, and maritime transportation security. Salmon fishing in this area by Canadian fishermen is expected to be limited again this year with some minor effort expected from mid-July through early August.

V. Steller Sea Lions and Critical Habitat Enforcement

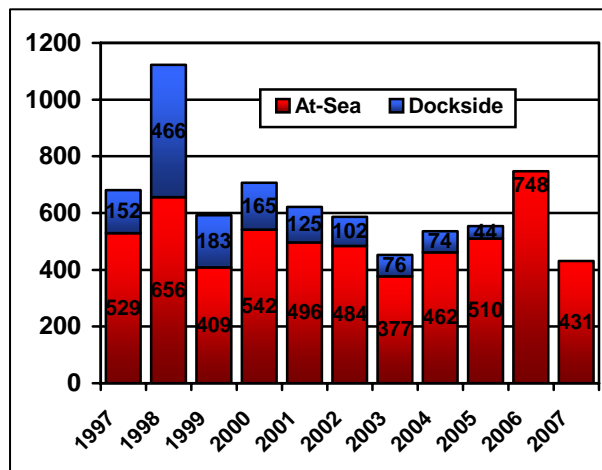

The Coast Guard continues to assist NMFS in management activities to insure that current groundfish fisheries are not adversely affecting Steller Sea Lions or impeding their recovery. Cutters logged 783 monitoring hours, and aircraft patrolled 14 hours in support of this mission. There were no violations detected.

VI. CGD17 Commercial Fishing Vessel Boarding Statistics

The following charts show boarding and fishery violation trends. Violations during the reporting-period remained relatively low with most being minor.

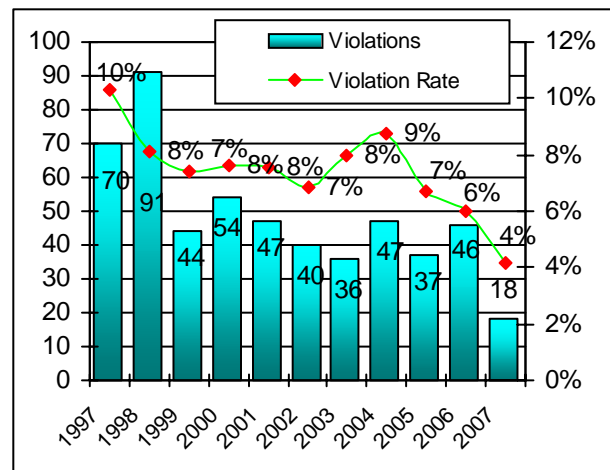

Figure 1. Fisheries Boardings

APR 2006 – MAY 2006

All F/V Boardings (At-Sea):.....101
 Boarding w/Fisheries Violations:3
 Violation Rate:3.0%

Figure 2. Fisheries Violations

APR 2007 – MAY 2007

All F/V Boardings (At-Sea): 208
 Boardings w/Fisheries Violations: 10
 Violation Rate:4.8%

During the reporting period, there were ten fisheries violations. All of the fisheries violations were minor and administrative in nature.

There were three terminations due to a variety of violations including expired or missing liferafts. Several vessels were also issued violation notices and warnings for minor safety discrepancies. Appendices A and B contain a complete list of boardings and violations for the reporting period.

