

Agenda Item I-3
February, 1980

MEMORANDUM

DATE: February 5, 1980

TO: Council Members, Scientific & Statistical Committee and
Advisory Panel

FROM: Jim H. Branson, Executive Director 

SUBJECT: The Draft Limited Entry RFP

ACTION REQUIRED

None. Informational only.

BACKGROUND

The SSC has been asked to review a draft RFP for a comparative study of limited entry systems around the world. The draft RFP is a product of the last meeting of the Limited Entry Workgroup in December, 1979.

The draft RFP might have to be revised considering the availability of similar reviews (1978) and upcoming projects and studies on limited entry in Alaska.

MD

PURPOSE

The purpose of this contract is to provide a reference document which the Council can use to evaluate the advantages and disadvantages of the various limited entry systems in effect throughout the world.

PRODUCT

The contractor shall produce a document which summarizes the limited entry programs that are currently applied to major common property fisheries throughout the world. Each program summary shall address the statutory authority upon which the program is based, the system used to administer the program, and the regulations which implement the program. If comprehensive studies of a program have been completed, the summary shall cite major findings of such studies. Of particular interest in this latter respect are statistical data indicating the effect that a program has had on participation, effort, income to fishermen, license values, investment in vessels and gear, ^{affect on other fisheries,} and government revenues. If no studies of a program have been completed, the contractor shall present such data as is readily available from other sources.
