Report to the North Pacific Fishery Management Council on the 2020 Bering Sea Pollock Mothership Salmon Savings Incentive Plan

James Mize, IPA Representative

This report is to the North Pacific Fishery Management Council and covers the Bering Sea Pollock Mothership Salmon Savings Incentive Plan Agreement (“MSSIP” or “Agreement”). The MSSIP is an incentive plan agreement (“IPA”) entered into by the Members of the Mothership Fleet Cooperative (“MFC”) entity to receive transferable allocations of Chinook salmon PSC.

Reporting Requirements

Amendment 91 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Fishery combines a hard cap on the amount of Chinook salmon that may be caught incidentally with an IPA and a Performance Standard designed to minimize bycatch to the extent practicable in all years and prevent bycatch from reaching the limit in most years. Amendment 110 established further requirements for an IPA, to include measures addressing chum salmon bycatch, rolling hotspot closure programs and salmon excluder use, and further incentive mechanisms. Regulations implementing Amendments 91 and 110 require participants engaged in an IPA to submit to the Council an annual report including:

- (1) A comprehensive description of the incentive measures, including rolling hotspot closure program and salmon excluder use, in effect in the previous year;
- (2) A description of how these incentive measures affected individual vessels;
- (3) An evaluation of whether incentive measures were effective in achieving salmon savings beyond levels that would have been achieved in absence of the measures, including the effectiveness of:
