FINAL

ADVISORY PANEL MINUTES North Pacific Fishery Management Council January 30 - February 2, 2012 Seattle, Washington

The following (19) members were present for all or part of the meetings:

Kurt Cochran
Craig Cross
Julianne Curry
Jerry Downing
Tom Enlow
Tim Evers
Jeff Farvour
Becca Robbins Gisclair

Jan Jacobs
Alexus Kwachka
Craig Lowenberg
Chuck McCallum
Matt Moir
Theresa Peterson
Ed Poulsen
Neil Rodriguez

Lori Swanson
Anne Vanderhoeven
Ernie Weiss

*Absent: Andy Mezirow,
John Crowley*

Minutes of the December 2011 meeting were approved.

Election of Officers

The Advisory Panel approved Tom Enlow as Chair and Lori Swanson and Becca Robbins Gisclair as co-vice Chairs for 2012.

C-2 Halibut PSC in GOA – Initial Review Analysis

The current analysis package only considers reductions to PSC limits and does not include tools for industry to accomplish PSC reductions while maintaining harvest levels. For this reason, the AP recommends that the analysis be revised to include options to:

- Tie PSC reductions to halibut stock status (floating cap)
- Allow some portion of unused PSC (50-100%) to roll from one year to the next
- Develop individual bycatch quotas for groundfish participants based on catch history.
- Allow Amendment 80 sideboards to roll from season to season, and manage Am 80 5th season sideboards as aggregate (not separated into deep- and shallow-water complexes).
- Include an option for a sector split of the trawl halibut PSC cap between CVs and CPs.

The AP recommends that the document not be released for public review.

Motion passed 11-8.

The following substitute motion failed 8-11:

The AP recommends the Council move this analysis forward with the following additions:

Alternative 2, Option 2:

Suboption 1:

Add (d) 20 percent

Suboption 2:

Add (d) 20 percent

Suboption 3:

Add (d) 20 percent

Add Suboption (applied to suboptions 1-3): 10% reduction in year 1, an additional 5% in year 2 and another 5% in year 3 (total reduction = 20%).

Incorporate the following in the analysis:

- Incorporate new IPHC data and other bluebook information.
- Look at individual vessel bycatch rates in specific fisheries to assist in determining whether bycatch is a random event or whether fishing behavior is a factor (i.e. are there boats with consistently high bycatch rates).
- Include history of halibut bycatch reductions in the H&L CP sector.

Minority Report on C-2: The undersigned minority supported the substitute motion. The minority felt that action must be taken to reduce halibut PSC limits in the Gulf of Alaska. Review of the IPHCs current and retrospective status of the halibut stocks indicates a clear need to protect the halibut resource. Uncertainty surrounding overall stock health, low exploitable biomass, and slow growth rates warrants a precautionary approach to halibut removals. Inadequate reductions in total removals of halibut may threaten the rebuilding potential of halibut stocks.

The directed commercial and charter halibut fisheries have taken significant reductions in allowable harvest over the past decade. Gulf regulatory areas (2C, 3A, 3B) experienced a 50% total reduction in allowable harvest by the directed commercial fishery from 2002 to 2011 while the 2C charter halibut fleet was reduced to the bottom GHL stairstep in 2011. The dynamics of the directed and non-directed halibut fisheries have changed significantly, while the PSC limits for Gulf of Alaska trawl and fixed gear fleets have remained at the levels set in 1986 and 1995 respectively.

Signed by: Ernie Weiss, Becca Robbins Gisclair, Chuck McCallum, Theresa Peterson, Tim Evers, Jeff Favour, Alexis Kwachka, Julianne Curry

C-3(a) Pribilof Island blue king crab rebuilding

The AP recommends that the Council delay final action on Pribilof Island blue king crab bycatch management to allow input from the SSC and the Crab Plan Team.

The AP recommends modifying Alternative 6 as shown in **bold**.

Component 2. Triggered closure of the area representing the distribution of the PIBKC stock between 1984-2009 (See Figure 10-3). The PSC associated with this closure is established as a fishery-wide level at 75% of the ABC (currently this equates to a cap of 1,726 lbs or 646 crab). This PSC cap is then further allocated as follows:

Option 1. To sectors by gear type as follows:

Trawl Gear – 45% of trigger cap

Pot Gear – 45% of trigger cap

H&L Gear – 30% of trigger cap

Under the current 2011/12 ABC this would equate to cap levels by sectors as indicated in the table below (in lb and numbers of crab):

Gear type	% allocation	Cap (lb)	Cap (numbers of crab)
Trawl	45%	777	291
Pot	45%	777	291
Hook and Line	30%	518	194

Option 2. Seasonally to all fisheries in aggregate. Any unused PSC will roll to the following season.

a) 25 % to first quarter, 25% to second quarter, 50% to last half of year

b) 50% to first half of year, 50% to last half of year

c) 75% to first half of year, 25% to second half of year

Further, the AP recommends that bycatch caps be managed as a number of crab, based on the average weight of PIBKC over the last five years.

The AP emphasizes the importance of precision in bycatch estimates, and requests continued development of census reporting of PIBKC bycatch.

