HERRING SAVINGS AREAS AND LOCATIONS OF HERRING FISHERIES

EBS HERRING MIGRATION PATTERNS (FROM TOJO ET AL. 2007)

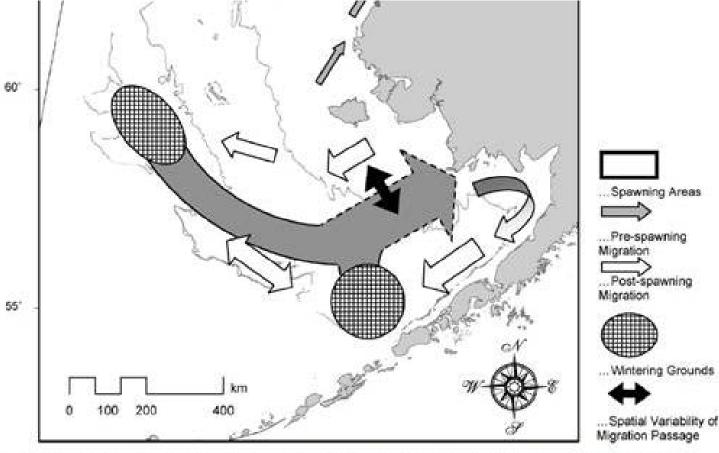

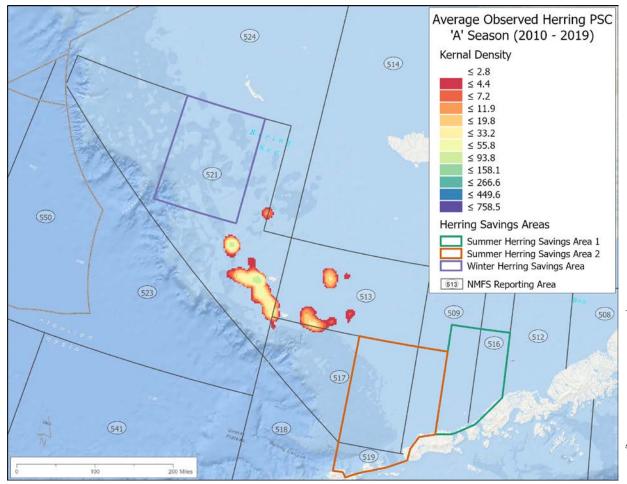

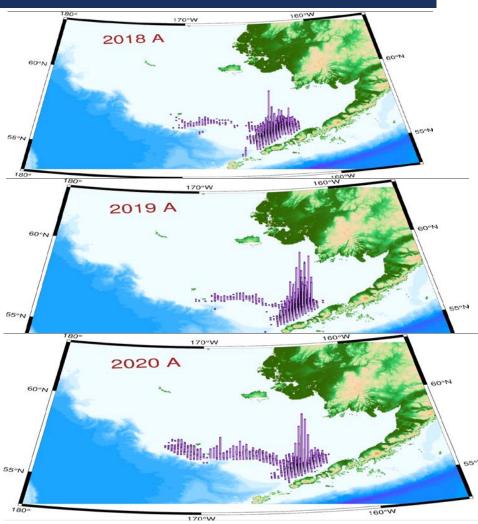

Fig. 6. Revised eastern Bering Sea (EBS) herring migration pattern and spatial variability in pre-spawning migration. The gray lines are the 50-, 100-, and 200-m isobaths. Thick rectangles show historical spawning locations. The two gridded circles represent the major wintering grounds. The gray boxed arrows show pre-spawning movements, and the open boxed arrows show post-spawning movements.
