Rotated Anisotropy

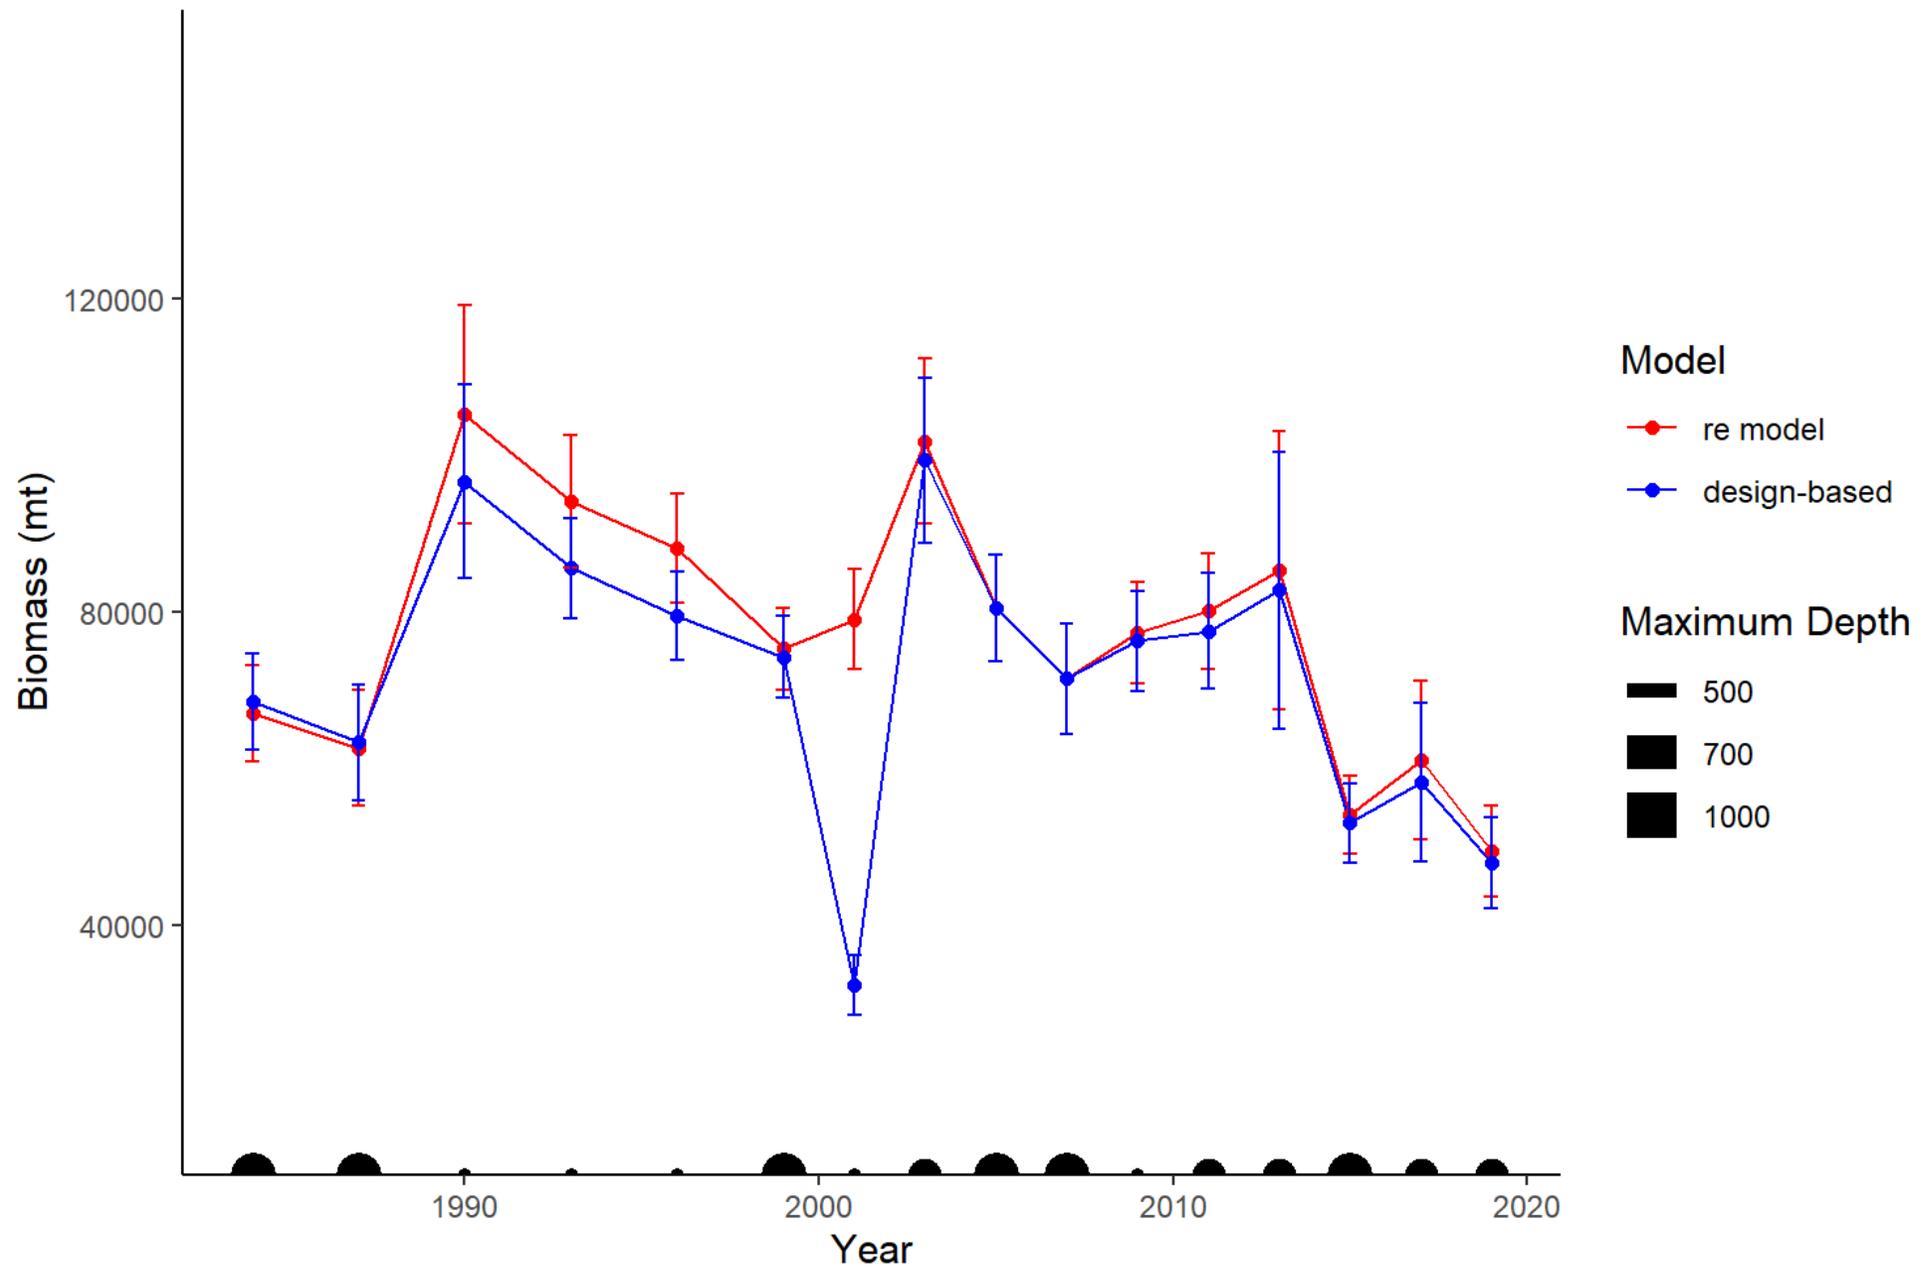

