DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration (NOAA)

50 CFR Parts 672 and 675

[Docket No.]

RIN 0648-

Groundfish Fishery of the Gulf of Alaska, and Groundfish Fishery of the Bering Sea and Aleutian Islands Area.

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Proposed rule; request for comments.

SUMMARY: NOAA proposes regulations to implement proposed Amendment 27 to the Fisheries Management Plan for Groundfish of the Gulf of Alaska (GOA) and proposed Amendment 22 to the FMP for the Groundfish Fishery of the Bering Sea and Aleutian Islands (BSAI) area. These regulations would establish two trawl test areas in the GOA and one trawl test area in the BSAI area for pelagic and bottom trawl fishermen to test their trawl fishing gear. These areas would be available when the GOA or BSAI would otherwise be closed to trawling. This action is necessary to allow these vessels the opportunity to test their trawl gear in preparation for the opening of the fishing seasons, and is intended to promote the goals and objectives of the North Pacific Fishery Management Council (Council) with respect to groundfish management off Alaska.

DATE: Comments are invited until [insert date 45 days after date of filing for public inspection by the office of the Federal Register].

ADDRESS: Comments may be sent to Ronald J. Berg, Chief, Fisheries Management Division, Alaska Region, National Marine Fisheries Service, P.O. Box 21668, Juneau, AK 99802. Individual copies of proposed Amendments 22 and 27 and the environmental assessment/regulatory impact review/initial regulatory flexibility analysis (EA/RIR/IRFA) may be obtained from the Council, P.O. Box 103136, Anchorage, AK 99510. Comments on the environmental assessment are particularly requested.

FOR FURTHER INFORMATION CONTACT: David C. Ham (Fisheries Management Biologist, NMFS), 907-586-7229.

SUPPLEMENTARY INFORMATION:

Background

The domestic and foreign groundfish fisheries in the exclusive economic zone of the GOA and BSAI are managed by the Secretary of Commerce (Secretary) under the FMP for Groundfish of the GOA and the FMP for the Groundfish of the BSAI area. These FMPs were prepared by the Council under the Magnuson Fishery Conservation and Management Act (Magnuson Act) and are implemented by regulations for the foreign fishery at 50 CFR part

611 and for the U.S. fishery at 50 CFR parts 672 and 675, respectively. General regulations that also pertain to the U.S. fishery are implemented at 50 CFR part 620.

At times, amendments to the FMPs and/or their implementing regulations are necessary to resolve problems pertaining to management of the groundfish fisheries. This proposed rule would implement Amendment 27 to the FMP for Groundfish of the GOA and Amendment 22 to the FMP for the Groundfish of the BSAI area. These amendments would establish three specific areas for trawl vessels to test their fishing gear before the fishing season opens, when trawling would otherwise be prohibited in that management area. These FMP amendments were recommended to the Secretary by the Council at its January 13-18, 1992, meeting.

The following are reasons for, and a description of, this proposed rule.

Until recently, the GOA and BSAI have been open to trawling for most of the year, and fishermen were able to test trawl gear in preparation for a season opening. However, in 1992, new regulations (57 FR 382, January 6, 1992) delayed the opening of the trawl season in the GOA and BSAI from January 1 until January 20. A similar delay of the GOA and BSAI trawl fisheries until January 20 is in effect for 1993 and beyond [insert FR reference and publication date of final rule for FMP amendment 19/24], to

reduce bycatch rates of chinook salmon and Pacific halibut. Therefore, from January 1 until January 20 of each year, trawl gear may not be deployed in the GOA and BSAI, and fishermen will be unable to test their trawl gear before the trawl season opening.

Fishing with trawl gear is also prohibited at other times of the year in the GOA. If a quarterly allocation of halibut bycatch for trawl gear is taken, non-pelagic trawling is prohibited for the remainder of that quarter. This would prohibit fishermen from testing their bottom trawl gear before the next bottom trawling season begins.

There are several reasons why fishermen need to test trawl gear before season openings. Fisheries are closing earlier because increasingly large fleets are harvesting the TAC more quickly. The establishment of trawl test areas would enable fishermen to test their gear and begin fishing efficiently at the beginning of a season, reducing lost fishing time that might result from gear problems. In a similar trawl test program, Washington state allows vessels to use state waters in Puget Sound for trawl gear testing.

The proposed Amendments 27 and 22 provide the Secretary with the authority to establish gear test areas, with no specific reference to a particular gear type. With this authority, the

Secretary could implement any future gear test areas for any gear type by regulatory amendment, without amending the FMP. The proposed Amendments also include the following five criteria with which any gear test area must comply. These criteria were taken from the Council's motion on trawl test areas at the January, 1992, Council meeting.

1. Depth and bottom type must be suitable for testing the particular gear type.
2. Must be outside State waters.
3. Must be in areas not normally closed to fishing with that gear type.
4. Must be in areas that are not usually fished heavily by that gear type.
5. Must not be within a designated Steller sea lion protection area at any time of the year.

