

**C-6 St. Matthew Island blue king crab  
Council Motion  
December 7, 2019**

The Council recommends the following changes to the alternatives (in strikethrough) and a preliminary preferred alternative (in **bold**) for public review. Analysts should incorporate suggestions from the SSC as practicable.

Alternative 1: No Action: ~~State harvest strategy with no rebuilding plan~~

**Alternative 2: Set target rebuilding time frame (~~T<sub>TARGET</sub>~~) for the number of years necessary to rebuild the stock to the B<sub>MSY</sub> level at a probability  $\geq 50\%$ . The stock will be considered “rebuilt” once it reaches B<sub>MSY</sub>.**

Option 1: No directed fishing until the stock is rebuilt (~~T<sub>MIN</sub>~~)

**Option 2: Allow the directed fishery to open based on the state harvest strategy while the stock is rebuilding (~~T<sub>MAX</sub>~~)**
