## On ocean and sea ice modes of variability in the Bering Sea

Seth Danielson,<sup>1</sup> Enrique Curchitser,<sup>2</sup> Kate Hedstrom,<sup>3</sup> Thomas Weingartner,<sup>1</sup> and Phyllis Stabeno<sup>4</sup>

Received 17 June 2011; revised 17 October 2011; accepted 19 October 2011; published 23 December 2011.

# Phytoplankton spatial patterns

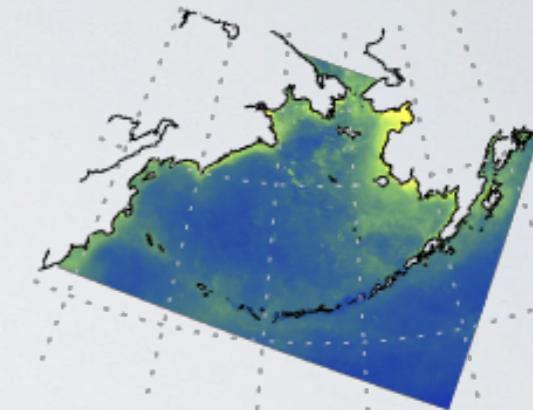

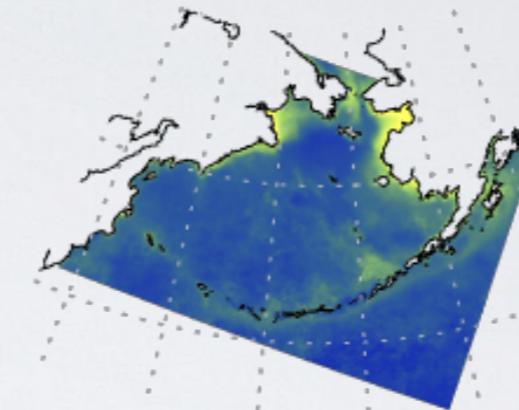

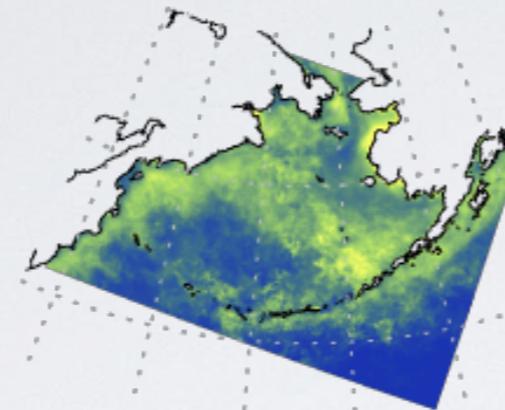

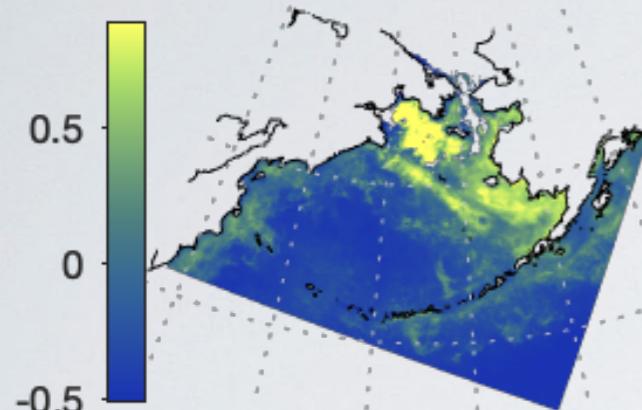

Mar-Apr

May-Jun

