

rates below the fleet's historical average fourth quarter rates. In the first year, this goal was achieved by all vessels in the fisheries.

The halibut avoidance plan and its associated standards and penalties have become an integral part the inseason management of halibut in the Amendment 80 sector. Each company receives a weekly report showing the performance of each of its vessels relative to the applicable standards. These reports further monitoring of halibut avoidance efforts and have contributed to the success of the sector in maintaining operations despite the recent reduction in halibut limits.