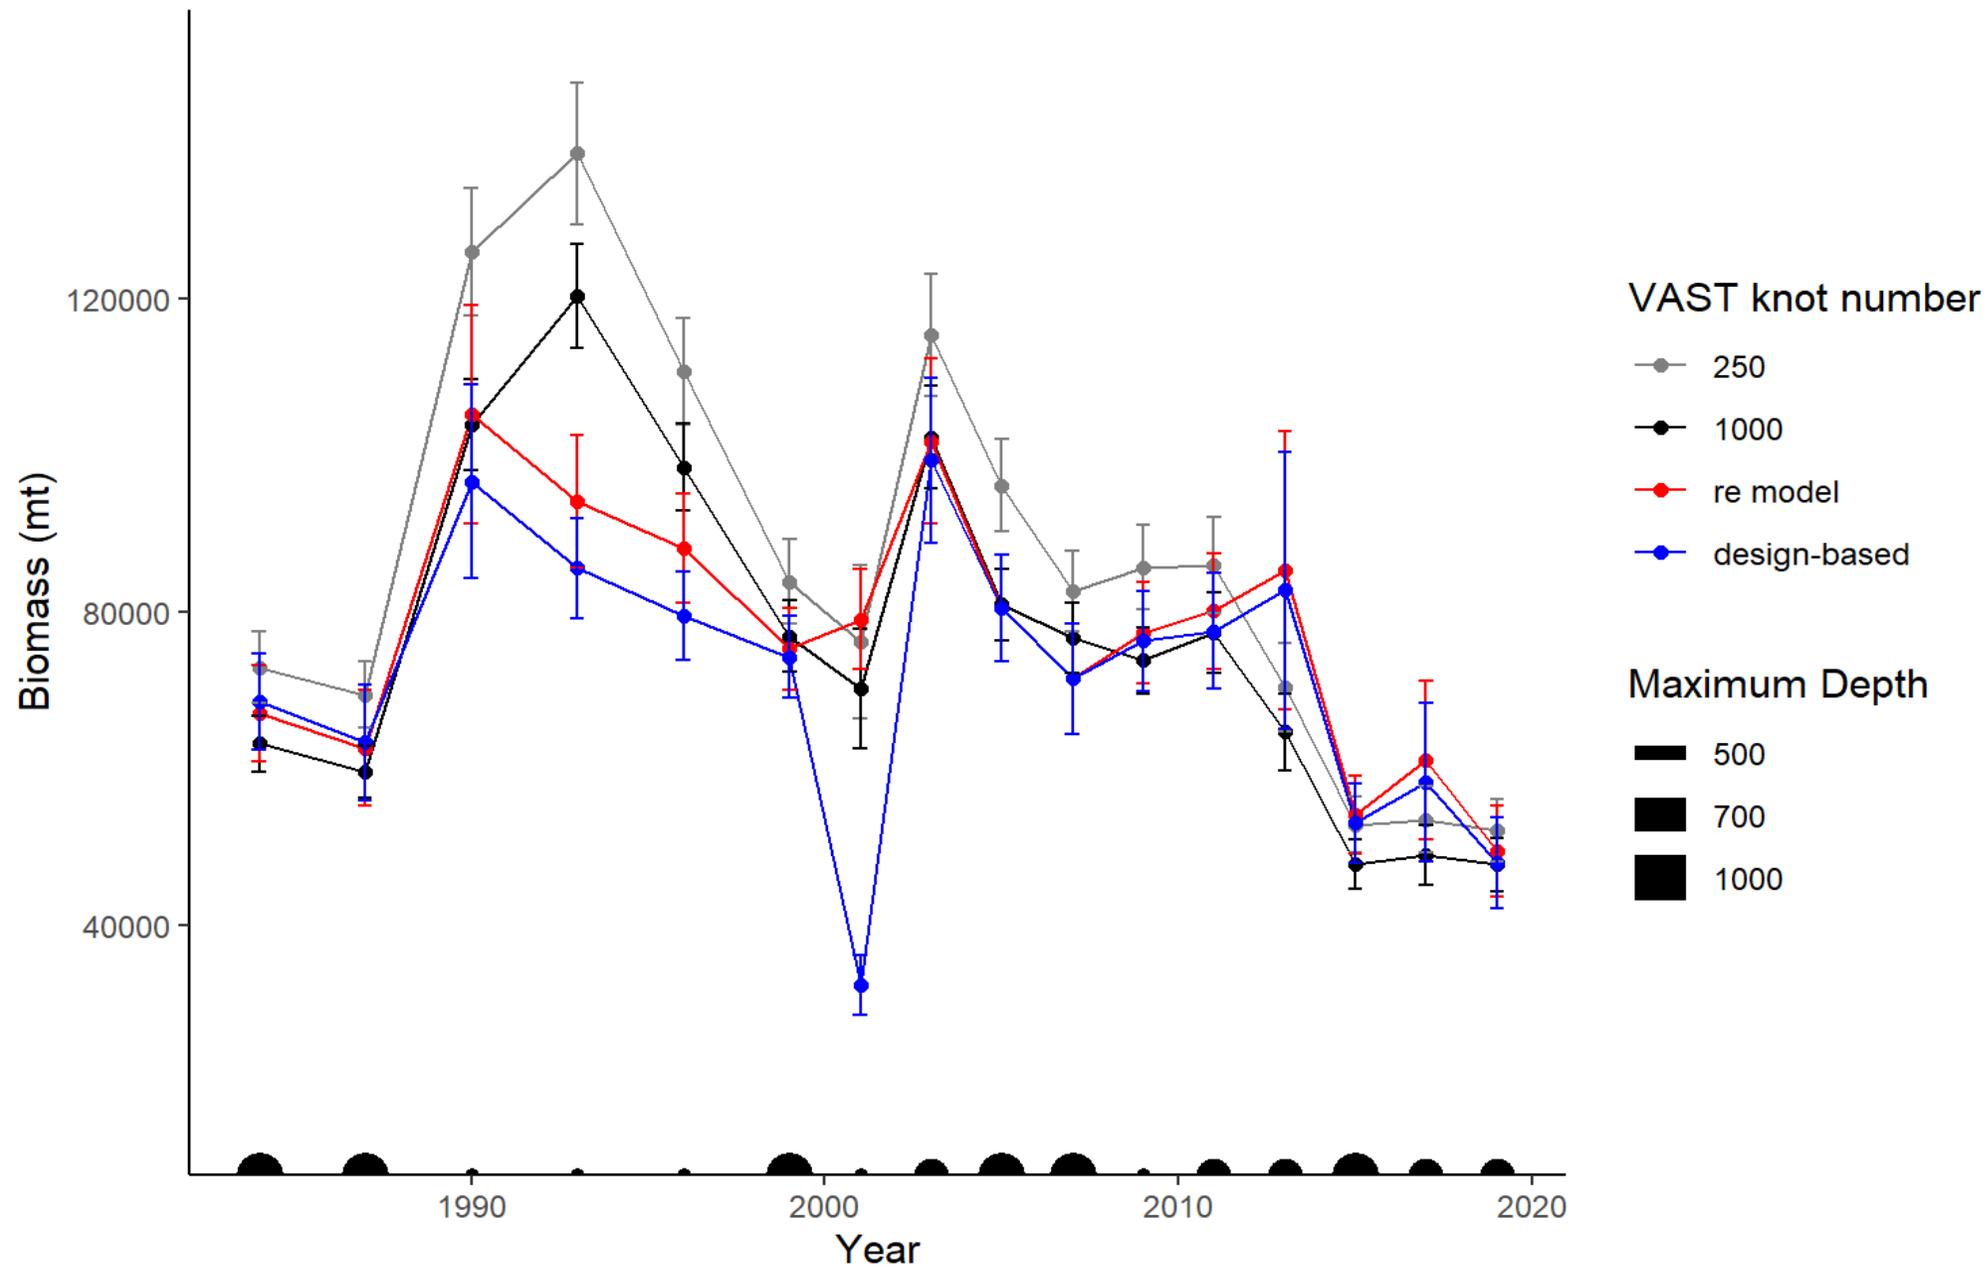

2nd-Order Anisotropy

