

MONTHLY SUMMARY OF
FOREIGN FISHING ACTIVITIES OFF ALASKA
AUGUST 1 to 15, 1977

A total of 298 individual foreign fishing and associated support ships (5 Soviet, 283 Japanese and 8 South Korean and 2 Taiwanese) engaged in fisheries off of Alaska during August. That was a decrease of 354 from the previous month and a decrease of 47 from August 1976.

SOVIET ACTIVITIES

The 5 individual Soviet vessels included 4 stern trawlers and 1 refrigerated transport. This was a decrease of 3 from the previous month and a decrease of 61 from August 1976.

Groundfish Trawl Fishery

Four stern trawlers and the refrigerated transport operated in the central Bering Sea until departing early in July. The 2 remaining stern trawlers fished the Gulf of Alaska.

JAPANESE ACTIVITIES

The 283 individual Japanese vessels included 26 refrigerated transports, 20 Danish seiners, 56 pair trawlers, 121 medium stern trawlers, 19 large stern trawlers, 17 longliners 9 cargo vessels, 3 tankers, 5 factory ships, 5 independent crab vessels, and 2 snail pot boats. This represents a decrease of 350 from the previous month and an increase of 64 from August 1976. The large decrease from the previous month is due to the departure of the salmon fleets.

Crab Fishery

The 5 independent crab pot vessels supported by 1 cargo vessel continued fishing the central Bering Sea area.

Groundfish Trawl Fishery

The Japanese trawl fisheries along the Continental Shelf continued with independent stern trawlers operating in the Gulf of Alaska, Bering Sea and Aleutians.

Twelve independent stern trawlers fished in the Gulf of Alaska with concentrated efforts off the Yakutat fishing grounds and along the 100 nathom curve south of Kodiak. Support vessels included 2 refrigerated transports and a tanker.

The major fishing effort occurred in the central and southeastern Bering Sea along the 100 fathom edge and along the Aleutians. One hundred fourteen independent stern trawlers and their support vessels participated in those areas.

Pollock Fishery

The five factory ship fleets continued fishing for pollock along the Continental Shelf edge from northwest of Unimak Island to west of St. Matthew Island in the Bering Sea. A total of 99 vessels are included in the fleets.

Sablefish Fishery

Seventeen longline vessels fished for sablefish in the Gulf of Alaska and along the central Aleutian Islands during August.

In early August, 9 individual vessels fished in the Gulf of Alaska while 8 vessels fished the Aleutians. In the Gulf, 3 vessels fished the southeast area, 3 fished the Yakutat grounds and 3 fished south of Kodiak.

Salmon Fishery

The 6 Japanese high seas salmon factory ship fleets completed their effort in the central Bering Sea and Aleutian areas and departed during the latter part of July.

Snail Fishery

During August, one snail pot boat continued fishing in the central Bering Sea. This vessel was joined by a second vessel early in the month.

SOUTH KOREAN ACTIVITIES

Eight Korean fishing vessels fished Alaskan waters during August. This represents a decrease of 2 from last month and a decrease of 48 from August 1976.

Sable Fishery

Four longline vessels fished primarily for sablefish off Alaska during August. Three vessels fished in the Gulf of Alaska along the Yakutat grounds while the remaining vessel fished north of Unimak Pass in the Bering Sea.

