

C4 EDR Revisions

- The SSC commends the analyst and, after moderate revisions, the SSC **recommends** the analysis be released for public review.
- The SSC finds the first two components of Alternative 2 are **sensible regulatory cleanup**
 - Will enhance the ability to do insightful regulatory analyses without reducing data quality, validity or reliability within standard confidentiality practices for similar data.
 - The SSC **recommends** updating status quo cost estimates to reflect recent interpretation of authorization of third party audits

C4 EDR Revisions

- The SSC finds elimination of the GOA Trawl EDR (Component 3) would eliminate a data program which has proven its utility in a number of key Council analyses.
 - The SSC **recommends** modifying the analysis to highlight the value of this information alongside its costs.
- EDR data has been central to complying with National Standard 2 in pursuit of National Standards 8 and 1.
 - Necessary for monitoring and evaluating any action, not just a catch share
 - Future actions directed at improving economic and social resilience are likely given resource changes in GOA
