

1. Management performance:

Overfishing did not occur during 2013/14 because the estimated total catch did not exceed the Tier 5 overfishing limit (OFL) of 12.54-million lb (5.69 kt). The total catch did not exceed the ABC established for 2013/14 (11.28-million lb, or 5.12 kt). The OFL and ABC values for 2014/15 in the table below are the values recommended by the SSC in June 2014. The 2014/15 TAC was established by ADF&G on 15 July 2014. The TACs for 2013/14 and 2014/15 in the table below do not include landings towards a cost-recovery fishing goal of \$300,000 to cover costs of observer deployments in the fishery; the catch totals for 2013/14 do include the catch towards the 2013/14 cost-recovery fishery.

a. Includes deadloss.

b. Catch (number of crab) per pot lift.

c. Average weight (lb) of landed crab, including deadloss.

d. Managed with 6.5" CW minimum size limit.

e. Managed with 6.5" CW minimum size limit west of 171° W longitude and 6.0" minimum size limit east of 171° W longitude.

f. Managed with 6.0" minimum size limit.

g. Catch and effort data includes cost-recovery fishery.
