Re: Agenda item C-7, Gulf of Alaska Trawl Bycatch Management

Dear Chairman and Members of the Council,

We, the undersigned residents of Gulf of Alaska coastal communities, support development of and allocation of quota to a Community Fishing Association in the Gulf of Alaska Trawl Bycatch Management Program.

Fisheries resources represent the backbone of our coastal economy and the lifeblood of our community and culture. It is critical that we maintain access for community residents, and retain community benefits, from these resources for many generations to come.

As the North Pacific Fishery Management Council (the Council) designs a catch share program to reduce bycatch in the trawl fleet, it is critical that the benefits of a catch share program to the trawl industry do not come at a cost to the viability and stability of our fishing communities in the future.

Allocating quota directly to the community via a Community Fishing Association will provide a mechanism to anchor quota in the community, support new generations of fishermen and crew and amplify community benefits. **We support allocation to a Community Fishing Association as a critical component of the Gulf of Alaska Trawl Bycatch Management Program to protect our coastal communities.**

Sincerely,
