3.5	Quota Share held by Community	11
4	Preparers and Person Consulted	15

1 Introduction

Information regarding the background, history and administration for the Pacific halibut and Sablefish Individual Fishing Quota (IFQ) Program is available on the NOAA Fisheries Alaska Region website at <https://www.fisheries.noaa.gov/alaska/sustainable-fisheries/pacific-halibut-and-sablefish-individual-fishing-quota-ifq-program>.

1.1 IFQ Regulatory Changes

A complete list of regulatory amendments modifying the IFQ Program is available on NOAA Fisheries Alaska Region website at: <https://www.fisheries.noaa.gov/action/individual-fishing-quota-ifq-program-alaska-federal-register-rules-and-notices-2004-present> . Rules affecting the IFQ Program that became effective in 2021 are summarized below.

Halibut Annual Management Measures: Effective February 18, 2021, the Assistant Administrator for Fisheries, NOAA, on behalf of the International Pacific Halibut Commission (IPHC), published as regulations the 2021 annual management measures governing the Pacific halibut fishery that have been recommended by the IPHC and accepted by the Secretary of State (86 FR 13475, March 9, 2021)¹. The IPHC considered advice from the IPHC's two advisory boards when selecting opening and closing dates for the halibut fishery. The opening date for all IPHC regulatory areas was March 6, 2021, and the closing date for the halibut fisheries in all regulatory areas was December 7, 2021.

Temporary Rule: IFQ/CDQ Sablefish Opening. Effective March 6, 2021, NOAA Fisheries announced the opening of directed fishing for sablefish with fixed gear managed under the IFQ Program and the Community Development Quota (CDQ) Program (86 FR 13493, 03/09/2021)². The season opened at 1200 hours, Alaska local time (A.l.t.), March 6, 2021, and closed at 1200 hours, A.l.t., December 7, 2021.

Emergency Rule: Temporary Transfers. Effective March 30, 2021, NMFS issued this temporary emergency rule to modify the temporary transfer provision of the IFQ Program for the fixed-gear commercial Pacific halibut and sablefish fisheries for the 2021 IFQ fishing year (86 FR 16542,

¹ <https://www.federalregister.gov/documents/2021/03/09/2021-04821/pacific-halibut-fisheries-catch-sharing-plan>.

² <https://www.federalregister.gov/documents/2021/03/09/2021-04840/fisheries-of-the-exclusive-economic-zone-off-alaska-sablefish-managed-under-the-individual-fishing>.

03/30/2021)³. This emergency rule was intended to provide flexibility to quota share (QS) holders in 2021, while preserving the Program's long-standing objective of maintaining an owner-operated IFQ fishery in future years, and did not modify other provisions of the IFQ Program.

Final Rule: Vessel Use Caps. Effective May 26, 2021, NOAA Fisheries removed vessel use caps in IFQ regulatory areas 4A (Eastern Aleutian Islands), 4B (Central and Western Aleutian Islands), 4C (Central Bering Sea), and 4D (Eastern Bering Sea) for the 2021 IFQ fishing year (86 FR 28294, 05/26/2021)⁴. This action was needed to provide additional flexibility to IFQ participants in 2021 to ensure allocations of halibut IFQ can be harvested by the limited number of vessels operating in these areas.

Final Rule: Sablefish Pot Gear Tags and Notary Certification Requirements. Effective December 13, 2021, NOAA Fisheries issued regulations to modify recordkeeping and reporting requirements by removing pot gear tag requirements in the sablefish IFQ fishery in the Gulf of Alaska (GOA) and removing requirements to obtain and submit a notary certification on various programs' application forms (86 FR 70751, 12/13/2021)⁵. This action was intended to reduce administrative burden on the regulated fishing industry and NOAA Fisheries.

1.2 Contacts

For information or questions about regulations and the rulemaking process, please contact the Sustainable Fisheries Division at 907-586-7228

For questions about permits or transfer applications, please contact Restricted Access Management Program (RAM) at (800) 304-846 option #2 or (907) 586-7474 or by email at RAM.Alaska@noaa.gov.

2 IFQ Harvest

2.1 Allocations and landings for halibut

The following table represents the harvest of halibut IFQ and sablefish IFQ as a portion of the total allowable catch (TAC) by the percent harvest for 2017 to 2021. The number of vessels and the number of permits active are also represented. The number of vessels and permits active both show a decreasing trend for halibut while the percent harvested has varied by area, year and species over time. 4E is not listed as the quota in that area is attributed to CDQ.