The AP recommends that the Council request staff include a discussion of the following documents in the EA:

- Declaration of Commercial Fishery Failure, 2000
- SSC Minutes of April 10-12, 2000
- Declaration of Overfishing Status for PIBKC, September 5, 2002

The AP requests that the stock boundary for PIBKC be refined to reflect the true distribution of the Pribilof Island blue king crab resource with input from the Crab Plan Team and the SSC.

Motion passed 18-0.

C-3(c) Tanner Crab Rebuilding

The AP comments that we are encouraged by the progress made regarding the *bairdi* model which will help as we move forward with a rebuilding plan. The AP credits much of this progress to the recent Crab Modeling Workshop and encourages this forum to occur in the future as necessary to address crab modeling issues.

Motion passed 18-0.

C-3(e) Crab Economic Data Reporting

The AP recommends that a modified Alternative 3 (attached) be moved forward for final action to revise catcher vessel and catcher processor EDR forms. The AP further recommends that alternative 3, also attached, be moved forward for final action to revise the shore based processor and floating processor EDR forms. Finally, the AP recommends that general regulations be developed to implement this collection, with all forms (and any form revisions) subject to revision in the Council process.

Motion passed 14-4.

Note: The only changes made under the AP's modified Alternative 3 motion to catcher vessel and catcher processor EDR forms from Alternative 3 were to exclude "All unique captain and crew contracts and settlement sheets" and to include "crew license number/CFEC permit number".

Minority Report: A minority of the AP did not support this motion because they felt that the alternative selected would not provide the data necessary to reach the original goals of the crab EDR program of assessing the effects and impacts of crab rationalization. While the minority agrees with the premise of eliminating redundant or unusable data elements, the minority was not comfortable with removing a significant number of data elements at this time. The minority supported an approach of developing better ways to collect necessary data elements which are not accurately collected rather than simply eliminating key data collection elements.

Signed by: Becca Robbins Gisclair, Chuck McCallum, Theresa Peterson, Alexis Kwachka

C-4(a) Trawl Sweep Modifications

The AP recommends that the Council move the analysis forward on a normal timeline and send it out for public review.

Motion passed 19-0.

C-4(b) HAPC – Skate Egg Concentration Sites

The AP recommends that the analysis not be sent out at this time. The analysis should be expanded to include:

- Longer history of fishing in proposed sites
- Further discussion with NMFS enforcement on ability to minimize closure size
- Economic analysis of impacts of actual proposed closure site, including buffer(s)
- Options for circular closures centered on highest density
- Discussion of sites in other areas (BS, AI, GOA)
- Further explanation of the calculation used to estimate total number of sites
- Further explanation of how density of eggs is determined
- A table including sites, species, casing density, population trend, fisheries in the site and amount of fish caught in site.
- Actual bycatch of egg casings by gear type in each site
- Actual impact of fishing gear on the habitat
- Clarification of process for modifying fishing restrictions in HAPC sites

The AP also encourages the analysts to work with fishing industry members to better identify and explain the importance of the sites to fisheries, and issues related to the effects of potential closures.

Motion passed 19-0.

C-4(c) BBRKC Spawning Area/Fishery Effects

The AP recommends that the Council request that the discussion paper be brought back after the nearshore survey work in 2012 can be incorporated, and after the Crab Plan Team can address this issue.

Motion passed 19-0.

D-1(b) GOA Pollock D-season

The AP recommends that the Council take no further action on this issue.

Motion passed 17-1.

D-1(c) AFA Vessel Replacement on GOA Sideboards

The AP recognizes the need to clarify ambiguities in the effect of the AFA vessel replacement language highlighted by staff in the discussion paper.

The AP recommends that the Council develop a purpose and need statement and request staff initiate analysis of the following alternatives:

1. To fish in the GOA, a replaced/rebuilt vessel must:
 - Option 1. Be within the MLOA specified on their GOA LLP at the time the legislation was approved
 - Option 2. Be within the MLOA specified on both their GOA and BSAI LLPs at the time the legislation was approved
 - Option 3. Abide by current 10% limit on increase in existing length, horsepower and tonnage as of the time of the legislation and may not exceed 125 feet.
2. If the replaced vessel did not have a GOA LLP at the time of the legislation, the replacement vessel is not eligible to fish in GOA.
3. Upon removal of an exempted vessel, the sideboard exemption is extinguished and cannot be transferred to another vessel.

The analysis should address the possibility that a replacement vessel could exceed the 125-foot limit on exempt vessels contained in the current AFA regulation.

Motion passed 19-0.

D-1(d) BSAI Flatfish Specification Flexibility

The AP recommends that the Council move this issue forward for analysis, and ask staff to further develop options to maximize flatfish harvesting flexibility, with input from participants in the affected fisheries. The options should insure harvest by species is below ABC limits, and should not pre-empt flatfish harvests in other sectors.

Motion passed 17-1.

D-2 Staff Tasking

The AP recommends that the Council initiate the process of updating the Programmatic SEIS by scheduling a scoping meeting and requesting staff to prepare a discussion paper.

Motion passed 19-0.

The AP recommends that the Council encourage NOAA to facilitate the development of integratable software to use with navigational systems onboard vessels.

Motion passed 17-0.

The AP recommends that the Council develop EDR programs for all federal fisheries to facilitate the development of baseline data.

Motion passed 12-5.

The AP supports continued efforts by the Council to improve electronic communication.

Motion passed 18-0.
