

Council motion

D-5 Partial Coverage Fisheries Monitoring Advisory Committee (PCFMAC)

October 10, 2022

The Council recommends the analytical staff provide further description and evaluation of the proposed deployment designs, evaluation criteria, and underlying assumptions for the partial coverage cost efficiencies analysis as outlined in the September 2022 PCFMAC report. The Council supports an abbreviated 2022 Observer Annual Report (Chapters 3 and 4) to meet these requests and complete the cost efficiencies analysis in time for incorporation in the draft 2024 observer annual deployment plan.
