RE: C2 Cook Inlet Salmon FMP – Final Action

Dear board members I strongly urge you not to consider alternative 4. That would only put an end to the tradition and livelihood of many families that have fished Cook's Inlet for generations. This last minute proposal put forward by state of Alaska is nothing more then another political ploy to advance the capricious agenda of a well connected individual that has made his life long ambitious to eliminate the commercial fishery in upper Cook's Inlet. Alternative 2 with a few amendments would put the State of Alaska in compliance with the mandates ordered by the 9th circuit. Please do not fall for this political nonsense. Don't destroy the livelihood of many just for the benefit of a few. Follow the science and the inlet will return to what it once was, a place that befitted all user groups. Thank you Tino Perone Permit holder Kenai, Ak