This proposed rule would establish three trawl test areas (see Figure 1) bounded by straight lines connecting the following coordinates in the order listed:

| Gulf of Alaska - Kodiak | W. longitude | N. latitude |
|-----------------------------|--------------|-------------|
| | 152° 02' | 57° 37' |
| | 151° 25' | 57° 37' |
| | 151° 25' | 57° 23' |
| | 152° 02' | 57° 23' |
| | 152° 02' | 57° 37' |
| Gulf of Alaska - Sand Point | W. longitude | N. latitude |
| | 161° 00' | 54° 50' |
| | 160° 30' | 54° 50' |
| | 160° 30' | 54° 35' |
| | 161° 00' | 54° 35' |
| | 161° 00' | 54° 50' |

| Bering Sea | W. longitude | N. latitude |
|------------|--------------|-------------|
| | 167° 00' | 55° 00' |
| | 166° 00' | 55° 00' |
| | 166° 00' | 54° 40' |
| | 167° 00' | 54° 40' |
| | 167° 00' | 55° 00' |

Trawl gear may be tested in the areas at times when trawling would otherwise be prohibited in those management areas under the following conditions:

- 1) The codend shall be left unzipped so that the trawl gear will not retain fish.
- 2) Groundfish may not be on board.
- 3) The time vessels spend trawl gear testing in these three areas will not contribute towards observer coverage requirements, and the placement of observers on board these vessels will be at the discretion of the Regional Director.

Criteria for Gear Test Areas

The Council's motion on test areas at the January, 1992, Council meeting listed five criteria with which test areas should comply. The following explains how the three proposed trawl test areas comply with the criteria:

- 1) Depth and bottom type must be suitable for testing pelagic and bottom trawl nets.

The Kodiak area has depths ranging from approximately 30-80 fathoms, the Sand Point area from 50-65 fathoms, and the Bering Sea area from 70-160 fathoms. These depths are suitable for bottom and pelagic trawling, and the bottom

type is suitable for bottom trawling. Therefore, these test areas should be acceptable testing grounds for bottom and pelagic trawl gear. Each of these trawl test areas was chosen with the advice and assistance of trawl industry representatives.

2) Be outside Alaska state waters.

All of the trawl test areas are outside state waters.

3) Be in areas that are not usually heavily fished by trawling.

None of the three test areas is known to be an area of high trawl catch for groundfish.

4) Be in areas not normally closed to trawling.

None of the trawl test areas is in an area that is normally closed to trawling at any time of the year. However, the Bering Sea test area is entirely within the summer Herring Savings Area 2 (HSA 2). Herring Savings Area 2 regulations require that the attainment of a trawl bycatch allowance for herring would close the HSA 2 for the period from July 1 to August 15. The NMFS believes that the Bering Sea test area would be required only from January 1 to January 20 before the trawl season opens. Because trawl bycatch amounts of herring are insignificant in the HSA 2 during January, conflicts should not result from having a trawl test area in HSA 2.

- 5) The trawl test area must not be within a designated Steller sea lion protection area at any time of the year.

None of the three test areas is within a designated Steller sea lion protection area at any time of the year.

At the January, 1992, Council meeting, the Council's Science and Statistical Committee (SSC) and Advisory Panel (AP) recommended that several issues of concern be addressed before this proposed FMP amendment is published in the Federal Register. The following are responses to the SSC and AP's concerns about the implementation of these trawl test areas:

- 1) Species to be encountered in trawl test areas.

From the GOA and BSAI Stock Assessment and Fishery Evaluation Reports for 1992, the species that are likely to be encountered in these test areas are:

Kodiak and Sand Point Areas - walleye pollock, Pacific cod, flatfish, sablefish, rockfish, halibut, salmon, crab and other species.

Bering Sea Area - walleye pollock, Pacific cod, halibut, greenland turbot, arrowtooth flounder, sablefish, pacific ocean perch, atka mackerel, and small amounts of rock sole, other flatfish, squid, and other species.

2) Accessibility of these areas to fishermen.

Vessels fishing in the Gulf of Alaska could use the Kodiak and Sand Point test areas. Vessels fishing in the Bering Sea are primarily based in Dutch Harbor and Akutan, making the Bering Sea test area most convenient for them. These test areas have been positioned to provide the best access to a test area by the majority of trawl vessels, and were chosen with input and consultation with the trawl fishing industry.

3) The trawl test area should not be larger than is necessary to test the gear.

Kodiak Area - The approximate size for this area is 14 nautical miles (nm) by 18 nm, or 252 square nm. This is approximately the minimum size needed for a test area to allow vessels enough straight line distance and room to maneuver. For example, if a vessel is moving through a test area, and begins gear testing at a normal trawling speed of 3-4 knots, the vessel could move in the same direction for about four hours. This should be enough time to solve most gear problems. Also, making the area nearly square provides room for vessels to use the test area without interfering with each other. This is important because vessels working on gear problems are less able to maneuver.

