

**E1 Staff Tasking Council Motion**  
**April 8, 2019**

The Council requests that NMFS review reporting time limits for trawl catcher/processors as the current regulations found at 50 C.F.R. 679.5(c)(4)(ii)(B) are unclear. The Council recommends that regulations clarify that trawl catcher/processors must designate management program and/or CDQ group within 2 hours after completion of weighing all catch in the haul.
