

## RE: C2 Chum Salmon Bycatch - Initial Review

We all see the scientific reports about climate change with warming river and ocean temperatures, and of the slowing of ocean currents that some say will completely stop in the future, that is happening now, We all read reports on contamination of the rivers and oceans affecting the fish and other foodstocks. And we read reports on the complete devastation bottom trawling is doing to the seafloor that is destroying the habitat for sea life, while stirring up some almost 22 gigatons of sediment, equal to all the sediment deposited by the worlds rivers. To continue to allow for profit, commercial fisheries to continue to fish, while cutting off Indigenous Peoples right to fish, for their healthy foods in order to survive the harsh climate is wrong. The state and federal christian politicians have taken bribe money, from the for profit, fisheries to allow this farce to continue. My Traditional Chiefs and Spiritual Leaders, worship the Christian Jesus and Creator, and his 10 Commandments, while at the same time, the state and federal christian politicians, worship the Doctrine of Discovery as crafted by greedy popes, which give them the mistaken rationale, they can take Indigenous Peoples holdings and rights away. "Christians have the right to seize all non christians holdings and do with them what they want", is the statement behind the Doctrine of Discovery. This is the imperious way the Indigenous People are treated by the European Christian immigrants, who take their spirituality from greedy popes who had the same ethics and morality, as the greedy priests Jesus kicked out of the temples. This is the only rationale the state and federal governments have to run over Alaska Natives, and it come from greedy popes with the same ethics and morals as the greedy priests Jesus kicked out of the temples. While my people are prevented or allowed, only to take a smidgeon of what they used to catch to feed their families to survive, the for-profit commercial fisheries, can take what they want, and throw the important Indigenous food fishes away. This is not right ethically or morally, to suffer people in need in order to satisfy greed. The fisheries were wiped out on the Grand Banks, on the East Coast and West Coast, now the same greedy actors have started on our waters and will wipe them out in the name of greed they live by, with our state and federal christian politicians.