Sand Point Area - This area is approximately 15 nm by 15 nm, or 225 square nm, about the same size as the Kodiak area.

Bering Sea Area - This area is approximately 20 nm by 30 nm, or 600 square nm. This area is larger than the other two areas, because vessels that operate in the BSAI are larger. These larger vessels tow larger nets and are less capable of maneuvering because of their size. These factors contribute towards the need for a larger area in the BSAI.

- 4) Enforcement requirements for trawl test areas. Check in/check out or notification of trawl test area use may be required in the future in order to aid enforcement.

- 5) Trawl testing and crab opening conflicts.

Crab fishing with pot gear or halibut fishing with hook and line gear are classified as a stationary gear. Sometimes, moveable gear such as trawl gear can conflict with stationary gear if both gear types are using the same fishing areas. If pot or hook and line gear is especially abundant, for example on a season opening, it may be difficult for trawlers to avoid the fixed gear, resulting in conflict between fishermen using fixed and movable gear types.

For 1991, the king crab openings in all three test areas are late in the calendar year, on September 1, September 25, and/or November 1. This could result in conflicts if a third quarter halibut bycatch closure prompted heavy use of the GOA trawl test areas.

For 1991, the Tanner crab opening for all three areas occurred on November 15. Trawl testing would be required from January 1 to January 20 when trawling is prohibited in the GOA and BSAI. Therefore, heavy use of the trawl test areas could potentially conflict with the Tanner crab opening on 1/15. Conflicts are not expected to occur to a great extent in the Bering Sea or the Sand Point test areas, because few crab resources exist there. Crab resources in the Kodiak area are abundant, and the potential therefore exists for conflict. NMFS is requesting comments on this subject.

6) Trawl testing and halibut opening conflicts.

The Bering Sea test area falls within the International Pacific Halibut Commission (IPHC) fishing area 4A. For 1992, area 4A halibut fishing periods are from June 8 to June 9, from August 6 to announced closure, and from September 22 to announced closure. Trawl testing should not conflict with the halibut opening in the Bering Sea area, because the time of year that the Bering Sea trawl test area

would normally be used would be from January 1 to January 20, when fishing with trawl gear in the BSAI is prohibited.

The Sand Point test area is in the IPHC area 3B, where the 1992 halibut fishing periods will be from June 8 to June 9, from September 7 to September 8, and from October 5 to announced closure. The Gulf of Alaska is closed to trawling from January 1 to January 20, and possibly near the end of each quarter if the quarterly allocation of halibut bycatch is exhausted. Halibut openings from June 8 to June 9 and September 7 to September 8 are near the end of the second and third quarters, respectively, so it is possible that the halibut bycatch for the trawl fleet would be taken and trawling would be prohibited; resulting in use of the trawl test areas, and conflicting with the area 3B halibut opening.

The Kodiak test area is in IPHC area 3A, and has the same 1992 halibut fishing periods as the Sand Point area. The Kodiak test area, therefore, is in the same situation with regard to conflicts with halibut openings as the Sand Point area in the above paragraph.

Classification

Section 304(a)(1)(C) of the Magnuson Act, as amended by Pub. L. 99-659, requires the Secretary to publish regulations proposed

by a Council within 15 days of receipt of the FMP amendment and regulations. At this time the Secretary has not determined that the FMP amendments these regulations would implement are consistent with the national standards, other provisions of the Magnuson Act, and other applicable law. The Secretary, in making this determination, will take into account the data, views, and comments received during the comment period.

The Council prepared an environmental assessment (EA) for these FMP amendments that discusses the impact on the environment as a result of this rule. A copy of the EA may be obtained from the Council at the address above and comments on it are requested.

The Under Secretary for Oceans and Atmosphere, NOAA, determined that the proposed rule is not a "major rule" requiring a regulatory impact analysis under Executive Order 12291. The Council prepared a regulatory impact review that concludes that none of the proposed measures in this rule would cause impacts considered significant for purposes of this Executive Order. A copy of this review is available from the Council at the address listed above.

The Council prepared an initial regulatory flexibility analysis as part of the regulatory impact review which concludes that this proposed rule, if adopted, would not have significant

effects on small entities. A copy of this analysis is available from the Council at the address listed above.

NMFS has determined that none of the management measures proposed under Amendments 22 and 27 would adversely affect endangered or threatened species. Therefore, formal consultation pursuant to Section 7 of the Endangered Species Act is not required for the adoption of these FMP amendments or their implementing rules.

This proposed rule does not contain a collection of information requirement for purposes of the Paperwork Reduction Act.

The Council determined that this rule, if adopted, will be implemented in a manner that is consistent to the maximum extent practicable with the approved coastal zone management program of Alaska. This determination has been submitted for review by the responsible State agencies under section 307 of the Coastal Zone Management Act.

