SUBJECT: Permit Applications from Ships with a Violation Record Since  
March 1, 1977

Attached are the Japanese and Soviet permit applications that require action from the Permit Review Committee and a recommendation to the Council. There are eight Japanese applications and two Soviet, all of them for ships which were issued violation reports since March 1, 1977. Most of the violations appear minor but a decision should be made as to whether violations will weigh against issuance of permits in future years for these ships. I have attached the record of the violation on the bottom of the permit form to which it applies.

In addition I have inadvertently approved 4 Korean and 2 Taiwanese permits that have violated in the same period. I've contacted Washington and withdrawn that approval, so these should also be considered by your Committee in the same light.
