

North Pacific Fishery Management Council
Motion to initiate a discussion paper
6/10/2016

Agenda Item C-4: Tanner Crab Custom Processing Exemption

The Council initiates a discussion paper to look at additional solutions to the Tanner crab custom processing use cap issue, including 1) raise the Tanner crab IPQ use cap to 40%, 2) A share to B share conversion, and 3) apply exemption only in years when capacity to process is not sufficient (i.e., when there are less than 4 processors).