2.2 Allocations and landings for sablefish

The following table represents the harvest of sablefish IFQ as a portion of the total allowable catch (TAC) by the percent harvest for 2017 to 2021. The number of vessels and the number of permits active are also represented. The number of vessels and permits active both showed a decreasing trend for until 2021 however the 2021 level is still below the 2019 level.

Table 2-2. Sablefish IFQ TAC and Landings

2.3 Hired Skipper Activity

The below tables represent the number of hired skippers (HS) and the landings by hired skippers compared to the total number of landings and persons delivering quota that is eligible to be harvested by a hired skipper. The amounts are held by individuals that are fishable by a hired skipper in the vessel category B, C or D. There is a general trend of increasing percentage of hired skipper activity.

Table 2-3. Halibut IFQ Fishable by Hired Skipper (HS)

	Landings	Landings by HS	%Fished by HS	Persons Delivering	HM Delivering

2.4 Registered Buyers and Landings

The number of registered buyers and the number of active buyers is presented in the below table for 2017-2021 with the amount of each species purchased. Registered buyers are able to hold multiple permits however multiple permits are not listed on the bought IFQ potentially causing some of the difference

between registered buyers and active buyers. In 2021 there were little change compared to 2020. There is a general downward trend in the number of active buyers. Shoreplants make up the majority of purchases however, the portion does appear to be decreasing.

Table 2-6. Registered IFQ Buyers

3 Program by the Numbers

3.1 Quota Shares held by Initial Issues

The participation of initial issues compared to total participation is presented in the below tables from 2017-2021. The decreasing trend of participation is seen throughout the time period.

Table 3-1. Halibut IFQ Initial Issues

Area	Active Initial Issues	Total Persons	Initial Issues QS	Total QS
2021	977	2,286	118,026,842	331,556,698

3.2 Medical Transfers

The below table is the total number of medical lease transactions by species and year. The number of persons transferring quota share out and receiving quota share in is also shown. The time series shows an increasing trend in all categories with a sharp decrease in 2021.

Table 3-3. Medical Lease Transactions

	Transfers	QS Transferred	Persons Transferring	Persons Receiving
Halibut	1,202	6,022,207	819	559
2021	74	396,271	57	45
2020	413	2,133,048	292	166
2019	262	1,324,546	175	125
2018	236	1,103,787	162	122
2017	217	1,064,555	133	101
Sablefish	514	8,134,823	352	279
2021	28	879,074	21	19
2020	166	2,996,102	115	79
2019	121	1,636,863	83	65
2018	111	1,649,895	75	65
2017	88	972,889	58	51

Source: NMFS Restricted Access Management (RAM) division sourced through AKFIN

3.3 Non-Medical Temporary Transfers

Non-medical lease transactions including transfers under an emergency rule are included in the below table by species and year. The number of persons transferring quota share out and receiving quota share in is also shown. The time series shows a stable trend from 2017-2019 and a sharp increase in 2020 and 2021.

Table 3-4. Non-Medical Lease Transactions

	Transfers	QS Transferred	Persons Transferring	Persons Receiving
--	-----------	----------------	----------------------	-------------------

Halibut				
2021	905	4,815,906	608	311
2020	464	1,986,097	322	200

2018	28	626,216	18	18
2017	29	488,454	19	17

Source: NMFS Restricted Access Management (RAM) division sourced through AKFIN

3.4 Community Quota Entity Activity

The amount of CQE IFQ landings for all areas is shown in the table below. In order to avoid confidentiality concerns sablefish and halibut are listed together. The landings that are derived from CQE peaked in 2018 but appears to be highly variable.

Table 3-4. CQE Derived Landings by Year

Year	Landings
2021	165,404
2020	86,747
2019	139,922
2018	250,264
2017	80,381

Source: NMFS Restricted Access Management (RAM) division sourced through AKFIN

3.5 Quota Share held by Community

The following table represents the quota share (QS) owned by community for 2017 to 2022. Communities with less than three QS holders are shown grouped under the (blank) category

Table 3-5. Community of Halibut IFQ QS holder by Amount of QS