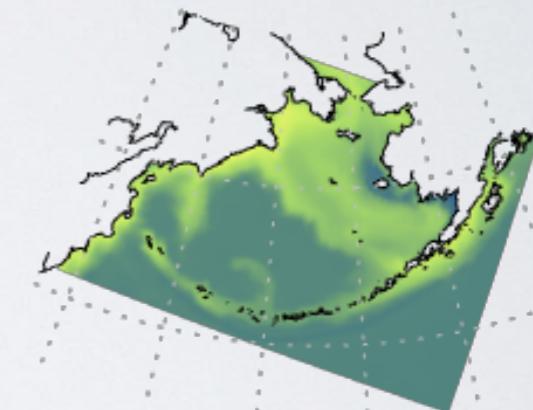

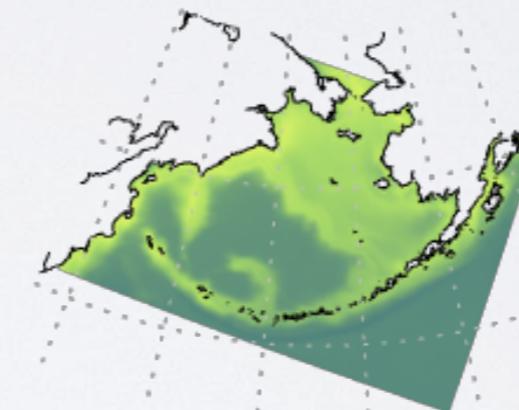

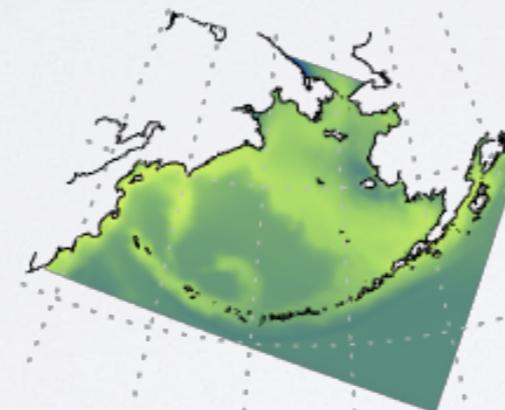

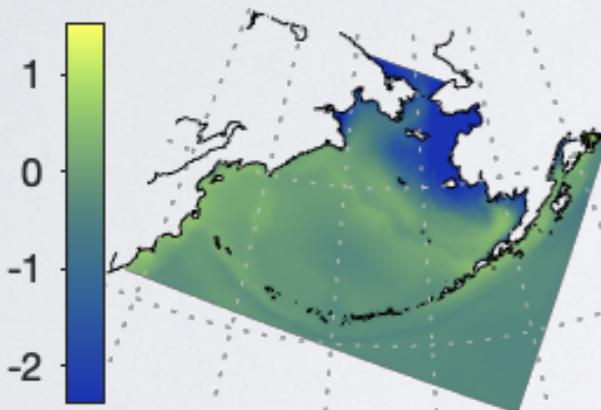

Jul-Aug

Sep-Oct

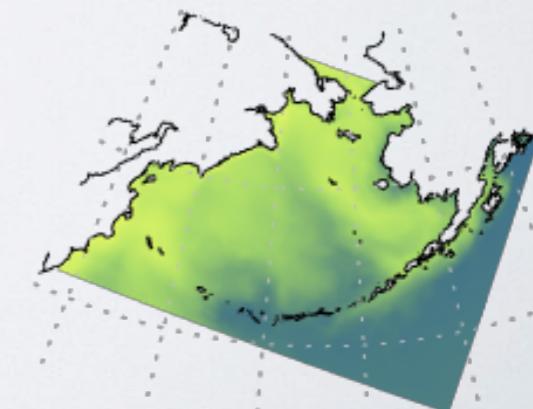

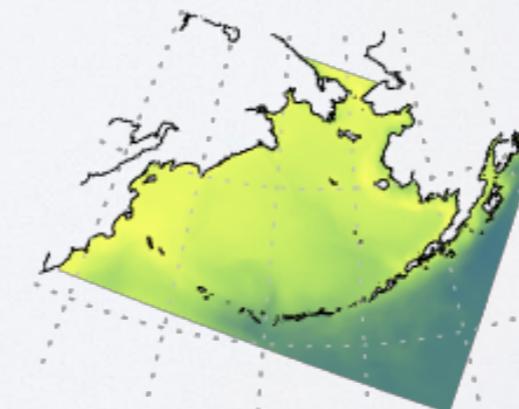

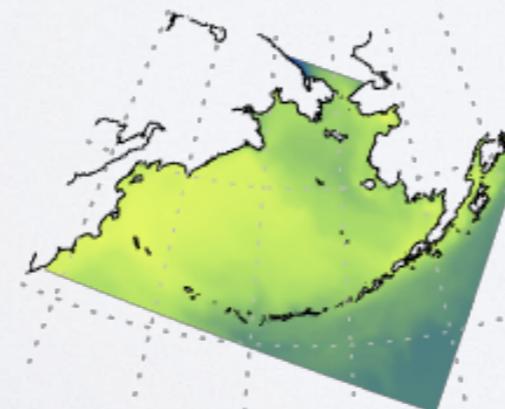

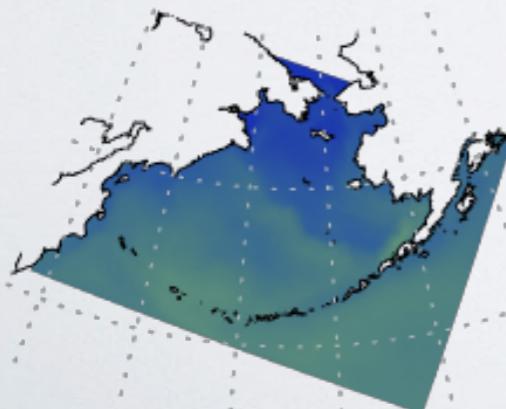

Satellite chlorophyl ( $\log_{10}$  mg chl-a  $m^{-3}$ )

Bumble phytoplankton biomass ( $\log_{10}$  g C  $m^{-2}$ )

Migo phytoplankton biomass ( $\log_{10}$  g C  $m^{-2}$ )