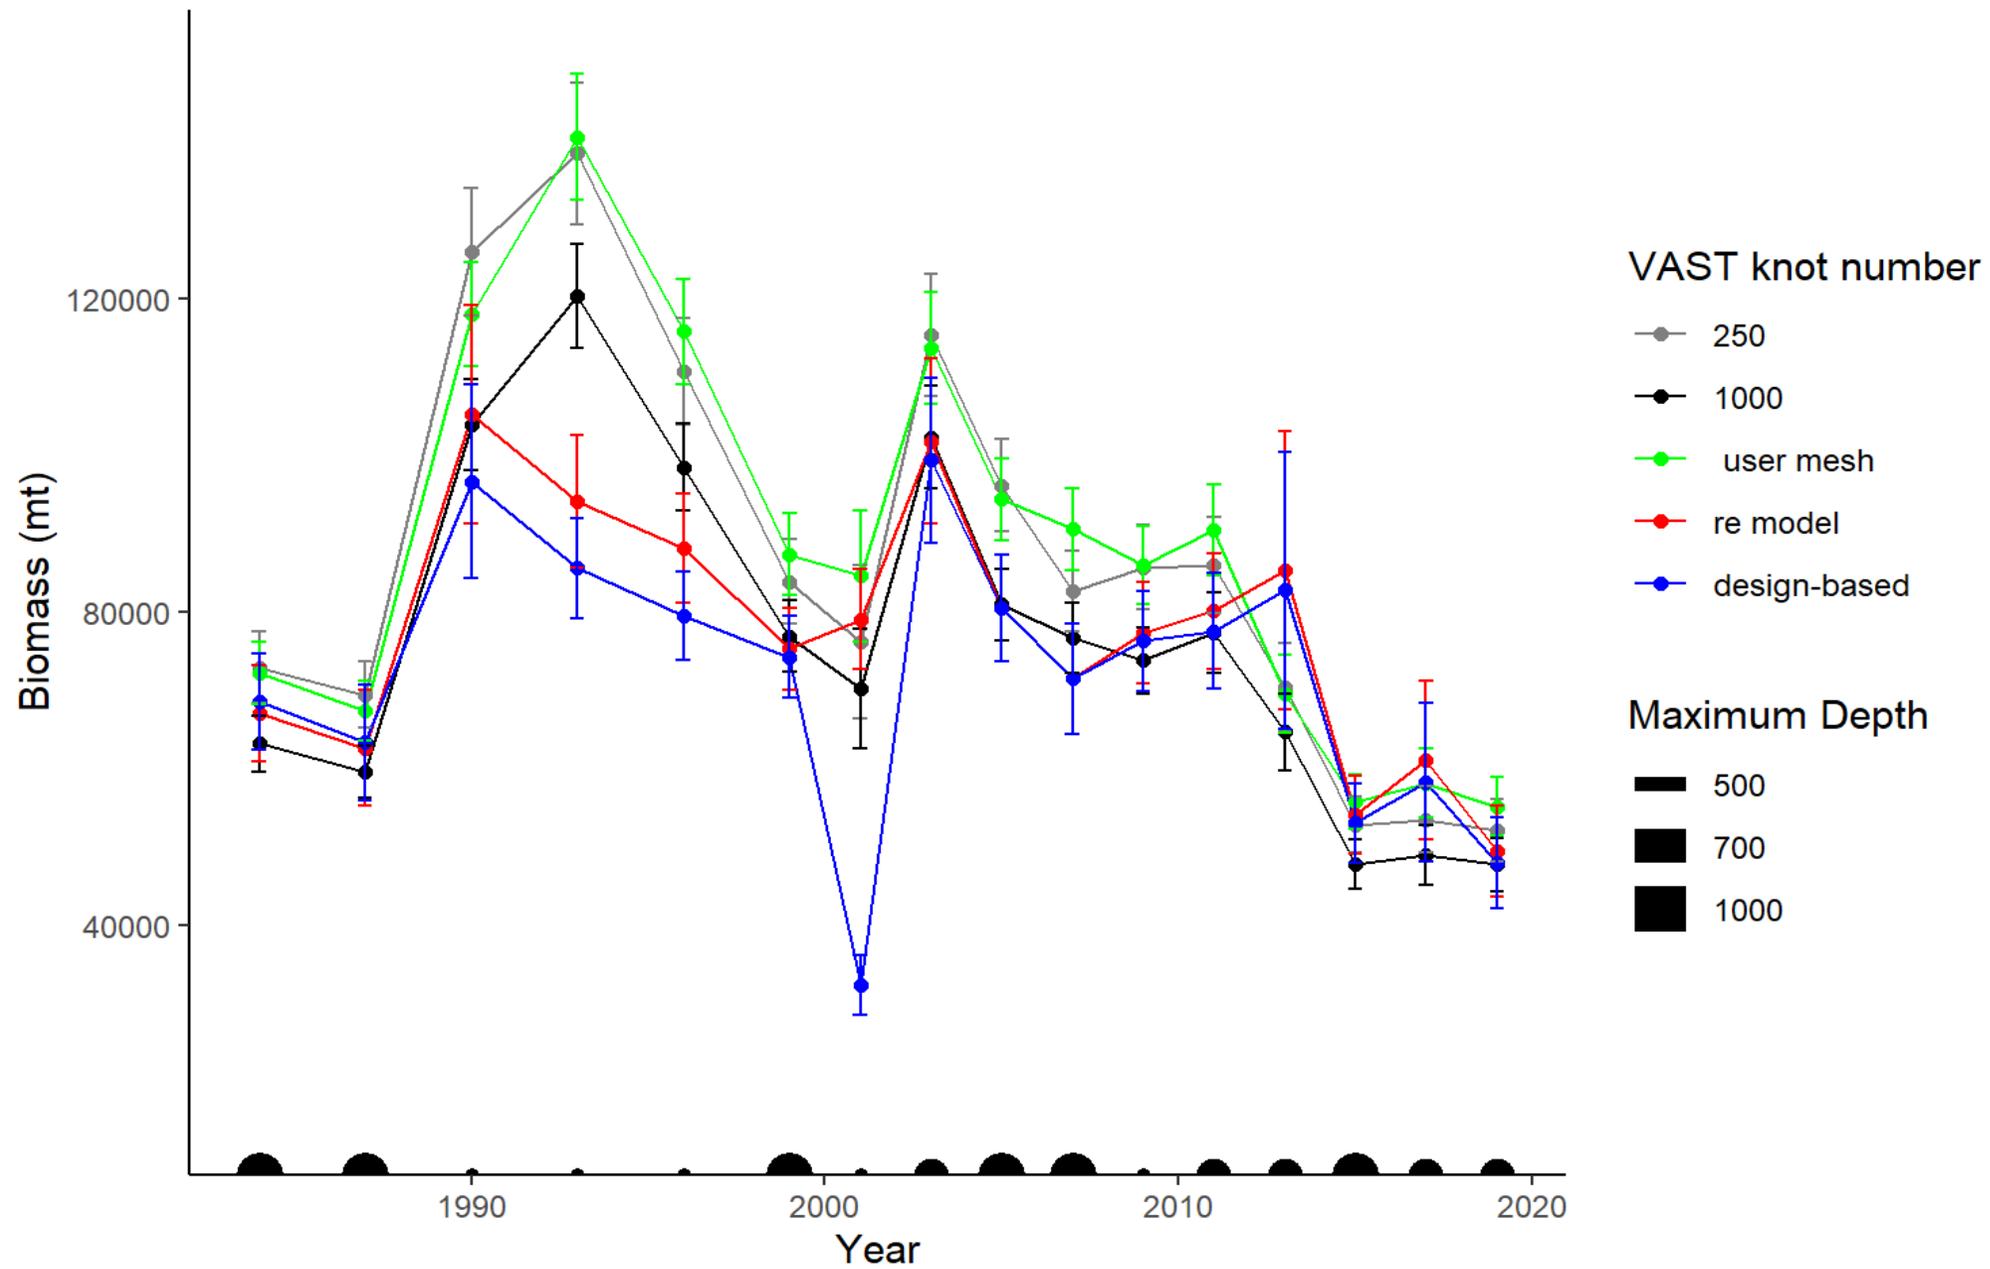

GOA Dover sole VAST results

