

Executive Director's Report

Annual Chairmen and EDs meeting

In late May Chairman Benton and I attended the annual Council Chairmen's meeting hosted by the Gulf of Mexico Council (we will be hosting next year's meeting, either in Homer in July or Sitka in May). The Council Chairs and Executive Directors met for a day and a half, followed by a day and a half meeting with NOAA/NMFS representatives, including Bill Hogarth, Clarence Pautzke, Jim Balsiger, and numerous others from the agency. Attached (B-1(a)) is the agenda from the meeting to give you an idea of the breadth of topics discussed. Foremost for the Council discussions were Magnuson-Stevens Act reauthorization issues, which I will describe in further detail under agenda item C-9 later this week. Specific issues of high interest included: the NEPA process and, related to that, how to better streamline our process; EFH, and the desire to obtain more specific guidance from Congress on their intent with regard to defining and protecting EFH (or HAPC); the recent Executive Order regarding Marine Protected Areas (MPAs) and how that process relates to the Council process, particularly in defining and designating MPAs; and, the moratorium on IFQs. Of additional interest is the 2002 proposed budget, which includes an additional \$2.5 million for the eight Regional Councils (of which we receive about 16%). Other than special funding for AFA and Steller sea lions, we have been level-funded for the past three years.

Evening Events and Meetings

There are several evening sessions taking place this week. On Monday and Tuesday we had an EFH scoping meeting and an Ecosystem Committee meeting respectively. Tonight there will be a Community Reception at the Near Island Research Facility, at 6:00 pm. Tomorrow night, in this room, there are two presentations that should be of interest to Council members and everyone else in our process. At 5:30 pm (or immediately following the Council's evening recess) Mark Buckley, Manager of the Digital Observer Project, will make a presentation on video monitoring systems they are developing as a potential supplement to onboard observers. This is an interesting presentation which was given to our SSC at the April meeting. Mr. Buckley's letter, under B-1(b), requests that staff initiate the process of regulatory changes to permit the acceptance of data provided by video monitoring systems. My informal response was that this is likely something that needs to be discussed and closely coordinated between the Council and NMFS prior to such a regulatory change.

Following that presentation, at about 6:15 pm, there will be a robotic camera demonstration from a representative of Seymour Wildlife Systems. This should also be of high interest to the Council and industry as these types of monitoring devices are playing an increasingly important role in Steller sea lion research.

Finance Committee and Executive Session

I have tentatively scheduled a meeting of the Finance Committee later this week to update you on our current budget, future budget outlook, and recent expenditures and commitments of our SSL funds. You may also want to hold an Executive Session to discuss the two letters under Item B-1(c) which relate to AP seats. One regards the AP seat vacated by Kim Dietrich, and the other regards the resignation of John Henderschedt.

New Senior Economist

I am pleased to announce that we have hired a new Senior Economist for the Council staff. Dr. Mark Fina, formerly with Northern Economics, Inc., has accepted an offer for this position and will start on July 15. This delay is to allow him some time to complete his commitments to Northern Economics, which include contract work for our Council. Mark holds a Ph.D. in Agricultural and Applied Economics from Virginia Polytechnic Institute, as well as a J.D. from the University of Minnesota Law School. Darrell Brannan will work for us through July to finish the AFA report to Congress and assist on some aspects of the SSL analysis. We also intend to hire an additional staff economist/analyst to round out the team. I have a couple of excellent candidates for that position and hope to fill it next week, likely with a mid-July or August start date.

Three-meeting Outlook and Fishery Calendar

For your reference through the week, I have attached a copy of our last three-meeting outlook as Item B-1(d). Item B-1(e) is the fishery calendar Council members requested for each meeting.

Digital Observer Project

RECEIVED

APR 20 2001

N.P.F.M.C

19 April, 2001

Mr. Chris Oliver, Acting Executive Director
North Pacific Fishery Management Council
605 West 4th, Suite 306
Anchorage, Alaska 99501-2252

Re: Regulatory change: Request to address AP & Council on Video Monitoring Systems

Dear Mr. ~~Oliver~~: CHRIS

Thank you for meeting with me last week during a break in the Council meeting and for attending my project's April 10 presentation to the Scientific and Statistical Committee.

As you are aware, my project seeks to demonstrate that sophisticated video monitoring systems can supplement, and perhaps replace, many human observer functions aboard Alaska longliners. As I discussed in my SSC presentation, we are making good progress toward achieving our technical goals.