This proposed rule does not contain policies with federalism implications sufficient to warrant preparation of a federalism assessment under Executive Order 12612.

Note Fig. 1 will not appear in the Code of Federal Regulations

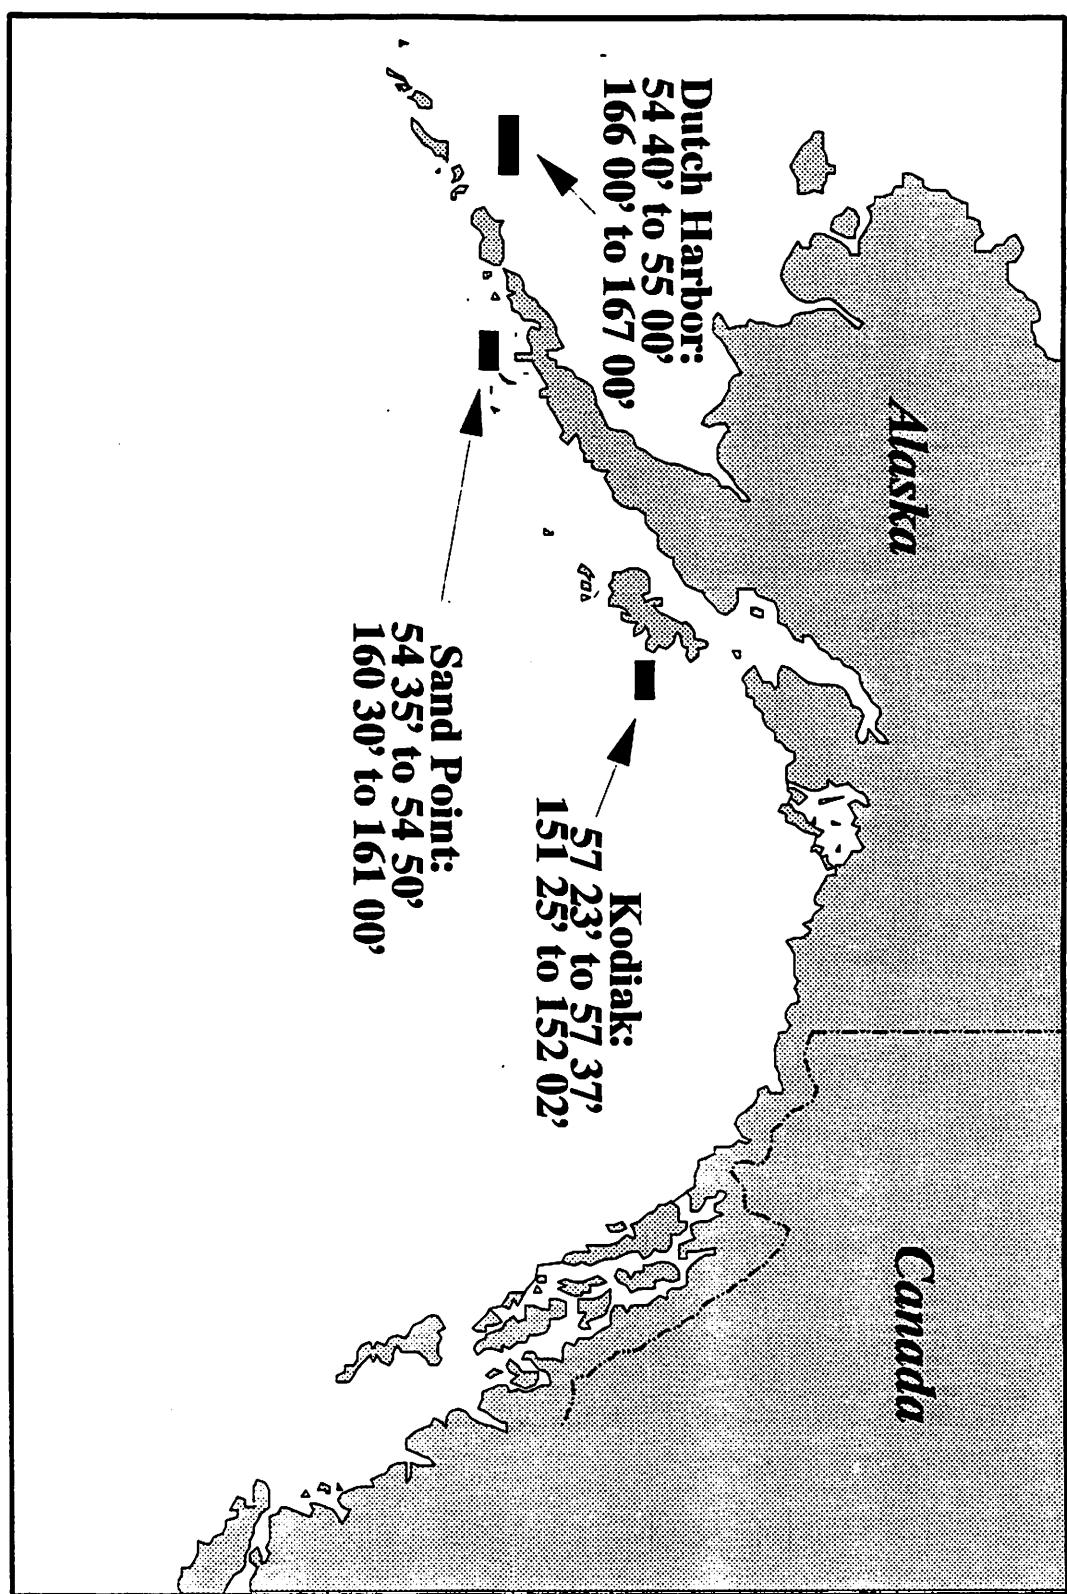

FIG 1 - LOCATION OF PROPOSED TRAWL TEST AREAS
IN THE GULF OF ALASKA AND BERING SEA

List of Subjects in 50 CFR Parts 672 and 675

Fisheries, Fishing vessels.

Dated:

Assistant Administrator for Fisheries

[Print Figure 1 here]

For the reasons set out in the preamble, 50 CFR Parts 672 and 675 are proposed to be amended as follows:

PART 672 - GROUNDFISH OF THE GULF OF ALASKA

1. The authority citation for part 672 continues to read as follows:

Authority: 16 U.S.C. 1801 et seq.

2. In § 672.24, paragraph (f) is added to read as follows:

§ 672.24 Gear Limitations

* * * * *

(f) Trawl Gear Test Areas.

(1) For the purposes of this section, "trawl gear

"testing" means deploying trawl gear in areas designated in this paragraph under the following conditions:

- (i) The cod end shall be unzipped while trawl gear testing.
- (ii) Groundfish shall not be possessed on board when trawl gear testing.
- (iii) Observers on board vessels during the time spent trawl gear testing shall not fulfill observer requirements at Section 672.27 of this part.

(2) Kodiak. Trawl gear testing is allowed in an area bounded by straight lines connecting the following coordinates in the order listed at times when fishing with trawl gear is prohibited in statistical area 63 as defined in § 672.2 of this part:

| <u>W. longitude</u> | <u>N. latitude</u> |
|---------------------|--------------------|
| 152° 02' | 57° 37' |
| 151° 25' | 57° 37' |
| 151° 25' | 57° 23' |
| 152° 02' | 57° 23' |
| 152° 02' | 57° 37' |

(3) Sand Point. Trawl gear testing is allowed in an area bounded by straight lines connecting the following coordinates in the order listed at times when fishing with trawl gear is prohibited in statistical area 61 as defined in § 672.2 of this part:

