

RE: C2 Chum Salmon Bycatch - Initial Review

Hello, Kyle Kanuk, Yup'ik name, Mancuaq, from Kongiganak, Alaska. I am serving the residents of Kongiganak as a Full—Time Community Service Representative with Coastal Villages Region Fund. What CDQ means for the 20 communities and the business for CVRF. CSR, such as I, relay news about the business of CVRF. Mechanic/Welders that residents would love to work on their machines to be welded, repair for maintenance, and purchasing items for their machines. Other important that CDQ have brought to our 20 communities. For example, the village of Kongiganak residents rely on me to announce news for programs such as, People Propel to purchase machines (Snow Machine, ATV, Boat Motor), residents such as Head of Household or Elders that rely on benefits of Elders Program and Heating Oil Program that CVRF purchase heating oil for 20 communities to keep their homes warm during the harsh cold winter. Youth-to-Work/Internship Program, they are the prime for our next generation to help us with our ways of workforce development and learn the ways of the current jobs that awaits in after graduation of high school and prepare for college/vocational/training. Scholarship Program, scholarship have helped college students without any worry purchasing materials with their own pocket. On the other hand, not only programs help the residents. During tax seasons, CVRF will announce to the people in the community that the tax people will be hosting tax assistance within 20 communities. Not only that Tax assistance, CVRF attends meeting to report new on current situations. With all those that CDQ have helped CVRF, many of the communities are glad that CVRF have helped with their needs throughout the seasons. Whatever the councils that decide to choose to consider the 20 communities under the CDQ program, we hope that residents won't lose the benefit and program that resides with CVRF.