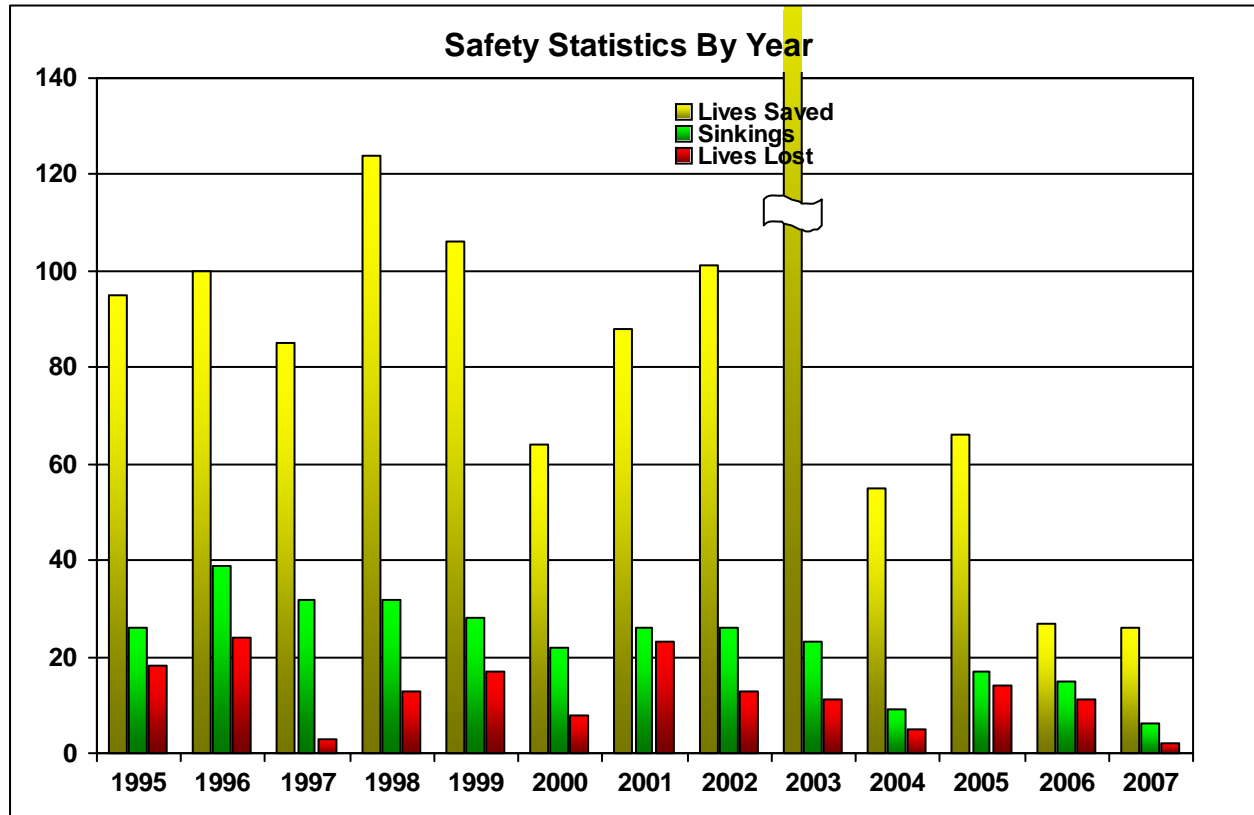

VII. IFQ At-Sea/Dockside Enforcement

The 2007 IFQ season continued without significant incidents. There were three minor fisheries violations for administrative discrepancies. Coast Guard resources conducted 45 IFQ at-sea boardings.

VIII. CGD17 Commercial Fishing Vessel Safety/Search and Rescue Cases

There were nine search and rescue cases during the reporting period. Summaries of the more significant search and rescue cases are included in the table below and on the following page.

Figure 3. Historical Overview of CFVS Statistics

*There was 1 life lost, 1 vessel lost, 7 lives saved from 01 April to 31 May.

Table 1. CGD17 CFVS/Search and Rescue Case Summaries

Date	Vessel Name	POB	Death	VSL Loss	Circumstances/Specific Cause
5/18/07	Swee'pea	N/A	1	N	The master radioed Sector Anchorage requesting a MEDEVAC for a 66-year-old, male crewmember who had passed-out and was experiencing a weak pulse and shallow breathing. The vessel was operating near Montague Strait. The master of the vessel subsequently reported that the crewmember did not have a pulse and CPR was being administered. The North Pacific SAR Coordinator directed the launch of an Air Station Kodiak HH-60 helo deployed in Cordova. The helo arrived on-scene, hoisted the patient, and transported him to Cordova Hospital where he was pronounced deceased after arrival.
5/16/07	ANNETTE	N/A	N	N	The F/V Annette radioed Communications Center Juneau reporting that they were disabled and adrift in Tongass Narrows. The North Pacific SAR Coordinator issued a Marine Assistance Radio Broadcast and a Station Ketchikan Response Boat and a water taxi boat responded and stood by until the tug Jenny B could arrive on scene. The tug took F/V Annette in tow into Ketchikan harbor.
5/15/07	ALPINE COVE	N/A	N	N	The F/V Alpine Cove radioed Communication Center Juneau requesting MEDEVAC for A 40-year-old male crewmember while operating in Prince William Sound. The North Pacific SAR Coordinator coordinated with the duty flight surgeon who recommended the MEDEVAC. An Air Station Kodiak HH-60 helo deployed in Cordova launched to the scene, hoisted the patient, and delivered him safely to Cordova Hospital.

