

Hello good morning/good afternoon, my name is Carlie Beebe, and I am from the village of Eek, which is located in southwestern part of Alaska.

Currently there is no job availability in my village. Those that are working, most of them have part-time jobs and many families have no jobs at all. These residents rely on the People Propel that CVRF provides through CDQ programs.

These families also rely on heating oil programs to heat their homes. I can say I am still blessed that I have a mother, she turned 90 as February 11, and she too is always grateful for Elders program received from CVRF.

These are very important programs that we 20 community residents of Coastal Villages Region Fund rely on and severely low chum bycatch, especially pollock fisheries will greatly affect the CDQ's ability to provide these programs to people of our region, and there is no Plan B to replace the programs that CVRF provides to our region residents.

Thank you.

Carlie Beebe

Eek