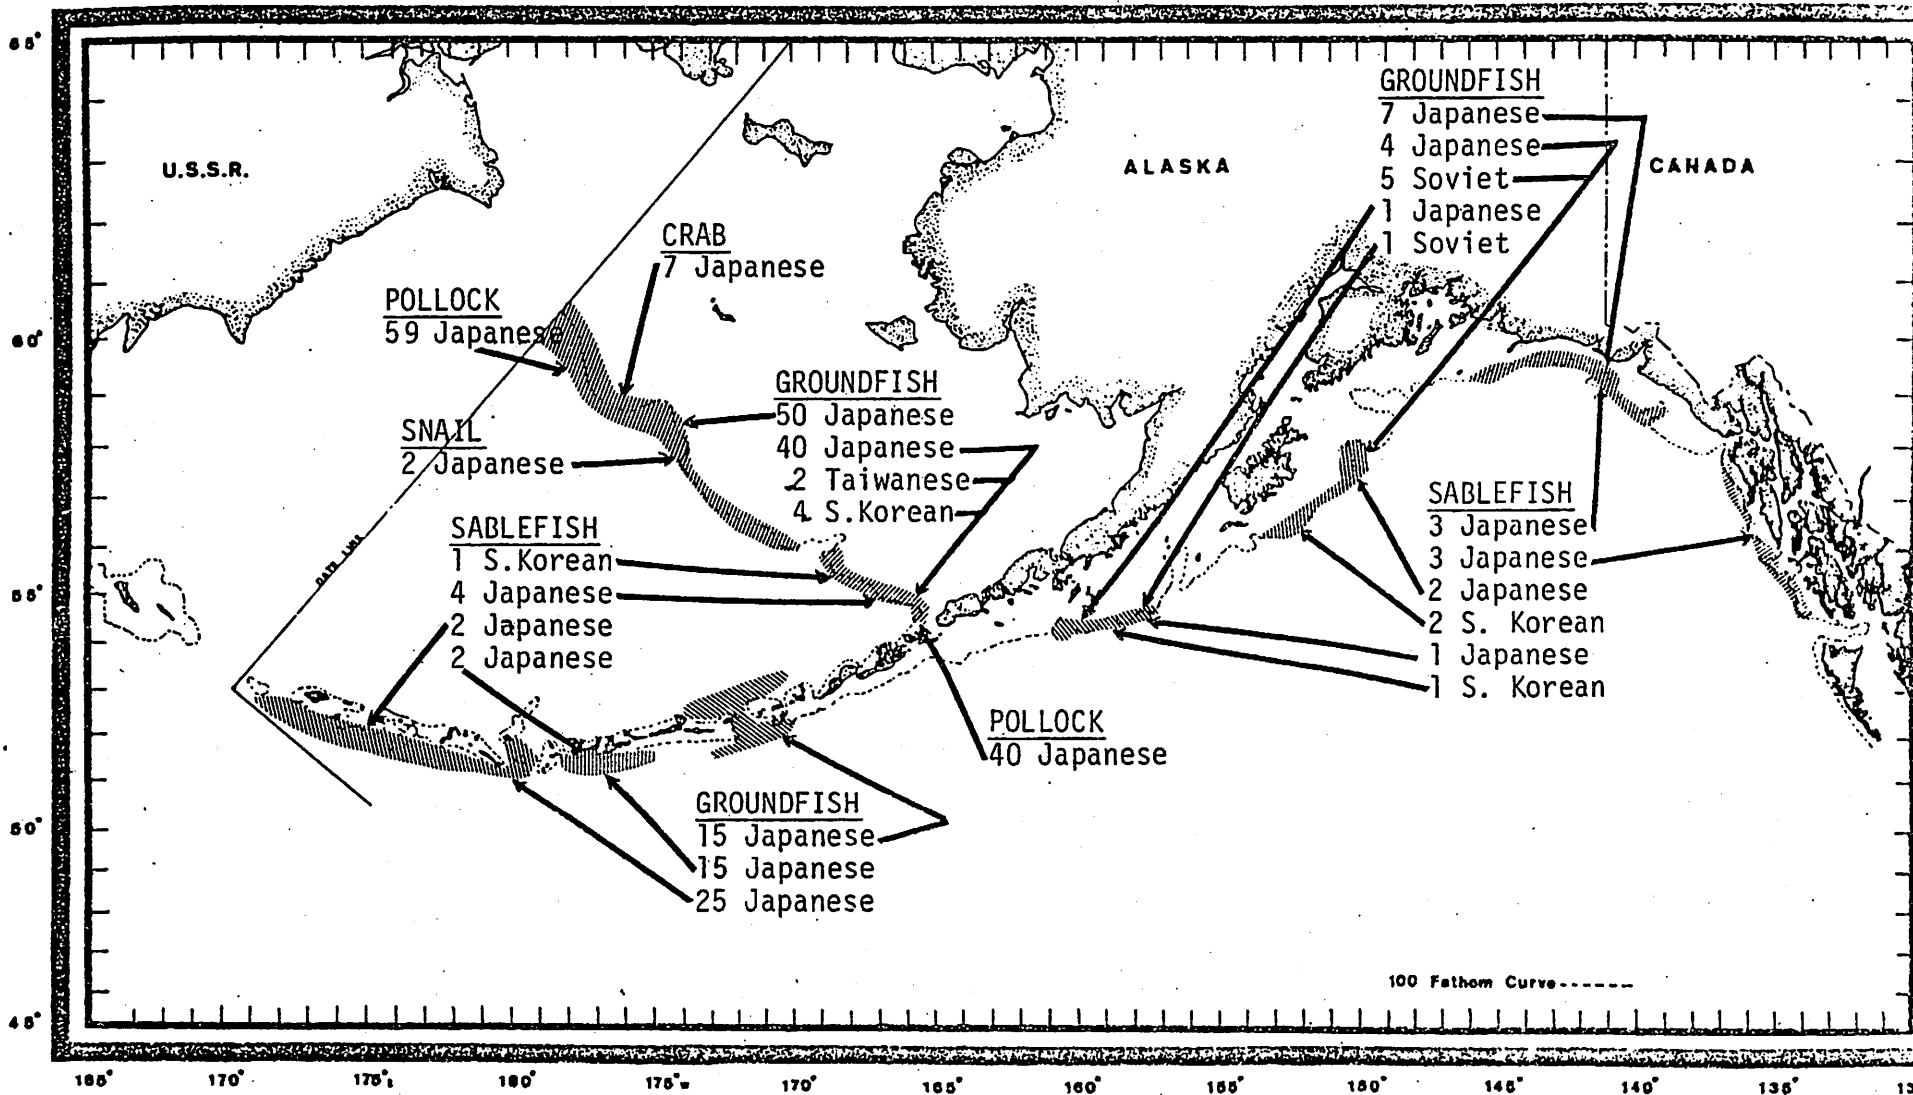

Pollock Fishery

During August, four large stern trawlers fished along the 100 fathom curve of the eastern Bering Sea.

TAIWANESE ACTIVITIES

Ground Fishery

During August, 2 stern trawlers fished in the Alaskan waters, one in the Gulf of Alaska and one in the Bering Sea. The vessel that started in the Gulf shifted its efforts to the Bering Sea. There were 2 less vessels present than in August 1976.

Foreign fishing off Alaska, August 1-15, 1977
by country, number of vessels, principle fishing
grounds and species fished.