| <u>W. longitude</u> | <u>N. latitude</u> |
|---------------------|--------------------|
| 161° 00' | 54° 50' |
| 160° 30' | 54° 50' |
| 160° 30' | 54° 35' |
| 161° 00' | 54° 35' |
| 161° 00' | 54° 50' |

PART 675 - GROUNDFISH OF THE BERING SEA AND ALEUTIAN ISLANDS AREA

3. The authority citation for part 675 continues to read as follows:

Authority: 16 U.S.C. 1801 et seq.

4. In § 675.24, paragraph (g) is added to read as follows:

§ 675.24 Gear limitations.

* * * *

(g) Trawl Gear Test Areas.

(1) For the purposes of this section, "trawl gear testing" means deploying trawl gear in areas designated in this paragraph under the following conditions:

(i) The cod end shall be unzipped while trawl gear testing.

(ii) Groundfish shall not be possessed on board when trawl gear testing.

(iii) Observers on board vessels during the time spent trawl gear testing shall not fulfill observer requirements at Section 672.27 of this part.

(2) Trawl gear testing is allowed in an area bounded by straight lines connecting the following coordinates in the order listed at times when fishing with trawl gear is prohibited in the Bering Sea and Aleutian Islands Management Area as defined in § 675.2 of this part:

W. Longitude N. Latitude
167° 00' 55° 00'
166° 00' 54° 40'
166° 00' 54° 40'
166° 00' 55° 00'
167° 00' 55° 00'

Fishermen, processors find NMFS office helpful

By SUZANNE HANCOCK
Staff Writer

Fishermen and processors have found the National Marine Fisheries Service management office located at Gibson Cove is a valuable tool.

Tom Pearson has manned the office since its inception a year ago.

"I get 50 to a 100 calls a week," he said. "The bulk of the calls come from fishermen who have a need to know what's open (for fishing) at the time, how prohibited species bycatch caps will affect their fishing operation, and if a species is on bycatch status, and what are the allowable bycatch amounts that can be retained."

