

ALASKA DEPARTMENT OF FISH AND GAME

DOMESTIC FISHERIES REPORT

Sablefish

The FCZ was closed to domestic sablefish fishing on August 2, 1982 approximately 1250 mt of sablefish were harvested in the FCZ. This was the first closure of a FCZ domestic groundfish fishery on the Pacific coast. Following the closure, substantial effort shifted to the Yakutat area. Several vessels from Southeastern and Prince William Sound continue to fish areas north of Southeast Alaska.

Inside the Southeastern archipelago, the sablefish fishery in Chatham Strait closed midnight September 15 and the fishery in Clarence Strait will close September 30. As of September 17, preliminary catch figures are as follows:

<u>Area</u>	<u>Catch (metric tons)</u>
Clarence Strait	150
Chatham Strait	400
Southeastern outside	1250
Yakutat east of 140°	370
Yakutat west of 140°	200

Aleutian Island Herring

The Eastern Aleutian Island herring fishery began in 1981 when 704 metric tons (mt) were landed. The fishery experienced more than a four fold expansion in 1982. To date, approximately 3240 mt have been landed from the fishery which began August 5. Roughly 60 percent of the catch was processed for human consumption; the remainder was utilized as bait for the local crab fisheries.

The harvest was taken by seven purse seine vessel fishing within State waters. Average price paid to the fishermen was reported to be \$300 per ton.

King Crab

King crab harvest statewide will decline substantially from 1981 levels. All surveyed area fisheries report poor abundance levels.

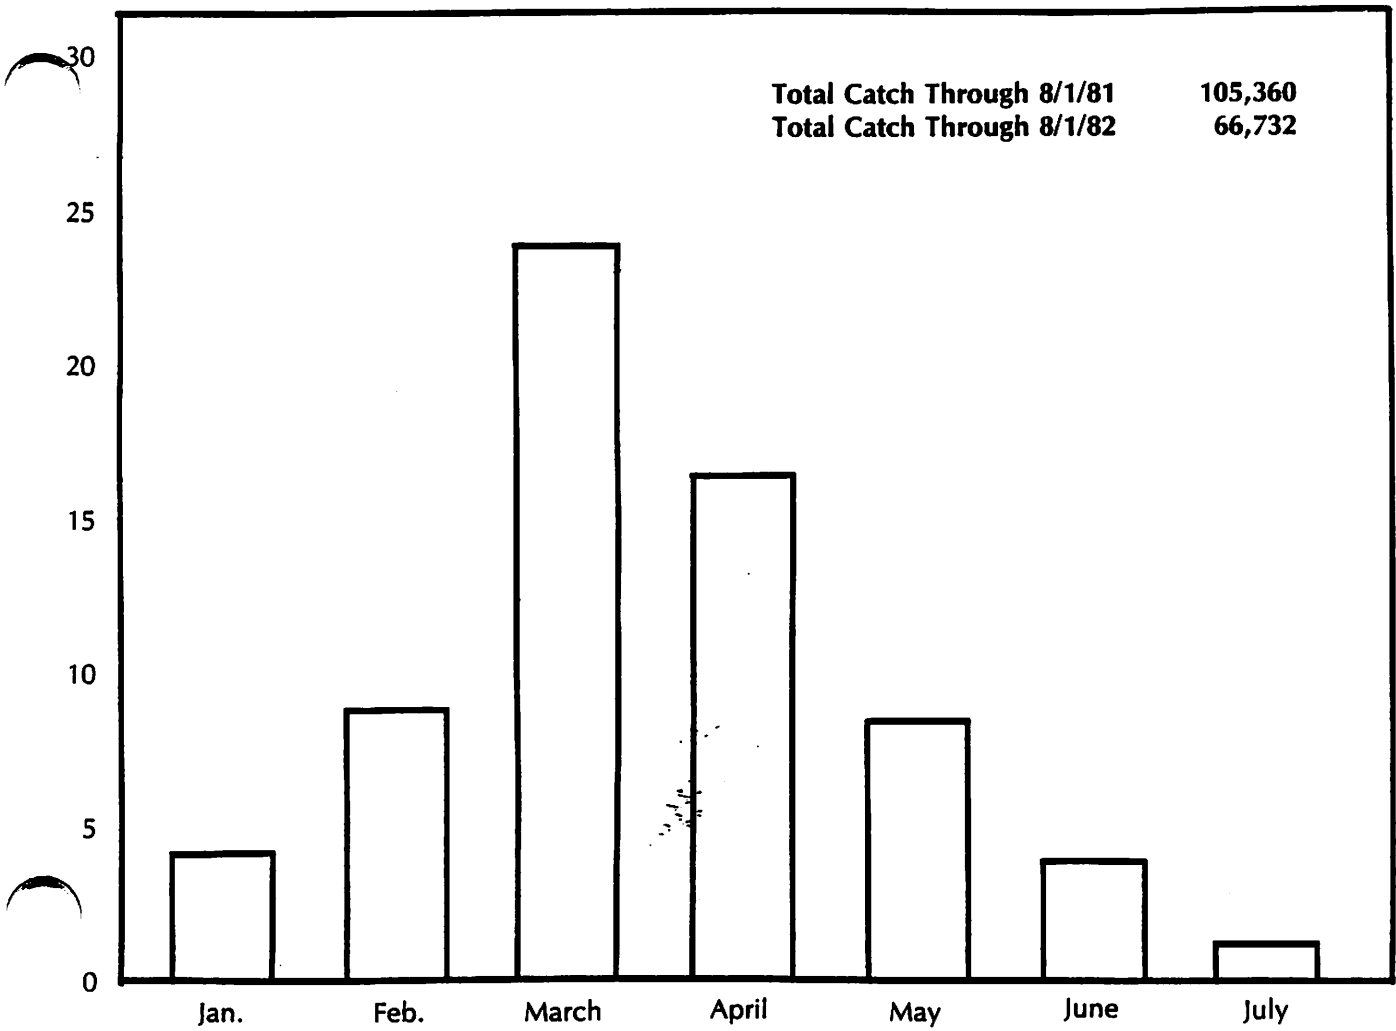

<u>Area</u>	<u>1981 Harvest</u> *	<u>Projected 1982 Harvest</u> *
Southeastern (A)	1.2	.7
Prince William Sound (E)	.03	.03