5/14/07	MISS AUDRUY	3	N	N	The master of the F/V MISS AUDRUY radioed Station Ketchikan requesting assistance reporting that they were disabled and adrift near Cutter Rocks. The vessel struck Cutter Rocks and had lost their prop. The Station Ketchikan 25ft SAFE boat launched to the scene and took the vessel in tow to Ketchikan.
---------	----------------	---	---	---	---

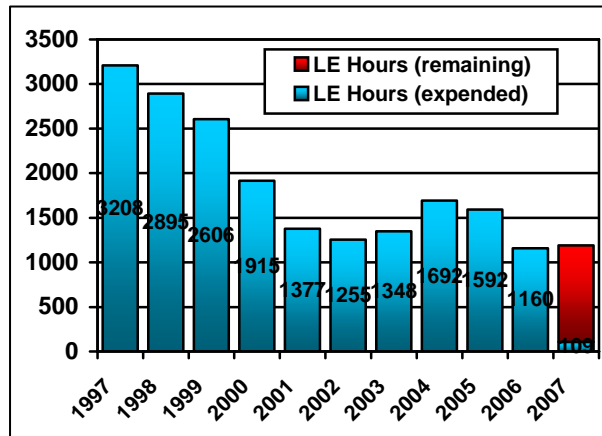

Table 1. CGD17 CFVS/Search and Rescue Case Summaries (Continued)

Date	Vessel Name	POB	Death	VSL Loss	Circumstances/Specific Cause
4/28/07	CARLYNN	3	N	N	The master radioed the North Pacific SAR Coordinator reporting that the vessel was experiencing fuel problems and was disabled and adrift 118nm southwest of Cape Spencer. The crew could not access the fuel system components in the lazarette because a skiff was on top of the hatch, which not be moved without the hydraulics and boom. The North Pacific SAR Coordinator issued an Urgent Marine Information Broadcast. There were no responses to the UMIB and no commercial assets were located to assist. The North Pacific SAR Coordinator directed USCGC MUSTANG to divert from Sitka Sound, approximately 165nm away. District Seventeen also directed MAPLE, moored in Sitka, to make preparations for getting underway by the time MUSTANG arrives on scene. If MUSTANG cannot tow CARLYNN, MAPLE will be directed to get underway, pending MUSTANG's and District Seventeen's assessment. The MUSTANG arrived on scene and took the vessel in tow to Elfin Cove.
4/27/07	SEA BEAR	3	N	Y	The master of the F/V SEA BEAR radioed Communications Center Juneau reporting that the vessel was hard aground in vicinity of Klag Bay of Chichagof Island. Sector Juneau directed the launch of an Air Station Sitka HH-60 helo. The SEA BEAR crew informed the Sector that the vessel was listing at 45 degrees, and they were abandoning ship. The crew of the SEA BEAR embarked their skiff and made it to the nearby shore. The helo arrived on scene and recovered the crew from the beach.
4/23/07	CAPE KIWANDA	N/A	N	N	The master radioed Air Station Kodiak Communications Center requesting a MEDEVAC for a 39-year-old male crewmember. The vessel was operating 65nm south of Kodiak. The crewmember had nearly severed his right thumb. The Duty Flight Surgeon provided medical advice to the crew. The Duty Flight Surgeon determined that a MEDEVAC was warranted due to the transit time for the vessel to reach Kodiak and the possible need for reattachment of the thumb. An Air Station Kodiak HH-60 helo launched to the scene, hoisted the patient, and transported him to Kodiak, where they were met by awaiting EMS personnel.
4/17/07	LORELEI L	1	N	N	The master radioed the Communications Center Juneau reporting that the vessel was taking on water in vicinity of Stone Rock, near Hidden Bay in Clarence Strait. The had donned his survival suit and was ready to abandon ship if necessary. The master reported that bilge pumps appeared to be keeping up with the rate of flooding. Station Ketchikan launched their 47ft Motor Life Boat (MLB) and 25FT SAFE boat with portable pumps to the scene. An Air Station Kodiak HH-60 helo also launched to assist. The Station Ketchikan boats arrived on-scene before the helo, and rendered assistance to the F/V LORELEI. The helo stood down and returned to base. The F/V LORELEI L was then escorted to the pier at the Kendrick Bay hatchery to effect repairs. The cause of the flooding was determined to be two six inch cracks in the hull above the water line which allow seawater intrusion only while underway.
4/12/07	VELVET	2	N	N	The master radioed the North Pacific SAR Coordinator reporting that the vessel was taking on water and had knee-deep water in the engine room. The vessel was operating in Sitka Sound. The master reported that the bilge pumps were not able to keep-up with the rate of flooding. Three Good Samaritans overheard the radio traffic, responded to the scene, and provided pumps. The pumps provided by the Good Samaritans were not in good working condition, and failed to provide adequate de-watering. An Air Station Sitka HH-60 helo and the Air Station Sitka 41FT Utility Boat launched to assist. The helo arrived on-scene and delivered two de-watering pumps to the vessel. The Velvet was able to start the pumps and begin the dewatering process, and the 41ft Utility Boat escorted the Velvet back to Sitka.