Pearson says the office has been helpful for fishermen as a local source of information.

Many people also want to get an idea of how to plan their fishing season. For example, they ask him how long an opening is likely to be.

Information that processors and fishermen receive from NMFS announcements or the electronic bulletin board has a large body of regulations behind the immediate information.

Pearson can give this background information when appropriate. He will also find out for fishermen how enforcement is

likely to interpret some of the more esoteric announcements.

"If a fisherman asks me 'Can I do this?' I think it's important to let them know how the enforcement office interprets that regulation," he said.

The regulations used to be published on an annual basis but now it is subject to change.

"Seasons open and close a lot more often so it's no longer possible to have all of the regulations published once a year," he said. "Fishermen need to stay a lot more current."

He said that 95 percent of the regulations, most written by lawyers, do not concern the current activities of an individual fisherman.

Using daily radio schedules with processors, fishermen learn most about what is happening from that source.

The day-to-day questions involve the status of the fisheries, he said.

Other projects Pearson has been working on include helping with recording and record keeping requirements.

"These are subject to revision annually," he said.

Often the fishermen and the processors have some good ideas on how to improve the recording and record keeping they are be-

ing asked to comply with.

"If there is something that is an excessive burden to the industry compared to the way the information is used maybe some reporting requirements can be deleted," Pearson said.

It is a good opportunity for the management office to get feedback on how well some management practices are working or not working, he said.

He said processing plants with dozens of different deliveries and gear types were required to keep logs and compile one weekly harvest report for all the deliveries made by catcher vessels.

Pearson said NMFS is grossly underfunded, but the commitment to having offices in Dutch Harbor and Kodiak was there before the offices were opened. As long as the need is there, he thinks the offices will be funded.

Pearson was an observer 10 years ago and has always had an interest in groundfish. He worked with the Alaska Department of Fish and Game in the area of salmon, herring, and groundfish.

Pearson says the magnitude of groundfish makes it a tremendous resource.

Policy making issues such as the moratorium and other regulatory procedures that are going

through the pipeline are other areas he explores in his position.

The phone number at NMFS management is 486-6919.

Engineers hold bid opening for breakwater

By JOHN PFEIFER
Staff Writer

The U.S. Army Corps of Engineers held a bid opening in Kodiak Wednesday for the first phase of construction of Kodiak's new, permanent breakwater.

The lowest bid came in almost

project and the Near Island Bridge, among other things.

Second low bidder was Construction Rigging Co. of Anchorage at \$4.06 million.

The third lowest bidder was Brechan Enterprises, Inc. of Kodiak at \$4.3 million.

- Notes: 1) Pacific Ocean Perch is *Sebastodes alutus* only.
 2) Other Red Rockfish includes shortraker, rougheye,
 Northern and sharpchin rockfishes (BERING SEA ONLY).
 3) Species groups are defined at 50 CFR 675.20(a)(1)
 4) This amount is from WPR only. Total harvest estimate,
 including observer blend estimates of discards, through
 9/17/92, is 177,193 mt
 -- retained 156,996 mt
 -- discarded 20,197 mt
 The remaining 4,807 mt in the full TAC of 182,000 mt has
 been set aside to support bycatch needs in other directed
 groundfish fisheries.

Groundfish tons is total of all allocated groundfish species harvested in the target fishery.

The KEY is composed of a target fishery, the zone (subarea), and the processing mode. Targets and modes are defined below.

1992 Groundfish Targets

| | | |
|---|--------------------------|----------|
| A | Atka Mackerel | BSAI |
| B | Pollock -- bottom* | BSAI,GOA |
| C | Pacific Cod | BSAI,GOA |
| D | Deep Water Flatfish | GOA |
| H | Shallow Water Flatfish | GOA |
| K | Rockfish | BSAI,GOA |
| O | 'Other' | BSAI,GOA |
| P | Pollock - midwater* | BSAI,GOA |
| R | Rock Sole/Other Flatfish | BSAI |
| S | Sablefish | BSAI,GOA |
| T | Greenland Turbot | BSAI |
| W | Arrowtooth Flounder | BSAI |
| Y | Yellowfin sole | BSAI |

**1992 Halibut and Chinook Salmon Bycatch by target fishery and week
in the Gulf of Alaska**

Groundfish tons is total of all allocated groundfish species harvested in the target fishery.

The KEY is composed of a target fishery, the zone (subarea), and the processing mode. Targets and modes are defined below.

1992 Groundfish Targets

| | | |
|---|--------------------------|-----------|
| A | Atka Mackerel | BSAI |
| B | Pollock -- bottom* | BSAI, GOA |
| C | Pacific Cod | BSAI, GOA |
| D | Deep Water Flatfish | GOA |
| H | Shallow Water Flatfish | GOA |
| K | Rockfish | BSAI, GOA |
| O | 'Other' | BSAI, GOA |
| P | Pollock - midwater* | BSAI, GOA |
| R | Rock Sole/Other Flatfish | BSAI |
| S | Sablefish | BSAI, GOA |
| T | Greenland Turbot | BSAI |
| W | Arrowtooth Flounder | BSAI |
| Y | Yellowfin sole | BSAI |

* Pollock targets defined by catch composition, not reported gear type.