But there is another, non-technical hurdle we must leap before we can offer industry the option of video monitoring systems aboard fishing vessels. There is today no regulatory mechanism that allows government to accept observer information provided by data-gathering and recording devices. Without regulatory change--no matter how successful the technology becomes--the deployment of video monitoring systems in lieu of human counterparts will never happen in Alaska.

To date the both the Council's Observer Advisory Committee and its SSC have gone on record in support of this project and of the concept of video monitoring in general. Dr. Dan Ito, director of NMFS's North Pacific Groundfish Observer Program, is on my project's Advisory Committee. Last year two consultant groups contracted by the NMFS Alaska region urged the agency to pursue the development of video monitoring. In essence, there is growing support for the concept.

- By this letter I am requesting the Council staff initiate the process of crafting regulations permitting the acceptance of data provided by video monitoring systems. I recognize that input from both the Council's Observer Advisory Committee and NMFS will be integral to this agency review process.

- Additionally, I would like to make 30-minute presentations to both the AP and the full Council during the June meeting here in Kodiak. I plan to explain my project to those bodies and ask them for feedback and direction.

I look forward to your response to my requests as well as to working with you and the Council in the future.

Very sincerely yours,

Mark K. Buckley
Manager,
Digital Observer Project

UNITED STATES DEPARTMENT OF COMMERCE
National Oceanic and Atmospheric Administration
NATIONAL MARINE FISHERIES SERVICE
Alaska Fisheries Science Center
7600 Sand Point Way, N.E., Building 4
Seattle, Washington 98115-6349

RECEIVED

MAY 14 2001

N.P.F.M.C

LETTER OF ACKNOWLEDGMENT: 2001-03

Mr. Mark K. Buckley
Digital Observer Project
Box 649
Kodiak, Alaska 99615

This letter acknowledges that the below named vessel and persons have submitted a scientific research plan entitled "System Testing and Data Gathering for the Digital Observer Project" dated April 30, 2001 as specified at 50 CFR 600.745.

Vessel Name: F/V Kariel, 66 ft longliner, USCG Doc No. 626555, ADFG No. 59918, Owner Kariel Inc., Sitka, AK.

Scientists: Chief Scientist Cruises 1,3, and 4, Eric Davis, will be aboard F/V Kariel, Digital Observer Project, Kodiak Alaska.
Chief Scientist Cruise 2, To Be Named from Alaska Fisheries Science Center, North Pacific Groundfish Observer Program, Seattle, WA.
Principal Investigator, Mark K. Buckley, will manage project from shore, Digital Observer Project, Kodiak, AK.

Effective Dates: May 14 to June 11, 2001 for F/V Kariel.

Study Area: The study area will be in the Central Gulf of Alaska within 150 miles of Kodiak Island.

This LOA is separate and distinct from any permit required by any other applicable law. In order to facilitate identification of your activities as scientific research, you should carry a copy of your scientific research plan and this LOA on board the research vessel while conducting scientific research activities. Generally, activities conducted in accordance with a scientific research plan as acknowledged by a LOA are presumed to be scientific research. This presumption may be overcome if it can be shown that an activity does not fit the definition of scientific research activity or is outside the scope of your scientific research plan.

It is anticipated that the research catch taken will be approximately 71 tons consisting primarily of sablefish, Pacific halibut, grenadiers, thornyhead rockfish, shortraker and roughey rockfish, arrowtooth flounder and other groundfish. All Pacific halibut will be returned to the sea after sampling and measurements have been taken. The chief scientists and vessel captain must

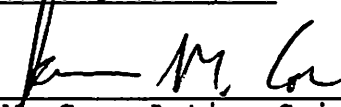

identify all fish retained and processed during the research operations such that the research catch can easily be identified upon any vessel inspection. Since research catch does not come under the authority of Gulf of Alaska Groundfish Fishery Management Plan, it is not to be counted towards its commercial catch. I recommend that the Captain and the Chief Scientist document in writing the quantity of fish product retained on board during the period of the scientific research operations.

We request that you provide a copy of any cruise report or other publication created as a result of the cruise, including the amount, composition, and disposition of your catch, to:

Mr. James M. Coe
Acting Science and Research Director
Alaska Fisheries Science Center
7600 Sand Point Way N. E., Bldg. 4
Seattle, WA 98115

For information regarding this LOA, Dr. Gary Stauffer or Mr. Russell Nelson will serve as our Coordinators for Cooperative Research. If need arises, they can be reached at the office (206) 526-4170; by FAX (206) 526-6723; at their respective homes, (425) 776-9470 and (425) 868-2144; or by e-mail at gary.stauffer@noaa.gov or russ.nelson@noaa.gov.

