

C4 Addendum-Run Size reconstructions by river system
October 2023

ADDENDUM-Run Size reconstructions by river system sorted by run size

Tables 3-8x through 3-11x are reproduced here sorted by run size (rather than by year as included in the preliminary review draft Tables 3-8 through 3-11) with the associated information as to whether ANS and escapement goals were met in that year. The average run size over all years represented in the table is included in the caption for each table.
