Research Priorities

See xls file for the following fields:

Title
Description (*hidden column C*)
Council Priority
Current CPT Priority
New CPT Priority
Current Research Status
New Research Status

At the meeting we will go through the list (43 items) as slowly or quickly as time allows.
For each project, use drop down menu to change **New CPT priority** cells from blank to CPT's preferred new priority. Can choose "no change" or just leave blank if last year's priority still stands.
Do this for **New Research Status** as well.
Add new research projects at bottom as needed.