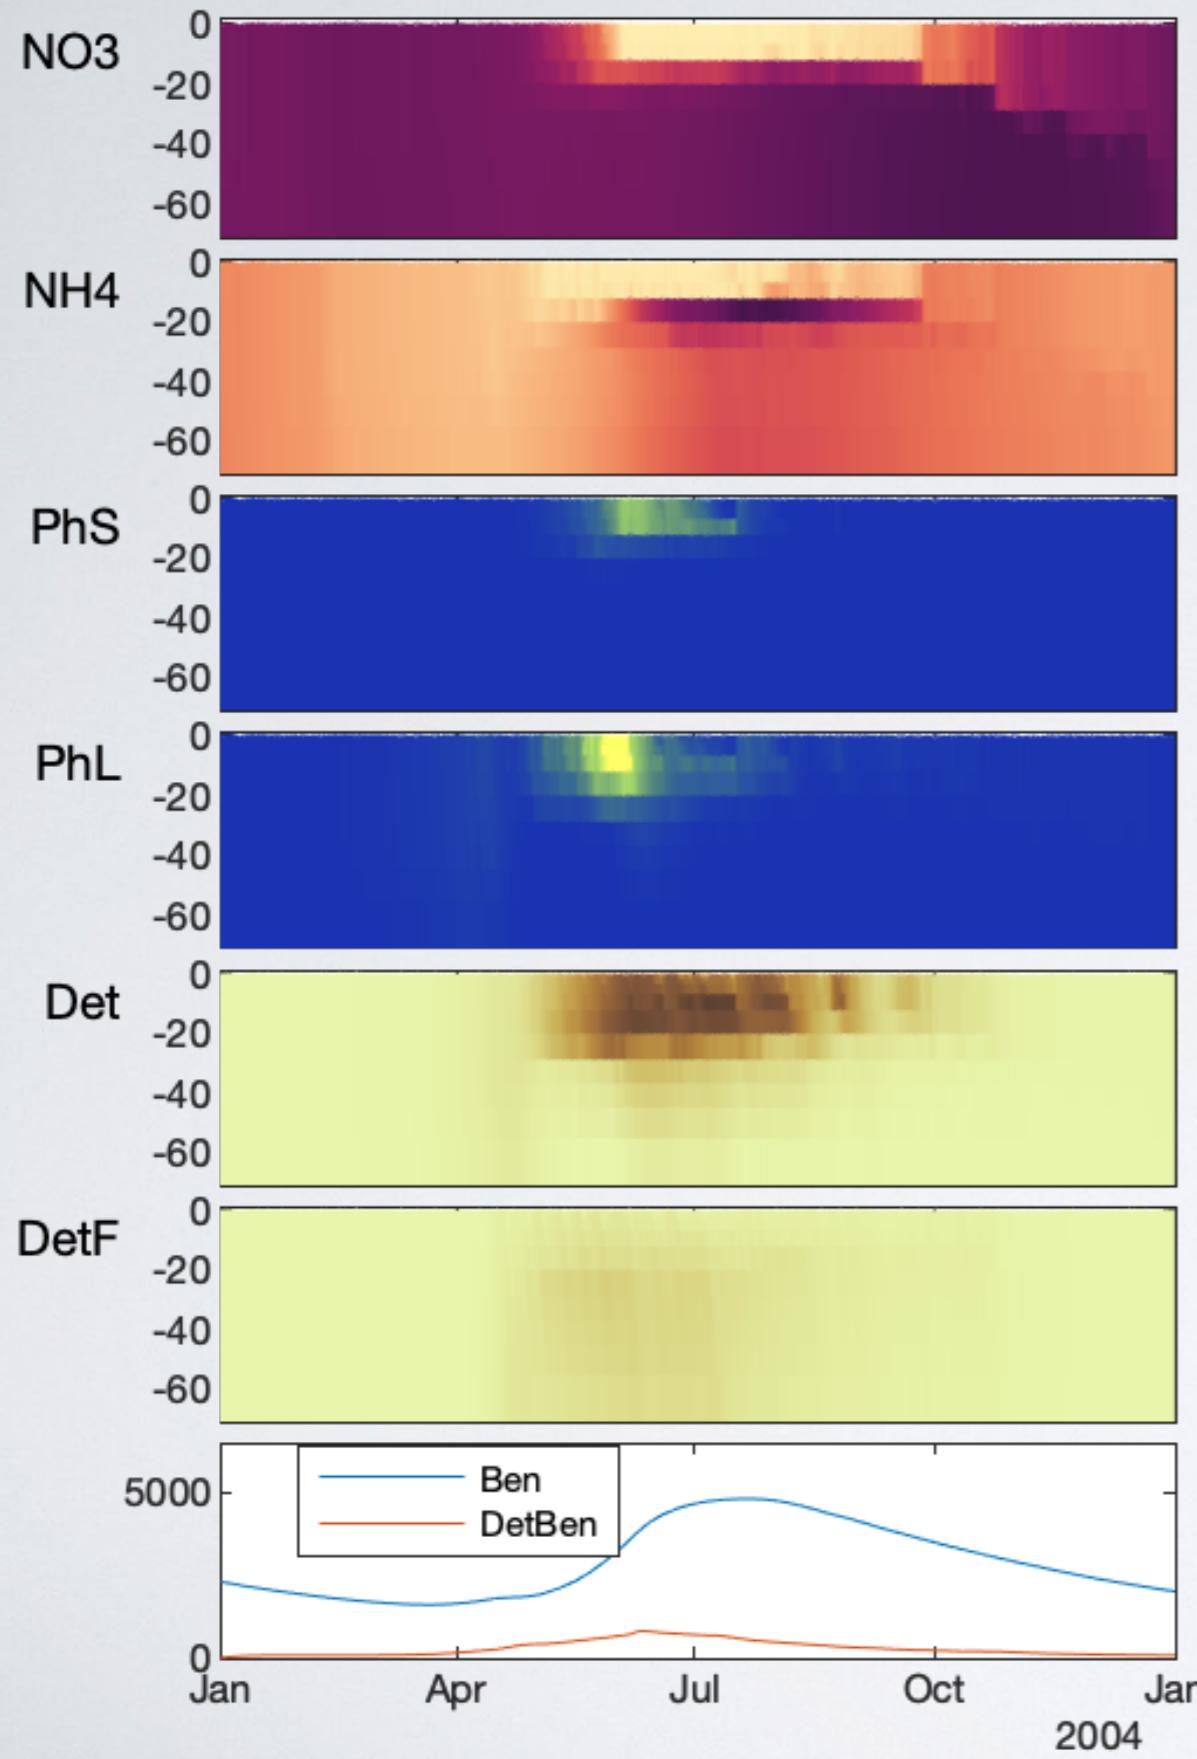

## Conclusions