IX. CGD17 Resource Summary

Figures 4 and 5 show the historical and projected *annual* HC-130 aircraft law enforcement hours and Medium and High Endurance Cutter days used within the Seventeenth District. Figures 6 and 7 show the same information over the last three years for the *reporting period only*.

Figure 4. Annual HC-130 Hours

*Flight hour data by calendar year.

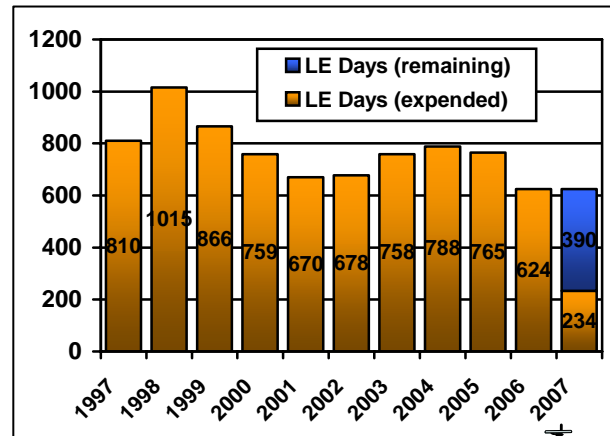

APR 2006 – MAY 2006

- 1 WHEC patrolled for 23 days
- 1 WMEC patrolled for 23 days
- 3 WLBs patrolled for 6 days (fisheries)
- 4 WPBs patrolled for 61 days (fisheries)
- Total Cutter days – 113**

HC-130s flew 32 sorties for 117 hours
 HH-60/65s flew 82 sorties for 284 hours

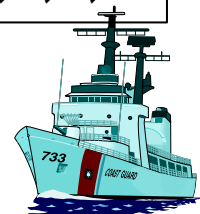

Figure 5. Annual Cutter Days

*Patrol day data by calendar year.