Modes

1992 Bairdi tanner and red king crab bycatch by target fishery and week
in the Gulf of Alaska

Groundfish tons is total of all allocated groundfish species harvested in the target fishery.

The KEY is composed of a target fishery, the zone (subarea), and the processing mode. Targets and modes are defined below.

1992 Groundfish Targets

| | | |
|---|--------------------------|-----------|
| A | Atka Mackerel | BSAI |
| B | Pollock -- bottom* | BSAI, GOA |
| C | Pacific Cod | BSAI, GOA |
| D | Deep Water Flatfish | GOA |
| H | Shallow Water Flatfish | GOA |
| K | Rockfish | BSAI, GOA |
| O | 'Other' | BSAI, GOA |
| P | Pollock - midwater* | BSAI, GOA |
| R | Rock Sole/Other Flatfish | BSAI |
| S | Sablefish | BSAI, GOA |
| T | Greenland Turbot | BSAI |
| W | Arrowtooth Flounder | BSAI |
| Y | Yellowfin sole | BSAI |

* Pollock targets defined by catch composition, not reported gear type.

Modes

| | |
|---|-------------------|
| M | Mothership |
| P | Catcher/Processor |
| S | Shore Plant |

NATIONAL MARINE FISHERIES SERVICE
 Fishery Management Division
 Juneau, Alaska

NOTES:

- (i) Groundfish fisheries open except as listed
Contact ADF&G for closures in State waters and
for area 650 Demersal rockfish
- (ii) SUBAREAS: "Rookeries" = Steller sea lion rookeries
"HSA" = Herring Savings Area (50 CFR 675.2)
Zone 1 = 511,512,516; Zone 2 = 513,517,521
- More [Y,n]?
- Zone 2H = 517
- (iii) "PTR" = pelagic trawl; "NPT" = non-pelagic trawl
"TRW" = all trawls; "JIG" = jig/troll; "OTH" = all others
"ISH" = inshore sector; "OSH" = off shore sector
- (iv) SPECIES: ROCK = other rockfish; SRSN = other red rockfish
- (v) STATUS: "C" = closed; "B" = bycatch only; "P" = no retention
- (vi) CAUSE: "MM" = marine mammals; "TAC" = groundfish limitation;
"REG" = regulations; "RKC" = red king crab;
"BTCA" = Bairdi Tanner; "HLBT" = halibut; "HERR" = herring
"OF" Overfishing
- (vii) 3 nautical mile (nm) no approach zones all vessels, 3-10 nm no trawl

NOTES:

- (1) STATUS refers to all gears and reporting areas for each fishery unless otherwise noted.

OPEN = Directed fishery open as noted. Defined at 50 CFR 672.20(g), (h).
BYCATCH = Directed fishery closed.
Defined at 50 CFR 672.20(g), (h).
* Defined at 50 CFR 672.23(e).
PSC = Species must be treated in the same manner as a prohibited species. Defined at 50 CFR 672.20(c).
CLOSED = as noted

(2) Contact ADF&G 907-747-6688 (SITKA) OR 907-772-3801 (PETERSBURG)

(3) Areas around Steller sea lion rookeries and certain walrus sites closed. See regulations and news release dated January 17, 1992.

(4) Entire Gulf of Alaska is closed to directed fishing for groundfish by vessels using trawl gear (except directed fishing with pelagic trawl gear for pollock when that fishery is open) due to the third quarter Pacific halibut allocation being reached. Closure is effective through 12 noon Alaska local time, September 30, 1992.

NOTES:

- (1) STATUS refers to all gears and reporting areas for each fishery unless otherwise noted.

OPEN = Directed fishery open as noted. Defined at 50 CFR 675.20(h).

BYCATCH = Directed fishery closed. Defined at:

* 50 CFR 675.20(h) for groundfish TAC closures

** 50 CFR 675.21(c) for closures due to prohibited species catch.

PSC = Groundfish must be treated in the same manner as a prohibited species. Defined at 50 CFR 675.20(c),

CLOSED = as noted.

