

MEMORANDUM

DATE: December 6, 1979  
TO: Council Members, Scientific & Statistical Committee and  
Advisory Panel  
FROM: Jim H. Branson   
SUBJECT: January Meeting Change

H-3  
Done

ACTION REQUIRED

*Set the date and location of the next meeting.*

BACKGROUND

(Date)

We originally scheduled January 23 and 24 for the next Council meeting. We later found that date conflicted with the annual meeting of the International Pacific Halibut Commission so the Chairman agreed to delay our meeting one week. That delay, to January 30 - February 1 conflicts with a State/Federal Management Conference that a number a Council members and the Executive Director are expected to attend. A second alternative is February 7th and 8th.

If the meeting is held either January 31 - February 1 or February 7 - 8, we should cancel the February meeting. We must meet sometime in January or February.

(Location)

When we postponed the public hearings on the Herring FMP in Bethel, Tooksook Bay, Hooper Bay, and Togiak I told the people in the Bethel area I would suggest to the Council they might consider holding their next meeting in Bethel in conjunction with the public hearings which could be re-scheduled for immediately prior to the Council meeting.