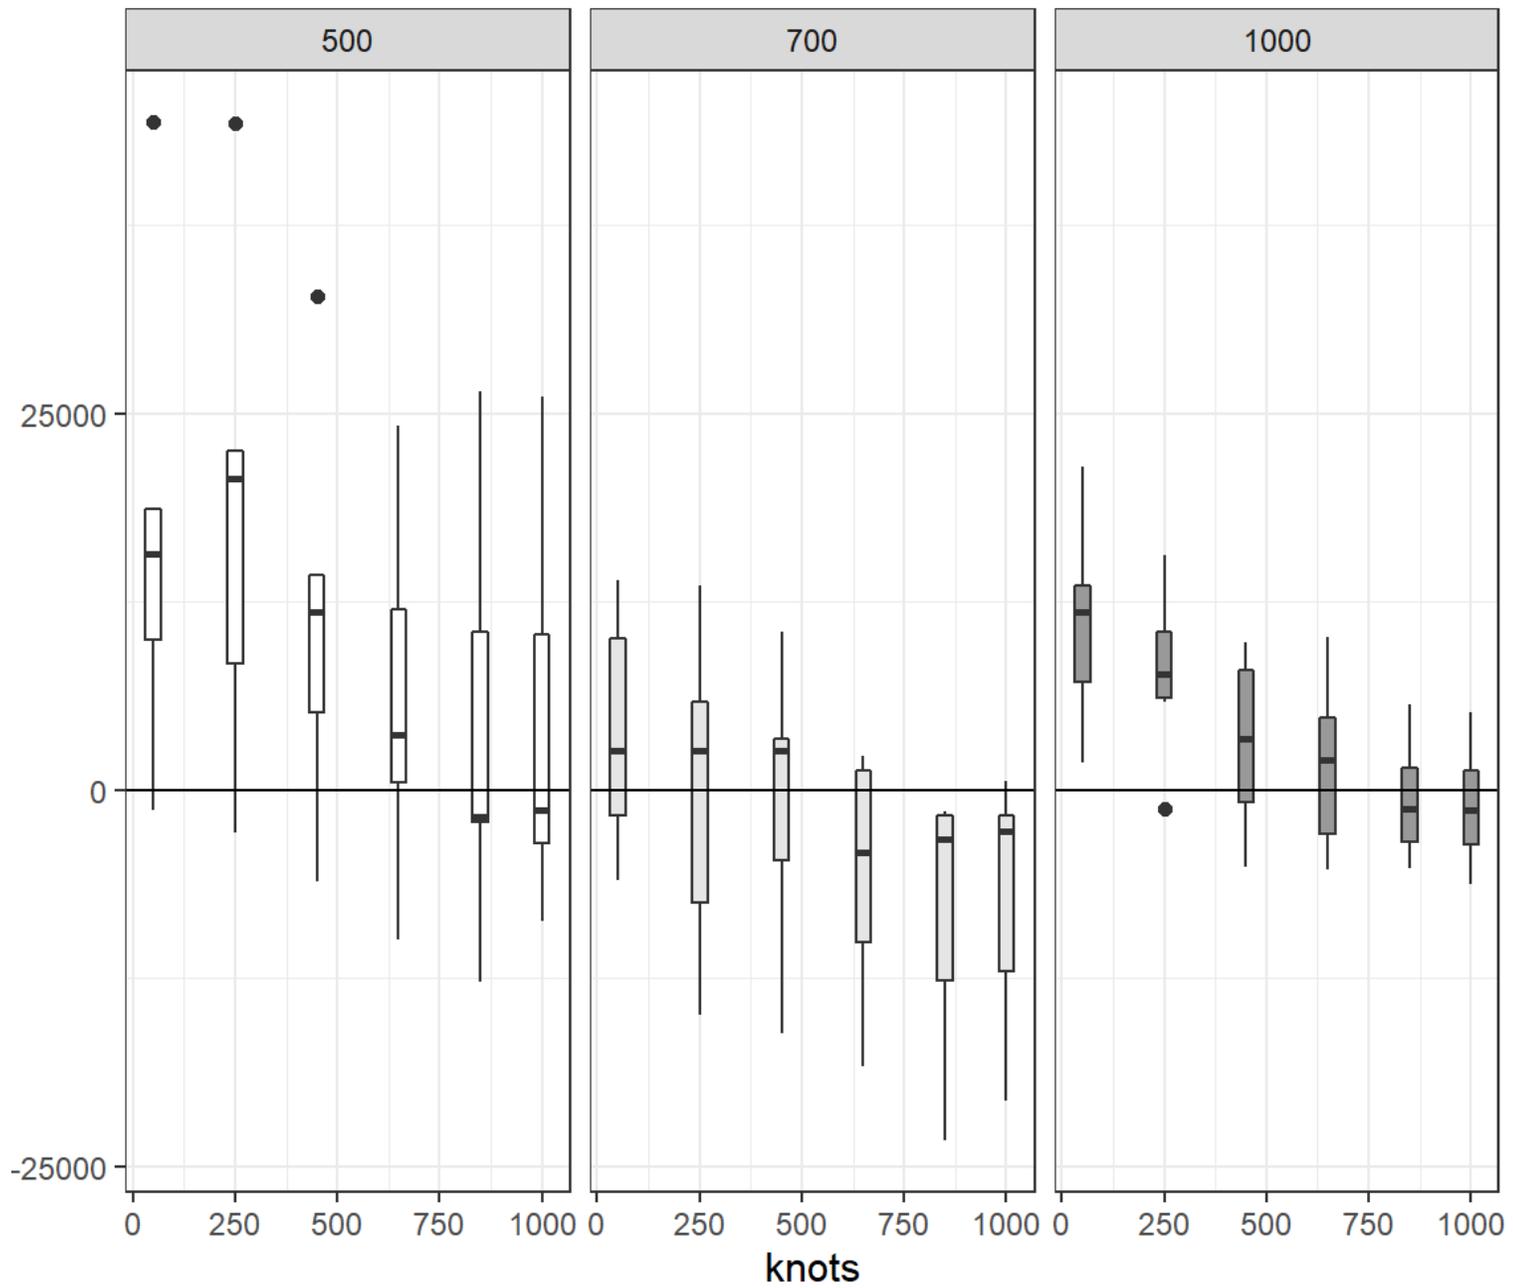

- Models:
 - Design-based
 - RE model
 - VAST using knots:
 - 250
 - 1000
 - VAST with user defined mesh