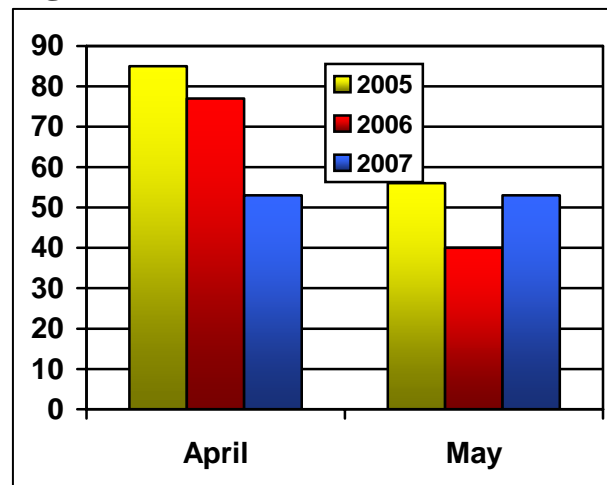

APR 2007 – MAY 2007

- 1 WHEC patrolled for 35 days
- 2 WMECs patrolled for 61 days
- 2 WLBs patrolled for 6 days (fisheries)
- 5 WPBs patrolled for 85 days (fisheries)
- Total Cutter days – 187**

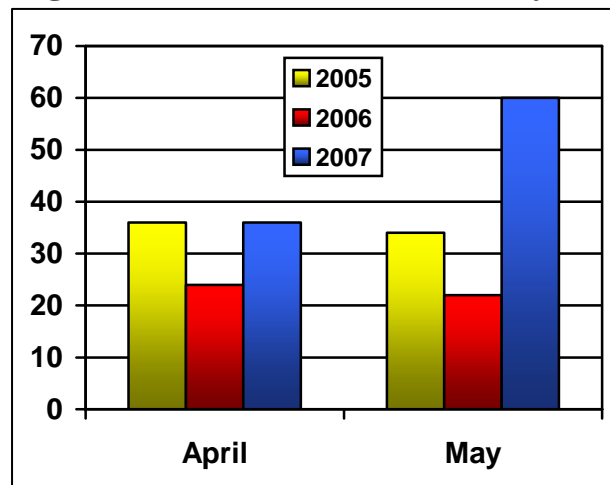

HC-130s flew 26 sorties for 106 hours
 HH-60/65s flew 60 sorties for 210 hours

Figure 6. APR - MAY HC-130 Hours

*Flight hour data for reporting period ONLY.

Figure 7. APR - MAY Cutter Days

*Patrol day data for reporting period ONLY.

X. Maritime Security

The Coast Guard continues to work with the maritime community, including industry and federal, state and local agencies on Maritime Security. The Seventeenth Coast Guard District is committed to maintaining security on Alaska's waters for the protection of passengers, vessels, cargo, and terminals. The Seventeenth

District will continue to expand vessel boardings, step up harbor patrols, increase escorts of certain ships carrying dangerous cargo, and broaden Coast Guard presence. Cooperation with other federal and state agencies has resulted in the apprehension of several individuals with various outstanding arrest warrants.

Search and Rescue will remain at the forefront of Coast Guard efforts and is unaffected by this shift in resources. The Coast Guard will continue to dedicate available resources to fisheries enforcement and respond to reports of illegal activity. The Coast Guard is particularly interested in reports of suspicious activity from the maritime community. Those involved in the fishing industry are particularly valuable in assisting with the Maritime Security mission.

XI. International Engagement

The Seventeenth Coast Guard District hosted a delegation from the Russian Northeast Border Directorate (NBD) of the Federal Security Service (FSB) from 04 through 08 April 2007 in Anchorage. Rear Admiral Brooks met with the Chief of the Northeast Border Guard Directorate, Coast Guard of the Federal Security Service of Russia, Lieutenant General Lebedev. The Commanders reviewed the results of joint actions conducted since their last meeting in September, 2006, expressed a high opinion of the work done, and recognized its importance and productivity.

They specifically emphasized their commitment to sharing information in support of combating illegal, unregulated and unreported fishing and enforcing the UN moratorium on High Seas Driftnet fishing. The Commanders reaffirmed their commitment to carrying out the activities agreed to in their September 2006 Plan for Joint Action, including joint patrols in the central Bering Sea using the Combined Operations Manual, reciprocal port calls, and a working level meeting in Kamchatka in June or July 2007. Further, the Commanders decided that they will begin work on the agreement and preparations for their next meeting in September, 2007, in Kamchatka.
