Realized harvest rates

Summary

- Coastwide stock trends are relatively stable
 - Very different trends among areas
- 2015 Adopted catch limits are projected to result in a slightly lower level of fishing intensity than was realized in 2014.

2015 Catch Limit Advice and Decisions

(Million pounds, net wt.)

Regulatory Area	2014 Catch Limit	Blue Line	Conference Board	Processors Advisory Group	IPHC Approved
2A ¹	0.960	0.75	0.960	0.960	0.970

Total	27.515	25.210	29.563	29.673	29.223

¹ Combined sport and commercial allocation (2A includes tribal)

² Includes commercial and recreational charter Catch Sharing Plan

³ Allocation for combined Areas 4C, 4D, 4E

⁴ NPFMC Plan: 4C , 4D: 46.43% of 80K less than 4CDE quota, 4E: 7.14% + 80K

80K implemented if at or above 1.675

Adopted Regulations

Fishing periods and catch sharing

- Commission adopted **March 14 - November 7** for quota share fisheries
- **Area 2A** commercial and treaty Indian fisheries also fall within **March 14 – November 7** period
- In **Area 2A**, a series of 10-h periods for the directed fishery starting June 24, at two-week intervals
- Adopted Management Councils' catch sharing plans for **Areas 2A, 2C, 3A, and 4CDE**
- Endorsed DFO commercial:sport allocation plan for **Area 2B**

Adopted Regulations

Areas 2C and 3A Charter Management Measures

- **For Area 2C:** One-fish daily limit of size ≤ 42 in. or ≥ 80 in., head-on.
- **For Area 3A:** Two-fish daily limit with one fish ≤ 29 in.; and an annual limit of five fish. Each vessel restricted to one trip per calendar day. Chartering fishing prohibited on Thursdays from June 15 – August 31.

Adopted Regulations

Areas 2C and 3A Charter Fishing Regulations

- Guided sport fishing definition changed so that the guide does not need to be onboard a vessel. Guided sport fishing is with assistance from a compensated guide; regulation is now coherent with NMFS and ADF&G regulations.

Adopted Regulations

Areas 2C and 3A Charter Fishing Regulations

- NMFS regulations will require that the carcass of a fish that is filleted on board the vessel must be retained on board until all the fillets are offloaded. IPHC regulations therefore do not need to retain this stipulation.
- Clarify that charter vessel guide is responsible for angler actions, whether on the same vessel or not.
- All retained halibut required to be retained on the vessel on which they were caught until the end of the chartered fishing trip.

Adopted Regulations

Authorized officer definition

- California Fish and Wildlife officers have been added as authorized officers to enforce IPHC regulations

Bycatch Mortality in the Bering Sea

- The Commission received presentations from five Alaska groundfish harvesting organizations. Two organizations provided testimony identifying specific reductions that they believe could be achieved from their fleets, although recognizing that achieving them would be difficult.
- Part of these reductions would be achieved through an EFP, currently being reviewed by NMFS, permitting deck sorting.
- IPHC also received a letter from NMFS Assistant Administrator Eileen Sobeck, urging approval of higher catch limits in Area 4CDE, and indicating a commitment to reduce BSAI bycatch mortality.

Directions to Staff

- The Commission reviewed a staff paper on changing the minimum size limit (MSL) in the commercial fishery. Noting considerable uncertainty surrounding the potential results of lowering the MSL, the Commission directed the staff to continue its investigation of this issue within the Management Strategy Evaluation.

Future Meetings

- **2015 IPHC Interim Meeting:** Seattle WA
December 1-2, 2015
- **2016 IPHC Annual Meeting:** Juneau
AK January 25-29, 2016
- **2017 Annual Meeting:** Victoria BC
January 23-27, 2017