James M. Coe, Acting Science and
Research Director

N.P.F.M.C

Dear Chairman Benton,

I was pleased to have the opportunity to meet you at the last Council meeting. I have spoken with Chris Oliver and was informed that the decision to fill the AP seat will be made at the June Council meeting. With the June meeting fast approaching, I would like to take this time to reaffirm my interest in being appointed to the Observer seat on the Advisory Panel.

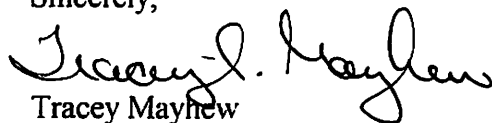

I believe that the observer seat on the Advisory Panel needs to be an integral part of the Management Council proceedings. In almost every topic discussed, observer issues come up in some form. It is important to have someone present who can respond and provide input regarding these issues. Observers also have direct contact with a great many vessel Captains and vessel types, I do not believe the observer seat represents Captains but can definitely provide insight.

I am interested in serving in this position because I believe observers provide essential information and insight to make sound management decisions. I believe so strongly in this that I am willing to make the commitment to attend the meetings, to be well informed of the issues and to participate fully. As an active observer it can be difficult to make these commitments due to the nature of observer work. I have the full support of my contractor, Data Contractors Inc., to ensure that, barring acts of God; I will be able to attend. I have not been involved with Council issues for many years, so I have a learning curve. Kim Dietrich has offered to help me get up to speed on council issues; there are also many other resources available to me to help with this process. Over the years I have worked in many different fisheries on many different vessel types. I have a broad base of knowledge to bring to the Advisory Panel.

I hope I have been able to successfully sell myself to you with my experience and willingness. If not I urge you to keep looking for someone to fill the observer seat. As I stated earlier, the seat is an integral part of making good management decisions and it is my hope that the seat will not be taken away.

It would be great if we can talk prior to the June meetings. I saw firsthand how busy you are during the meetings. Please feel free to contact me through my contractor at (907) 561-2210 or by email at: mayhewinak@yahoo.com. I look forward to hearing from you.

Sincerely,

Tracey Mayhew

To whom it may concern:

This is written in reference to Miss Tracey Mayhew.

I am a recent North Pacific Groundfish Observer graduate from the Observer Training Center in Anchorage Alaska, and have been Observing out in the Gulf of Alaska, Aleutian Islands and the Bearing Sea. I have had the pleasure to know Tracey Mayhew for the past 3 months after arriving in Alaska from Australia to conduct work as a Groundfish Observer for the National Marine Fisheries Service.

It has been a pleasure to get to know Tracey as a fellow work colleague for Data Contractors Inc. I have found her to be a very friendly, cheerful, outgoing and conscientious individual. As a work colleague she has helped assist me into my new living environment and work position, through which I have found her to be an extremely honest, caring and dedicated and determined young woman who is very intelligent and highly motivated, and is always willing to help out people in need. Nothing is too much effort or trouble for her. For these reasons I believe Tracey has the necessary qualities and desire to be accepted as an Observer representative to the AP. Specifically as she is truly concerned for fellow Observer workers, the issues they face the well being of the Observer program and the industry. For these reasons I believe Tracey would be an ideal candidate to represent Observers as an individual group of government employees. I understand Tracey has a firm grasp of political process workings and knows how to get things done within that type of forum.

As an Observer herself, Tracey is extremely well known, liked and is a highly respected individual, who has a great deal of experience and knowledge in this field of work, and she possesses a good understanding of what this position entails. Therefore I have no hesitation in recommending her to be a representative on the Advisory Panel. If you have any further questions or queries please contact me at the above address.

Yours Sincerely

Aaron Mibus
NMFS Groundfish Observer

Mr. David Benton, Chairman
North Pacific Fishery Management Council
605 West 4th Avenue, Ste. 306
Anchorage, AK 99501-2252

RECEIVED
MAY 31 2001
N.P.F.M.C.

Dear Chairman Benton,

I am writing to inform you of my resignation from the North Pacific Fishery Management Council's Advisory Panel. This resignation will be effective as of June 15, 2001. I will be representing Groundfish Forum at the upcoming AP and Council meetings in Kodiak.

I have recently accepted an offer of employment with Premier Pacific Seafoods and will no longer be able to represent the interests of the H&G sector. My employment with Premier Pacific begins in early July. I recommend that Teresa Kandianis be appointed as my replacement for the remainder of 2001.

I sincerely appreciate the opportunity to represent Groundfish Forum and the H&G sector on the AP and regret any disruption that my departure from the panel creates.

Please don't hesitate to call me if you have any questions. I look forward to seeing you in Kodiak.

Sincerely,

John Henderschedt
