

**TOTAL: 277 projects (\$52 million)**

**RECENTLY COMPLETED:**

- 1713: Genetics of mating dynamics in EBS snow crab
- 1810: Identifying ambiguous Bering Sea calls
- 1807: Ichthyophonous in Pacific Herring

**CURRENTLY ACTIVE:**

- 1901: Accounting for life-history shifts in fishery management
- 1906: Improved freshwater runoff products for Alaskan waters
- 1908: A novel approach to track mercury through marine food webs
- 1909: Phenology and geography of marine fish
- 1911: Variation in body condition of Bering Sea snow crab
- 1913: Sea otter and walrus specimen archival at the UA museum
- 1914: Monitoring export fluxes in the St Lawrence Island polynya
- 2003: Pacific cod spawning habitat in a changing Bering Sea
- 2005: Conserving fish, preserving tradition on the Yukon River
- 2007: Seabird diet changes over 4,000 years
- 2008: Long-term decline in copepod size in Alaska's large marine ecosystems
- 2011: Age estimation for Steller sea lions using DNA methylation
- 2012: Assessing long term cryopelagic change with a marine bird
- 2013: Fishery adaptive capacity
- 2014: Well-being and rural fishing livelihoods