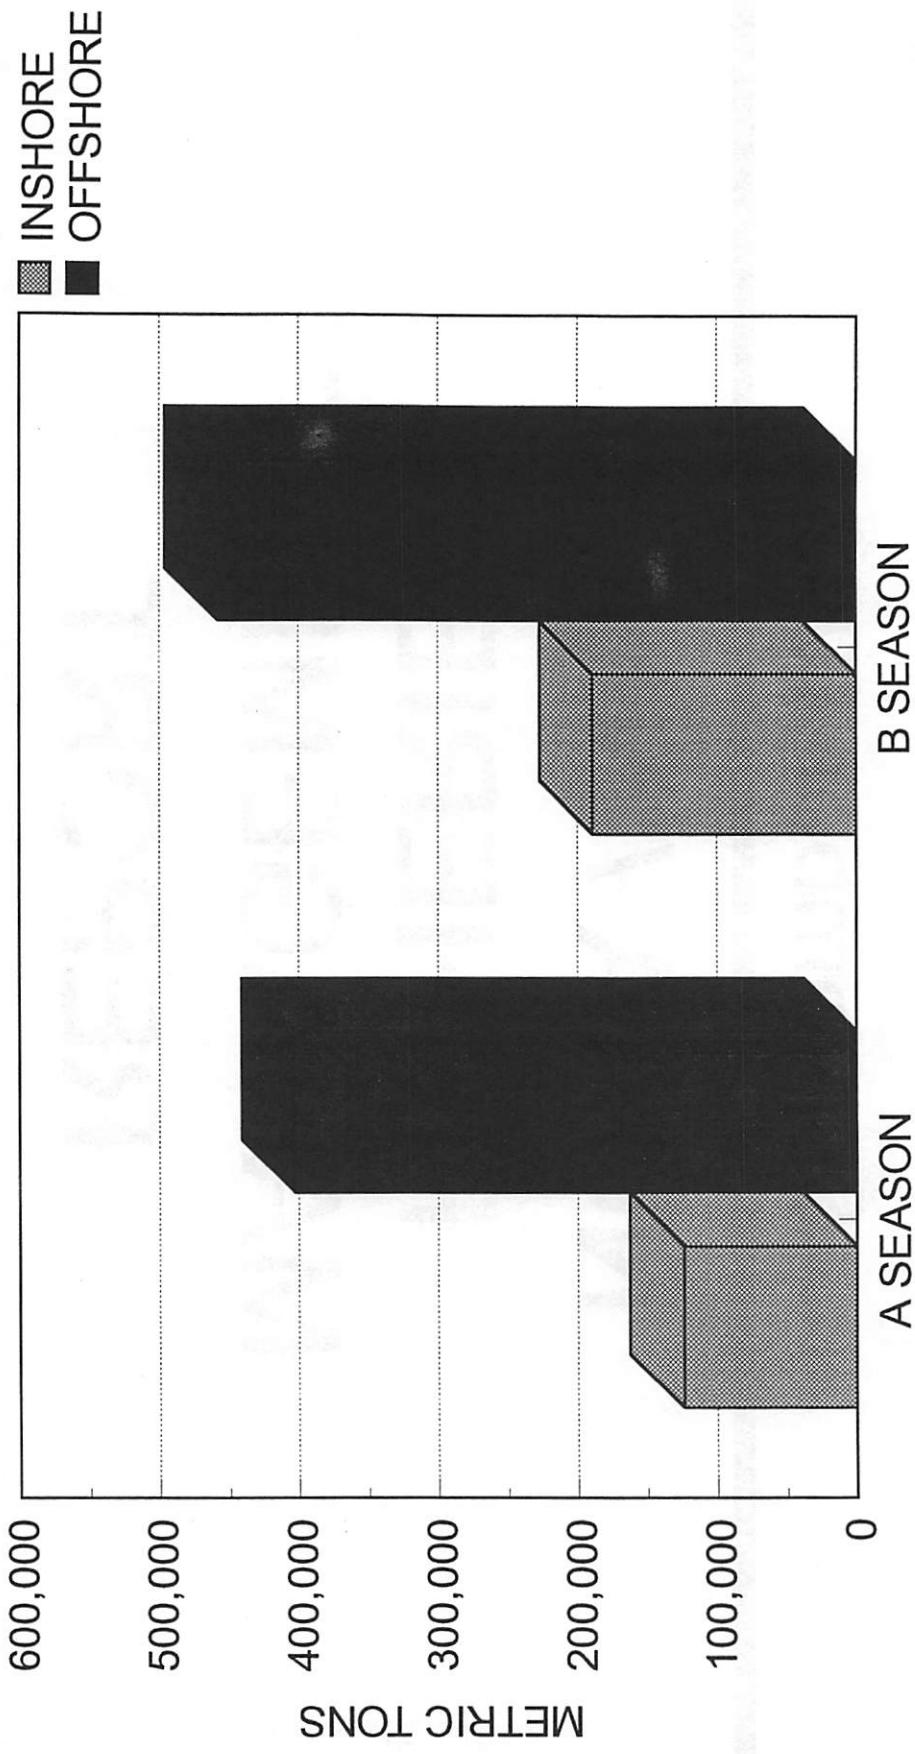

- (2) 512 closed to all trawl gear.

516 closed to all trawl gear until 06-15-92

September 1992