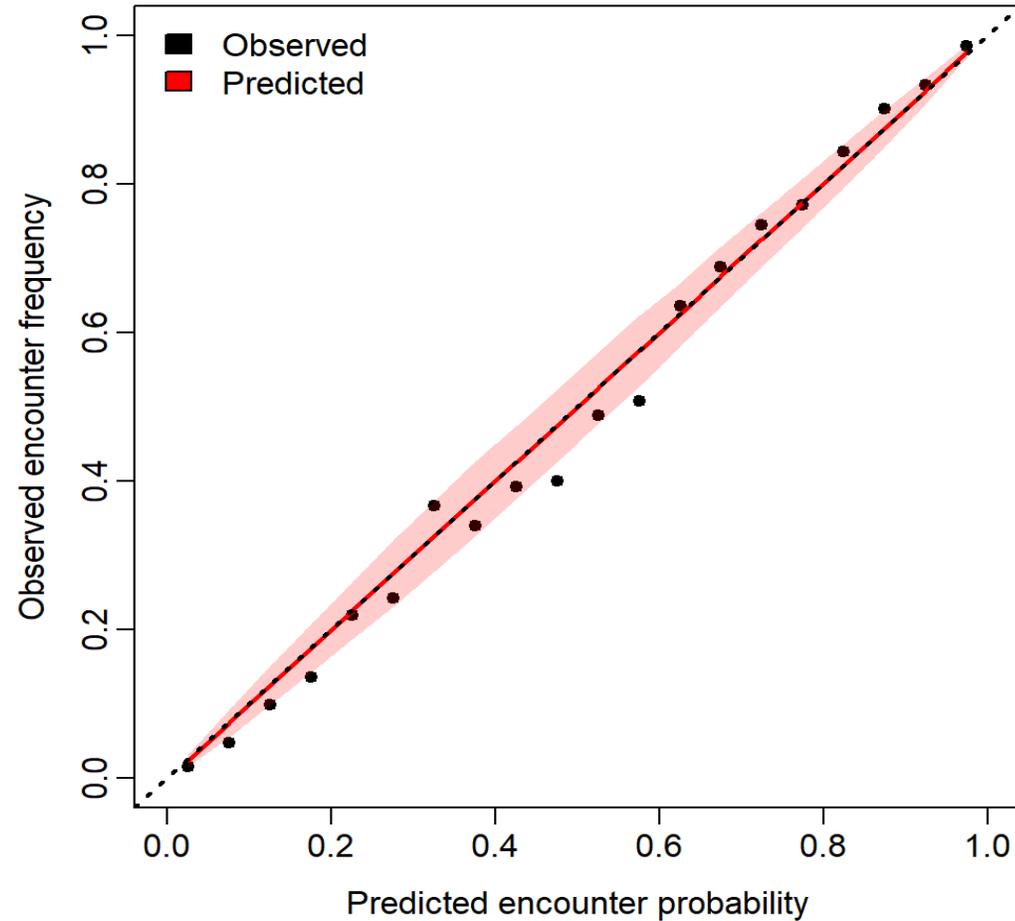

VAST – RE Model

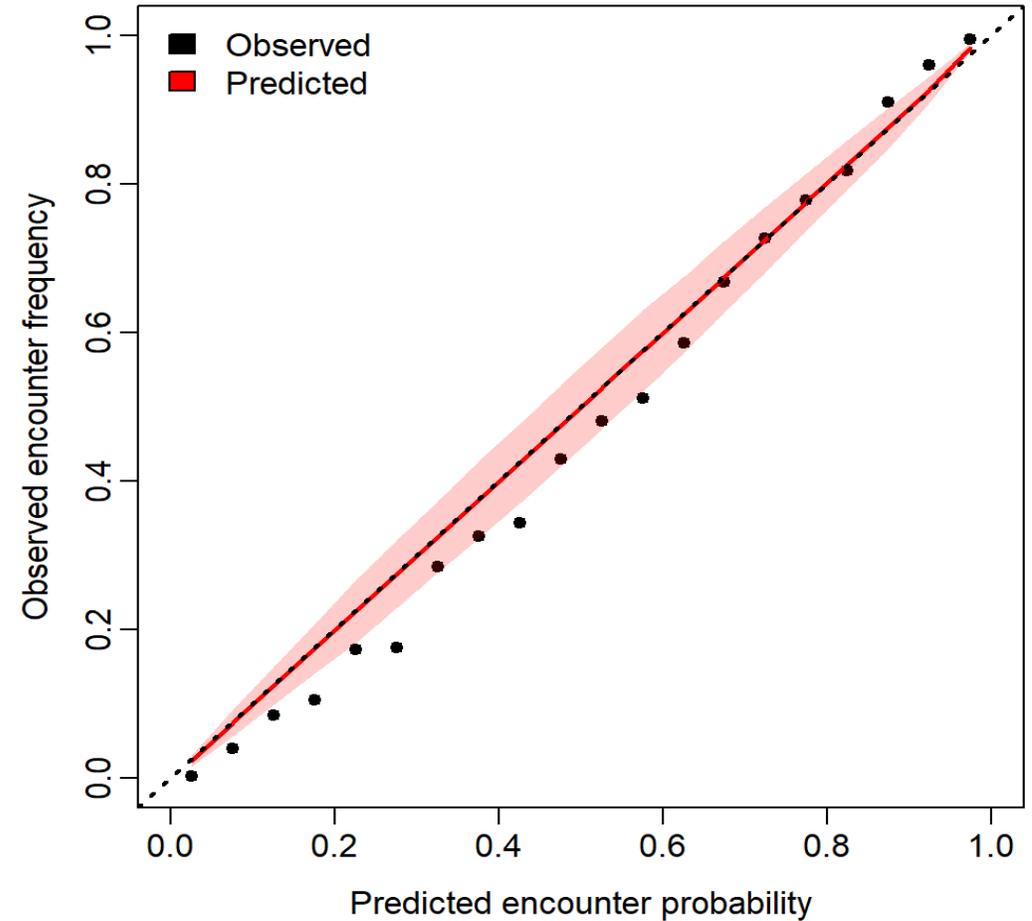

Model Validation – Probability of Encounter

250 Knots

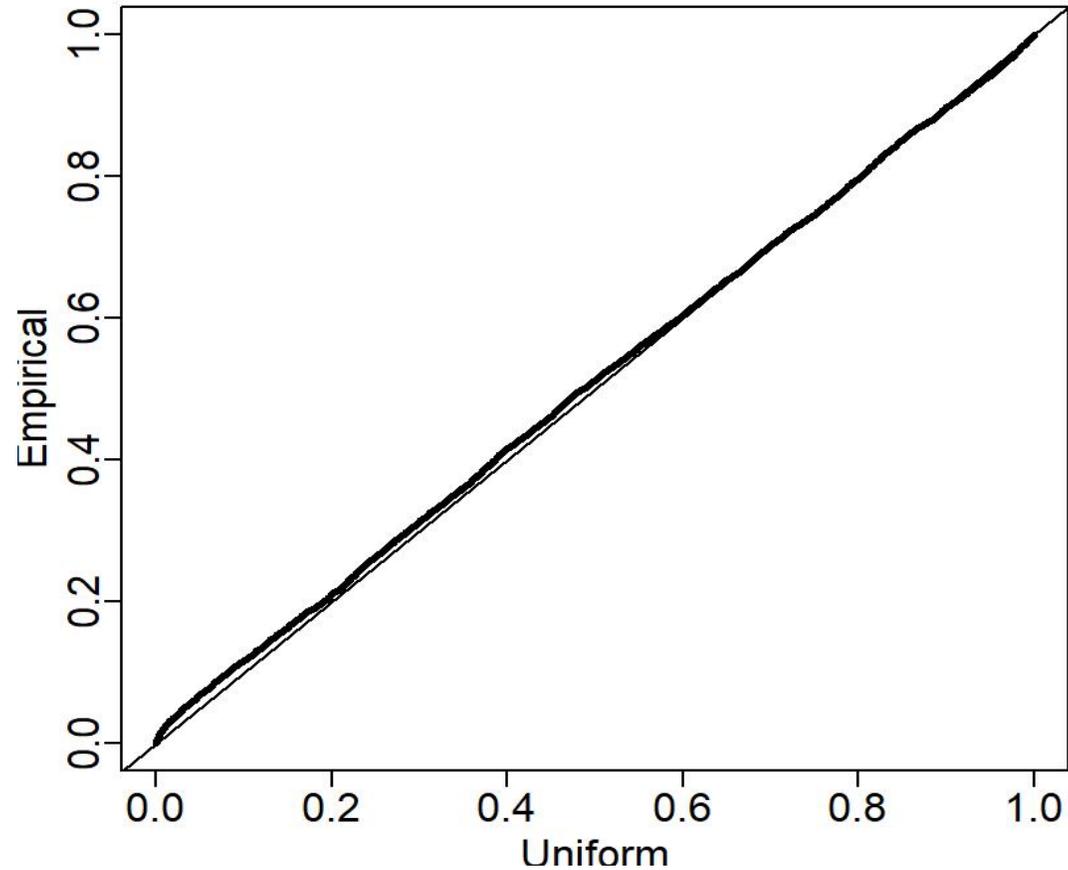

1000 Knots

Model Validation – Probability of Encounter

