# Other Rockfish Summary

- Combining WGOA and CGOA ABC prevented overage in WGOA
- Catch in WGOA is down in 2014

- Catch of harlequin rockfish in WGOA is down in 2014, however, up in CGOA

# SSC Homework Oct 2014

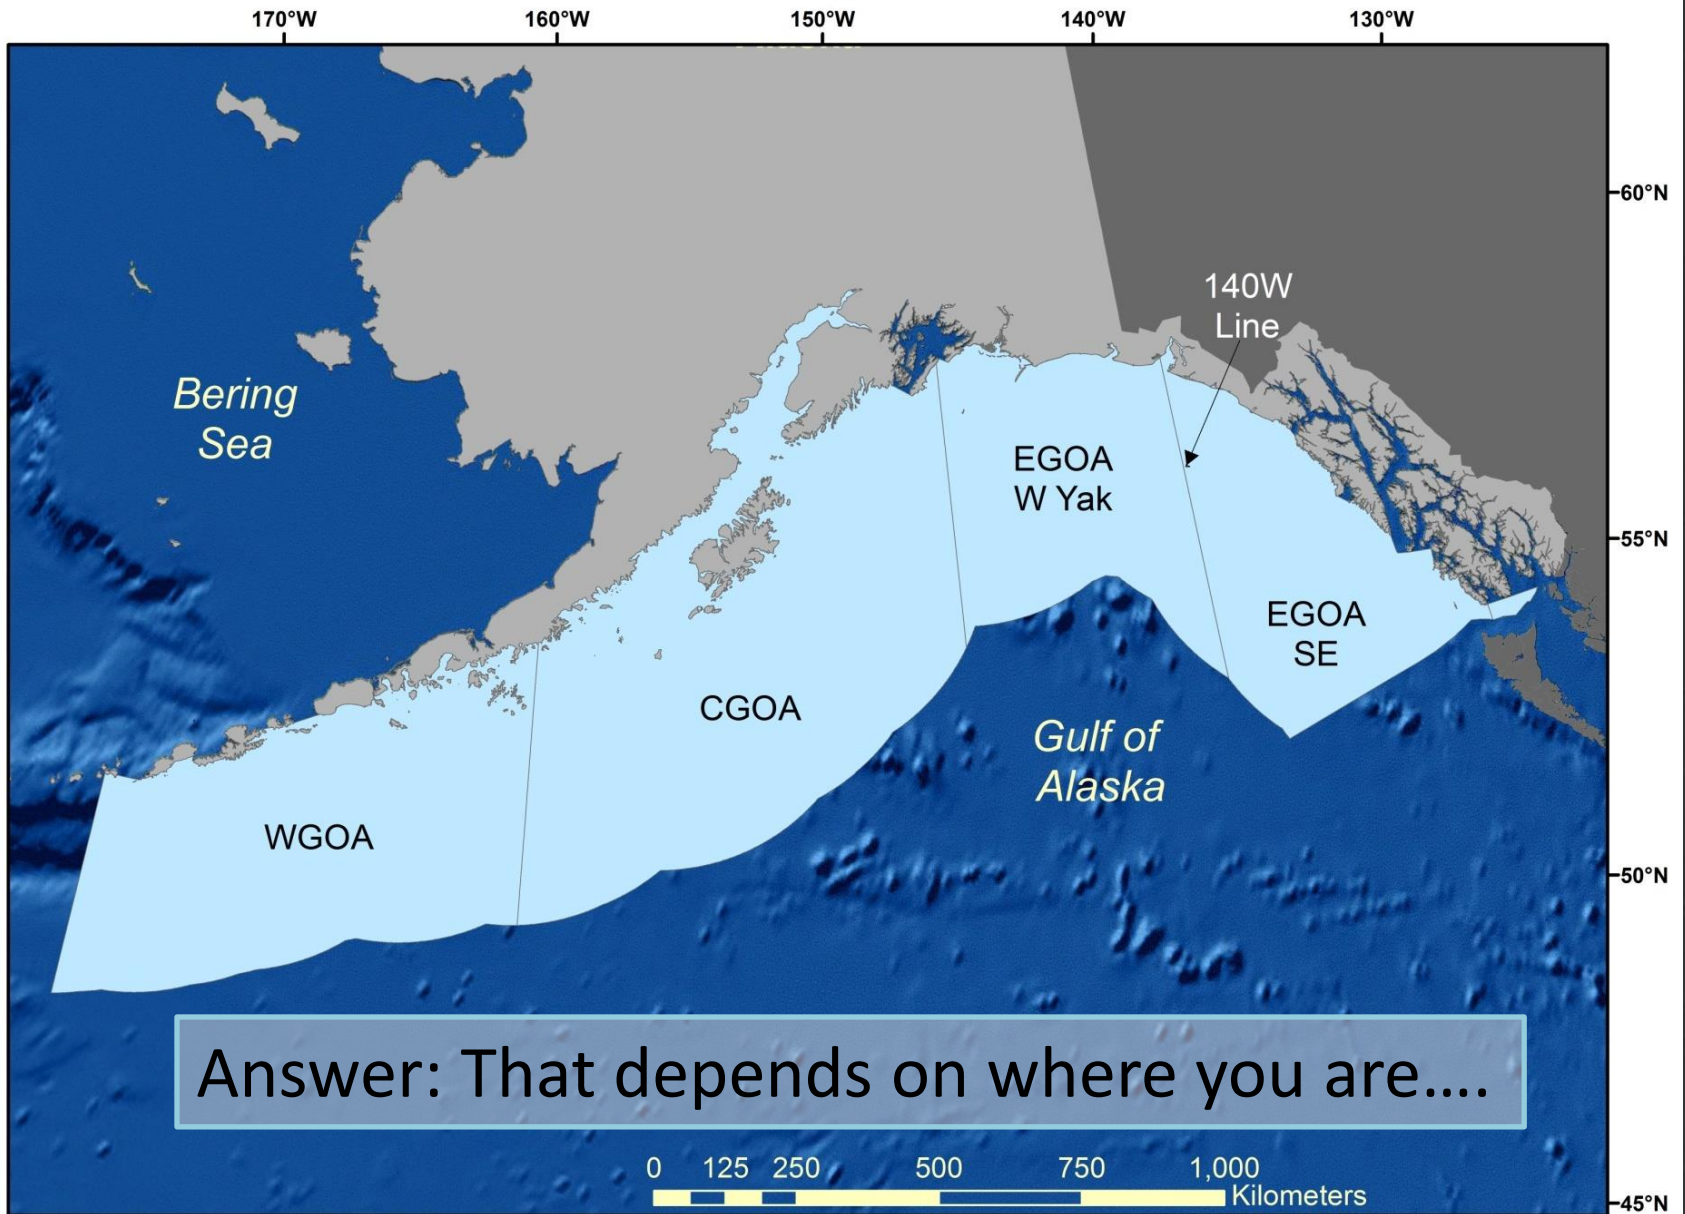

- Stock structure for yelloweye/DSR species coastwide
- Two yelloweye/DSR models be developed: (1) southeast Alaska yelloweye/DSR age structured model and (2) GOA wide yelloweye/DSR age structured model
- Detailed examination of fishery catch and survey data by subarea and season for DSR and “Other” rockfish species.
- The SSC recommends that a model development team be formed, following the November Plan Team review, with the goal to have the assessment complete enough for consideration for setting OFL and ABC at the September 2015 PT meeting.
