

Figure 3: Summary counts of risk tables for the Gulf of Alaska (GOA) groundfish over the years 2018 to present based on Table 1. Blue line is the total number of risk tables completed for all stocks. Red line is the count of stocks with risk tables that had at least one elevated score ( $\geq 2$ ). Yellow line is the count of stocks without any elevated scores. Green line is the count of stocks with an author recommended reduction from maximum ABC. Purple line is the final count of risk tables with a reduction following review from Plan Team and SSC.