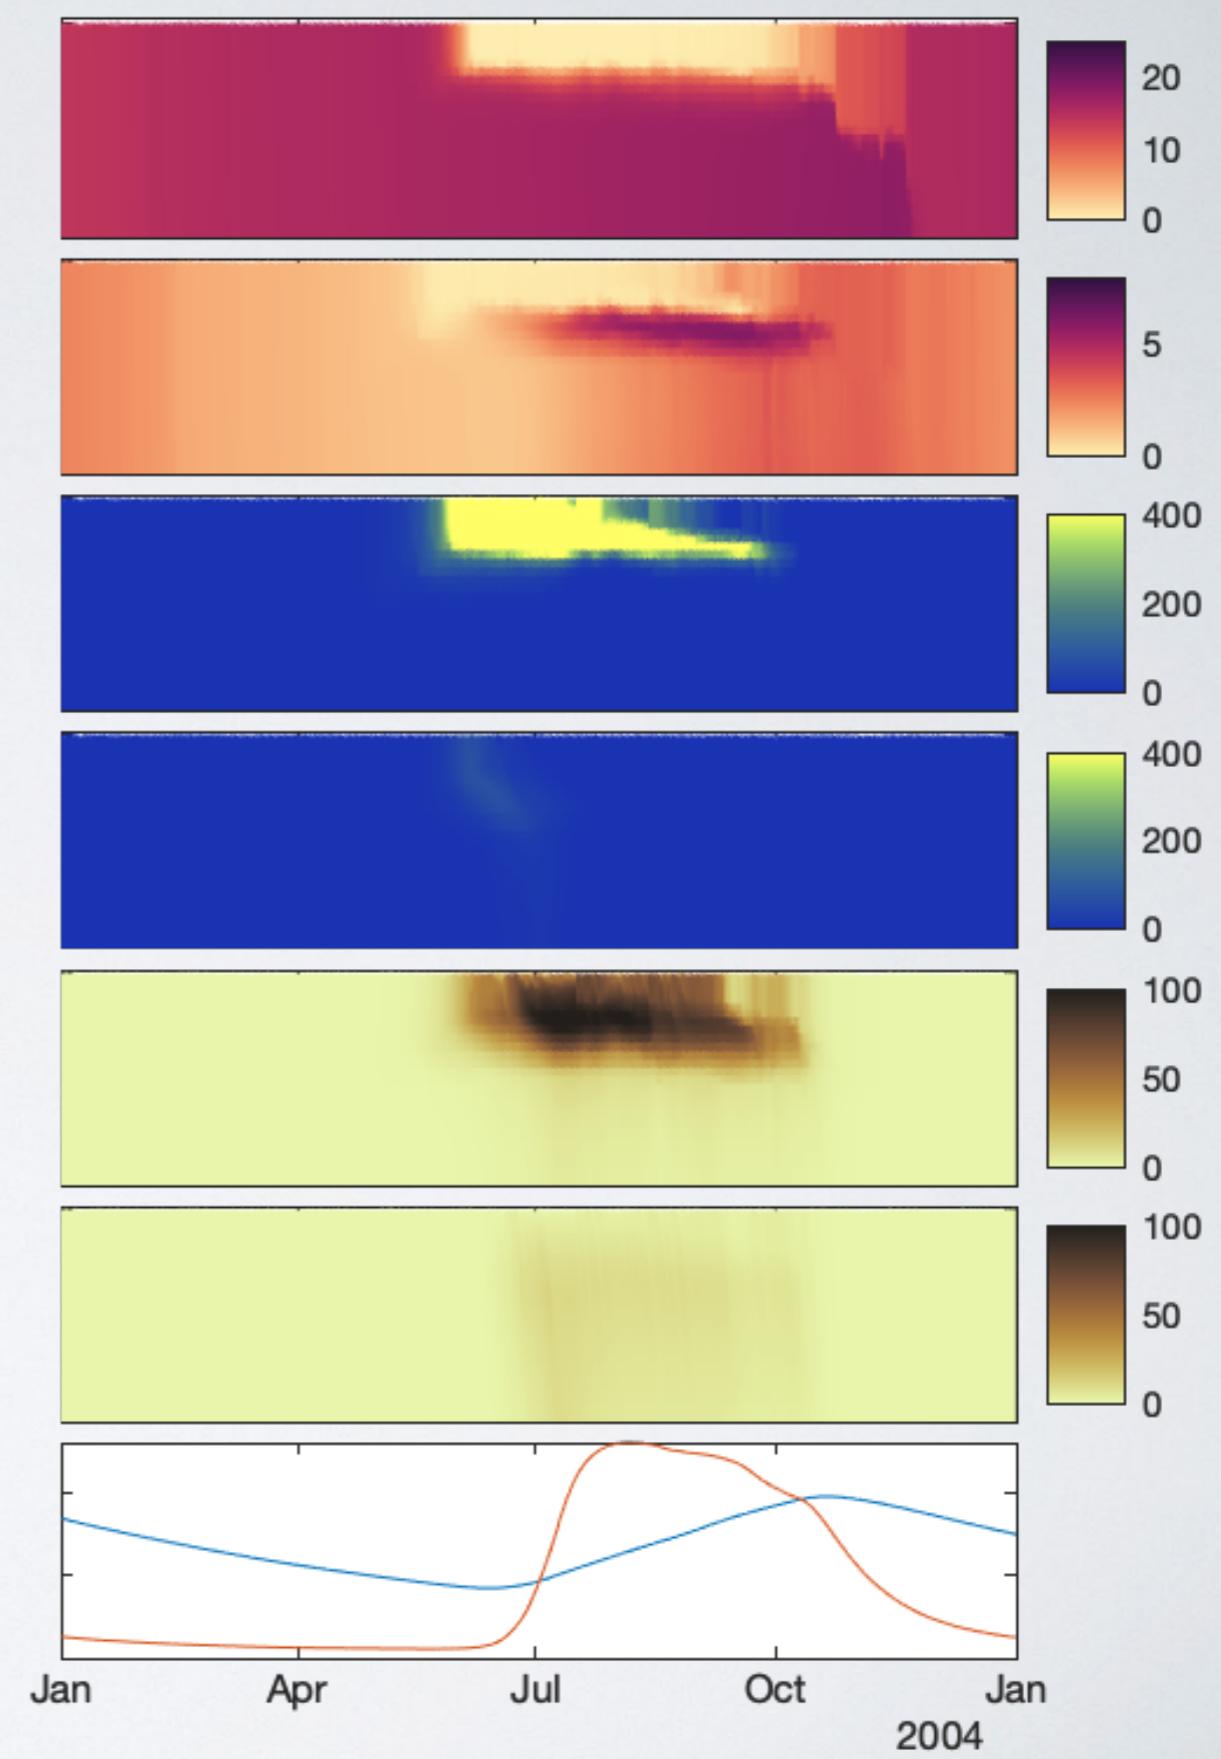

- Physical dynamics show strong skill in reproducing physical features of importance to biology
- Biogeochemical model is still an area of active research
