Alaska Fisheries Science Center Report of the November 2017 Joint Groundfish Plan Team meeting

> Grant Thompson Jim Ianelli Dana Hanselman Diana Stram Jim Armstrong

December 8, 2017

Meeting overview

- Dates: November 13-14
- Place: AFSC Seattle lab
- Leaders: Dana Hanselman (BSAI co-chair), Grant Thompson (BSAI co-chair), Diana Stram (BSAI coordinator), Jon Heifetz (GOA co-chair), Jim Ianelli (GOA co-chair), Jim Armstrong (GOA coordinator)
- Participation: 24 Team members present, plus numerous AFSC and AKRO staff and members of the public

Revised Stock Assessment Schedule

Based on consideration of stock prioritization including assessment methods and data availability, some stocks are assessed on an annual basis while others are assessed less frequently. The following table provides an overview of the level of assessment presented in this year's SAFE report, the Tier level and schedule, as well as the year of the next full assessment by stock.

Assessment analysis planning

Analyses, suggested for change in assessment cycle:

- 1. OFL-to-ABC buffers
- 2. Costs and benefits of changes in target frequency
- 3. A more quantitative evaluation risks to GOA flatfish stocks

Reviewed history of changes to assessment cycles

2004 (14 assessments in GOA)

2005 (9 assessments in BSAI)

2012 (3 BSAI assessments)

2017 13 assessments (5 BSAI, 7 GOA, 1 both)

Criteria: low catch/ABC ratio, stable, no conservation concern

Analysis: national prioritization protocol underwent multiple rounds of review, all authors completed extensive questionnaire, discussion paper, 2 day Joint Team meeting

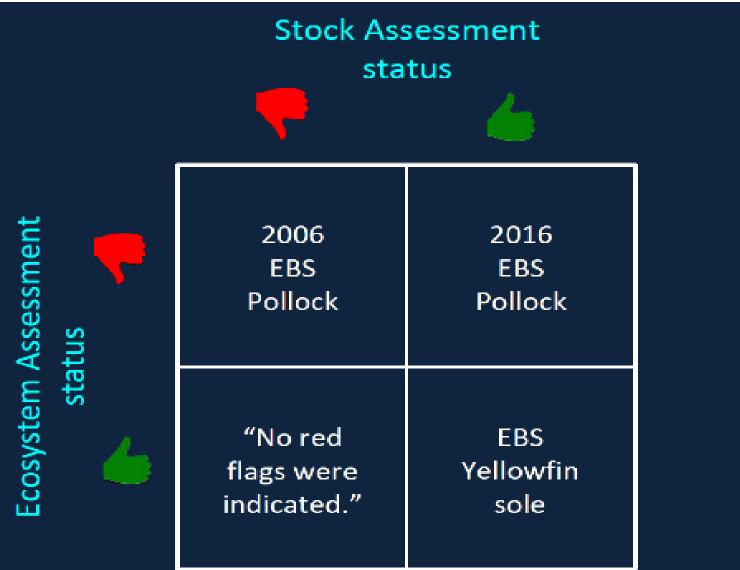

Assessment analysis planning

- Request clarification from the SSC regarding the scope of the three analyses requested
- Recommend a workshop with Groundfish Plan Teams, the Social Science Planning Team, the SSC, and authors to discuss costs and benefits of different assessment frequencies and other analyses

SSC request regarding indications of an impending stock decline

- 1. "The SSC recommends that, for those sets of environmental and fisheries observations that support the inference of an impending severe decline in stock biomass, the issue of concern be brought to the SSC, with an integrated analysis of the indices involved."
 - "To be of greatest value, to the extent possible this information should be presented at the October Council meeting so that there is sufficient time for the Plan Teams and industry to react to the possible reduction in fishing opportunity."
- 2. "The SSC also recommends explicit consideration and documentation of ecosystem and stock assessment status for each stock, perhaps following the framework suggested below, during the December Council meeting to aid in identifying areas of concern."

SSC request regarding indications of an impending stock decline

Some questions regarding task #1:

- Who
 - will make the determination that...observations "support the inference of an impending severe decline in stock biomass?"
- What form should the "integrated analysis" take?
- Who should conduct the integrated analysis?

SSC request regarding indications of an impending stock decline

- Discussion on this topic included the feasibility/need to connect individual assessments to the ecosystem information in the ESRs
- Recommend a workgroup (in conjunction with FEP team) that will develop a process for responding to the SSC recommendation including addressing the questions and issues identified in these minutes