Q-Q plot

1993 Biomass Density

250 Knots

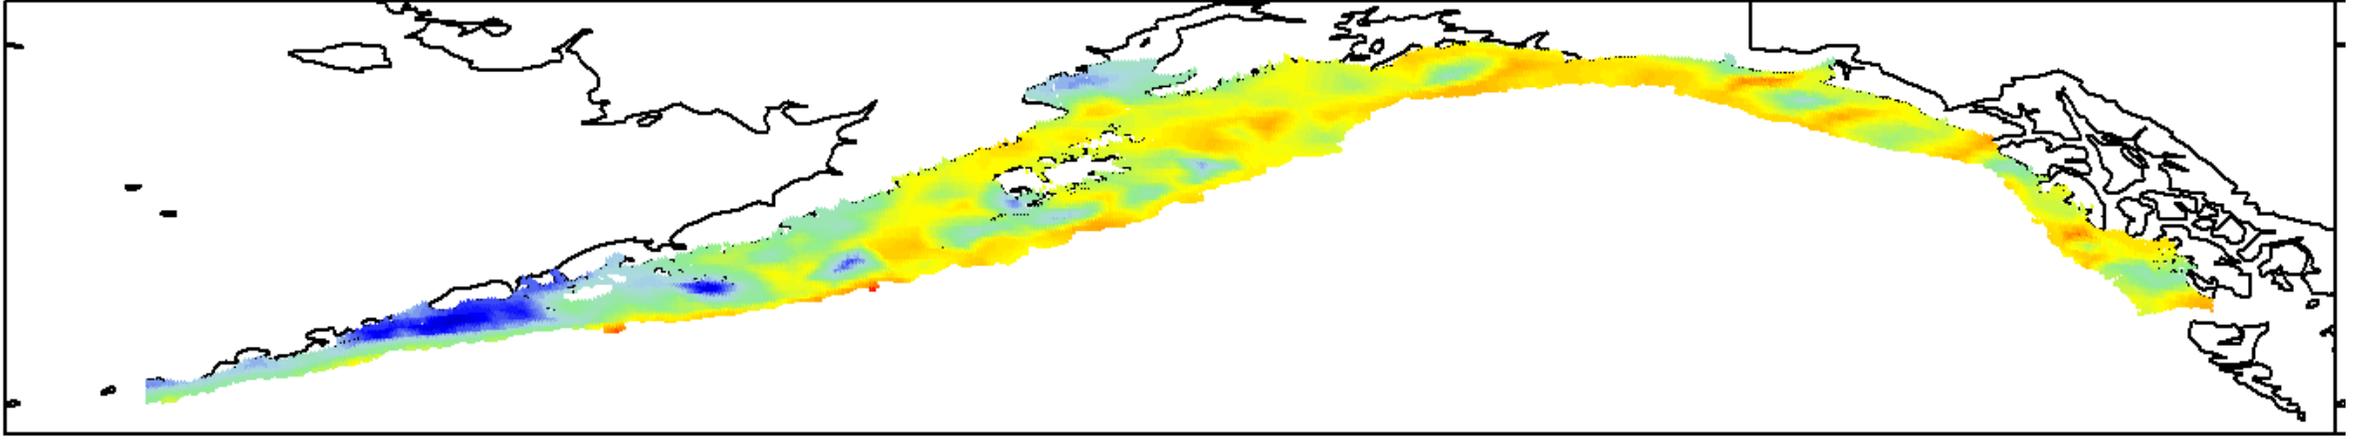

1000 Knots

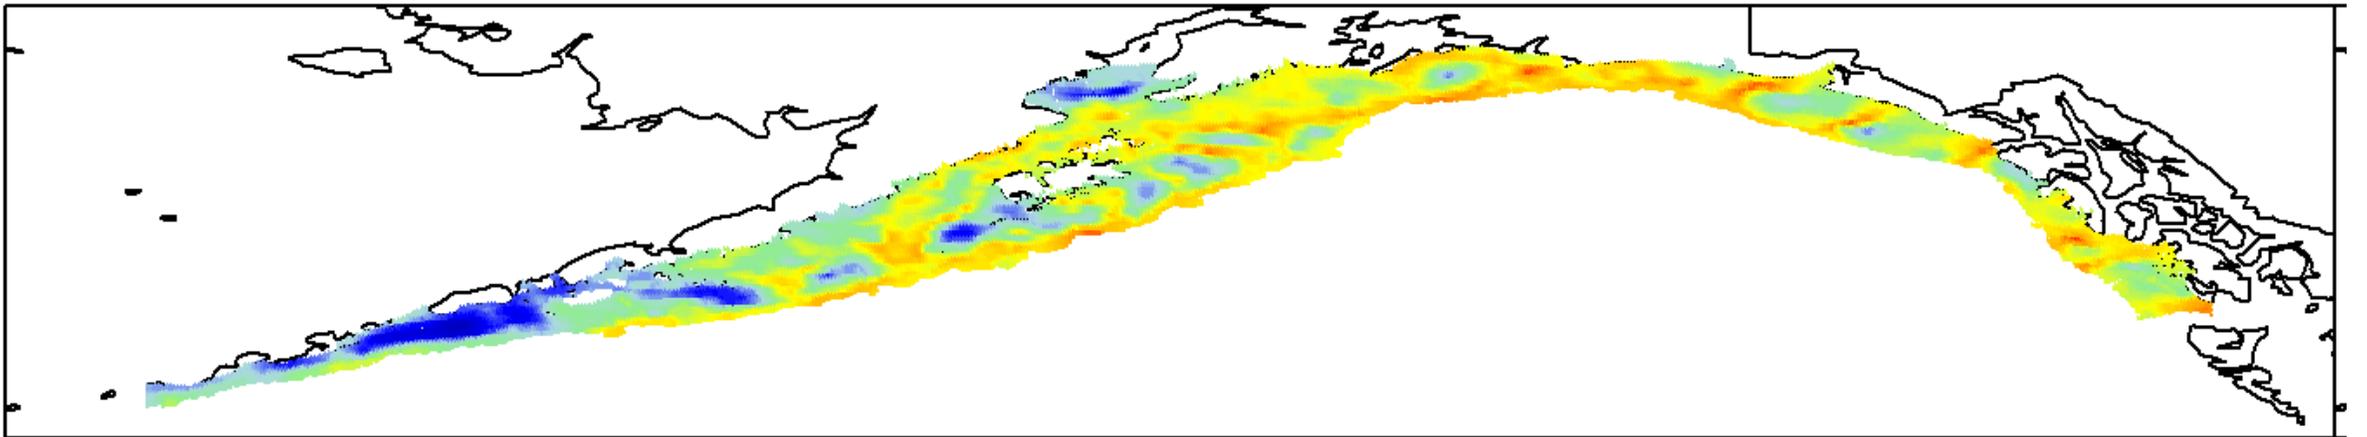

2005 Biomass Density

250 Knots

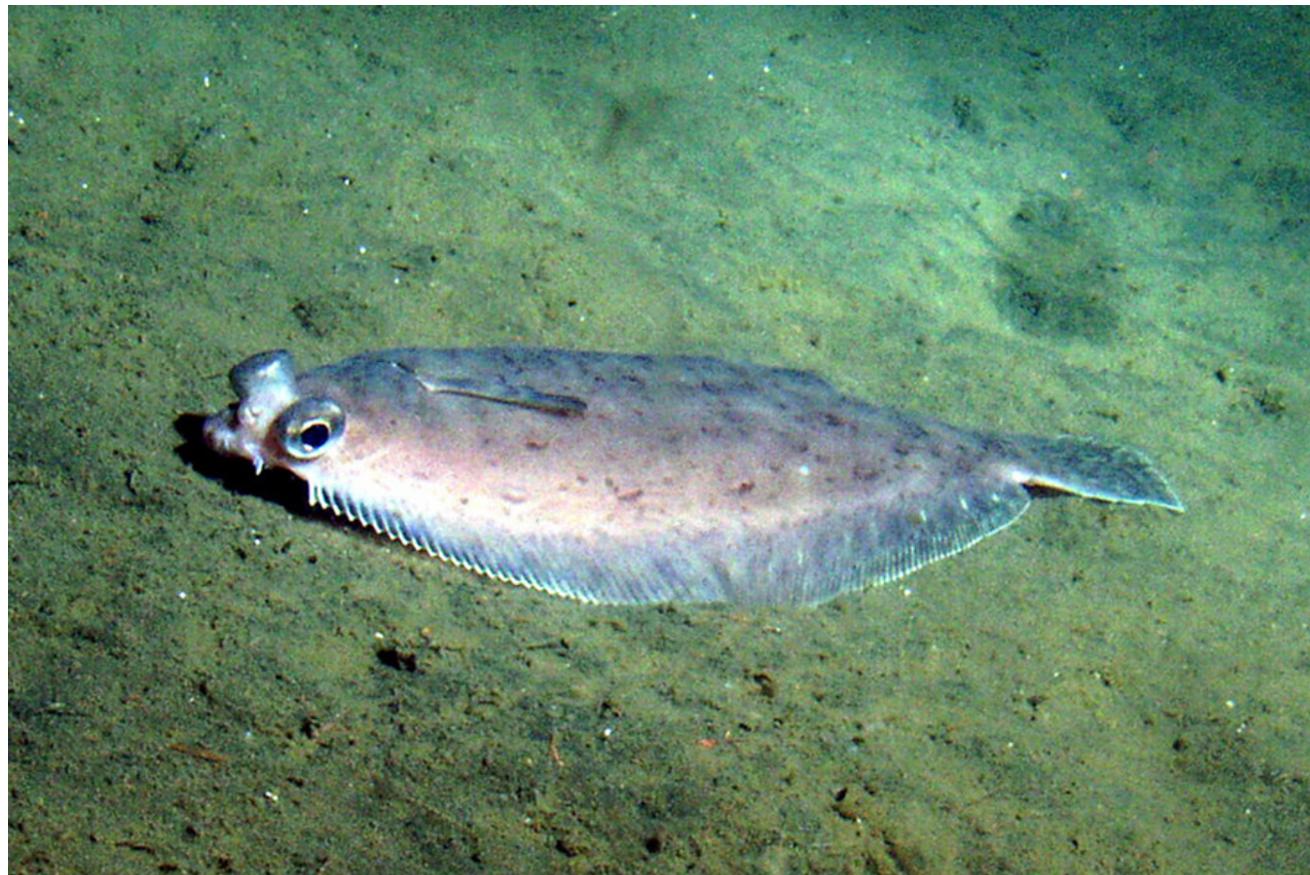

1000 Knots

Recommendations

- Sensitivity to mesh structure
 - Boundaries
 - Knots
- Sensitivity to anisotropy
 - Separate models for Western/Central and Eastern GOA
 - Add Covariates
- Explore VAST Observation model settings

Thank You!

JISAO
