1. U. S. COAST GUARD ENFORCEMENT EFFORT FOR 1986.

a. MFCMA ACTIONS. U. S. Coast Guard enforcement efforts for calendar year 1986, through 17 June, have totalled 183 cutter days and 688 aircraft patrol hours. These patrol efforts have covered more than 7.4 million square miles of ocean and resulted in the issuance of 54 reports of violation and 26 written warnings to foreign fishing vessels and 10 reports of violation and 2 written warnings to U.S. fishing vessels. Additional patrol information is provided in the enclosures.

b. JAPANESE HIGH SEAS SALMON OPERATIONS.

1) The Japanese land based high seas salmon fleet commenced its operations in the North Pacific Ocean, south of the Aleutian Islands, approximately 1 June 1986.

2) The first Coast Guard C-130 surveillance flight was flown on 30 May with no sightings of fishing vessels made near the eastern abstention line. Routine Coast Guard surveillance flights started 5 June. The Coast Guard Cutter MORGENTHAU commenced its surface patrol on 4 June. A meeting was conducted with Japanese enforcement officials aboard the patrol vessel TOKO MARU to discuss enforcement matters.

3) To date a total of seven C-130 flights have been flown and 14 cutter days steamed in support of this fishery.

4) While patrol units have made numerous sightings of Japanese land based gillnet vessels west of the 174E boundary, thus far only one has been sighted east of that line. That vessel was sighted underway in position 40-17N, 175-34E.
