## ADVISORY PANEL MINUTES

## C1 CHARTER HALIBUT - 3A (1 OF 2)

The AP recommends that the Council approve and send on to the International Pacific Halibut Commission (IPHC) the following management measures for IPHC regulatory Area 3A:

All management measures shown below include (unless otherwise specified): a daily bag limit of 2 halibut with one fish of any size and one with a maximum size limit; no annual limit per charter angler; Wednesdays closed to halibut retention all year; 1 trip per halibut charter vessel per day; and 1 trip per charter halibut permit per day.

## C1 CHARTER HALIBUT - 3A (2 OF 2)

If the allocation is less than 1.93 Mlb (Status quo FCEY) but greater than or equal to 1.85 Mlb (according to Table 22 on page 45 in ADF\&G analysis of proposed harvest regulations for 2021):

- Close all Wednesdays to retention of halibut, with a maximum size limit on the second fish of 32 inches and apply a 25\% COVID Impacts Buffer (as described in Appendix A-2,2 on page 59 in the ADF\&G analysis) to bring the projected harvest within the Area 3A allocation. Removal projection without the COVID buffer is 2.470 million pounds; removal projection with the buffer is 1.85 million pounds.
If the allocation is less than 1.85 Mlb but greater than 1.78 Mlb (according to Table 24B of the ADF\&G Analysis):
- Adjust the size of the second fish, down to a minimum of a maximum size limit of 30 inches to keep the charter harvest within their allocation and apply a 25\% COVID Impacts Buffer (as described in Appendix A-2, 2 on page 59). Removal projections with the buffer range from 1.78 to 1.85 million poys.

## C1 CHARTER HALIBUT - 2C (1 OF 2)

The AP also recommends that the Council approve and send on to the International Pacific Halibut Commission (IPHC) the following management measures for IPHC regulatory 2C:

1. Apply a $35 \%$ reduction in projected removals for 2021 under a reverse slot limit in Table 6, page 26, of the analysis and use this adjusted table for determining reverse slot limit harvest measures.

| $35 \%$ Buffer |  |  |
| :--- | :---: | :---: |

## C1 CHARTER HALIBUT - 2C (2 OF 2)

2. One Fish Daily Bag Limit.
3. If the Area 2C catch limit is at . 65 million pounds (Reference SPR 43), reverse slot limit must be $\leq 44$ " or $\geq 80$ ".
4. If Area 2C catch limit is from . 651 million pounds to .751 million pounds, maintain the upper reverse slot limit at $\geq 80$ " and adjust the lower reverse slot limit upward to keep the projected harvest within the allocation.
5. If Area 2C catch limit is higher than .751 million pounds, maintain the lower reverse slot limit of $\leq 50$ " and adjust the upper reverse slot limit downward to keep the projected harvest within the allocation.

## C2 COOK INLET SALMON

- The AP recommends the Council select Alternative 2, federal management with delegation to the State, for final action on C2 Cook Inlet Salmon. The AP also recommends no retention of groundfish species.
- Amendment passed 22-0
- Motion as amended passed 22-0

## C3 BSAI SPECS

- The AP recommends that the Council approve the final 2021 and 2022 Bering Sea-Aleutian Islands groundfish specifications for OFLs and ABCs as recommended by the SSC, and the TACs as shown in the attached table 1.
- Note: the sablefish OFL is statewide
- Amendment: Adjust the sablefish TAC amounts downward to: 2,140 mt in the BS and $2,345 \mathrm{mt}$ in the AI.
- Amendment passed 12-10.
- Motion as amended passed 21-0

${ }^{1}$ Refer to § 679.2 for definitions of zones.
${ }^{2}$ The PSQ reserve for crab species is 10.7 percent of each crab PSC limit.
${ }^{3}$ The Amendment 80 program reduced apportionment of the trawl PSC limits for crab below the total PSC limit. These reductions are not apportioned to other gear types or sectors.

## C3 MOTIONS CONTINUED

- Motion 3
- The AP recommends, given concerns with sablefish spatial management, that the Council initiate Step 2 of its Spatial Management Policy.
- Motion passed 16-6
- Motion 4
- The AP recommends that the Council approve the 2020 BSAI SAFE report
- Motion passed 22-0

## C4 GOA SPECS

- The AP recommends that the Council approve the 2020 Gulf of Alaska SAFE report.
- The AP recommends that the Council approve the final 2021 and 2022 Gulf of Alaska groundfish specifications for OFLs and ABCs as recommended by the SSC, and the TACs as shown in the attached Table 1.
- Amendment: The AP recommends the Council hold GOA TAC specifications for sablefish to the 2020 TAC levels: 1,942mt for WG; CG: 6,445mt for CG; 2,343 for WY; and: 3,663mt for EYISEO. Amendment passed 13-9.
- The TACs for both GOA Pacific cod and pollock have been adjusted to account for the State water Guideline Harvest Level fisheries. The GOA Pacific cod adjustments are shown in Table 2.
- The AP recommends that the Council set the final 2021 and 2022 Pacific halibut PSC limits, allowances and apportionments in the GOA as shown in Tables $14-16$ below.
- The AP recommends the Council approve the updated halibut discard mortality rates for 2021 and 2022 as shown in Table 17.
- Motion as amended passed 18-4.

## C6 BSAI POT COD CP

The AP recommends the Council release the RIR ${ }^{1}$ with a new threshold of 100 mt for final review-
${ }^{2}$, and requests further analysis of the following:

- Evaluate options available for LLP permits that may lose C/P endorsements
- Analyze mechanisms to compensate LLP holders that may lose C/P endorsements.
- Further analyze potential impacts to fishery dependent communities
${ }^{3}$ Add qualifying year options to alternative 2 (in addition to previous dates)
- 2005-2020
- 2012-2020

Amendment ${ }^{1}$ : failed 8-13.
Amendment²: passed 13-8.
Amendment3: failed 9-12.
Substitute motion: The AP recommends that the council takes no further action. Failed 4-17.
Main motion as amended passed 16-5.

## E STAFF TASKING

## Motion 1

The AP recommends that the Council initiate a discussion paper to examine options for minimizing ${ }^{1}$ prohibited status harvests that go beyond $100 \%$ of a sector's ${ }^{1}$ allowable-allocated catch for fisheries that aren't already subject to a hard cap. This discussion paper should include time and area closures, debited overages from subsequent years, ${ }^{2}$ establishing ICAs for each managed species, and triggers or graduated responses to increasing prohibited status harvest that reflects the lawful intent of the Council to minimize allocation overages and maximize optimum yield in directed fisheries.
Amendment ${ }^{1}$ : passed 15-7.
Amendment²: failed 11-11.
Motion as amended passed 14-8.

## Motion 2

The AP recommends the Council initiate a discussion paper to consider identifying jig gear as legal gear for IFQ sablefish.

Motion passed 17-5.

## E STAFF TASKING

## Motion 3

The AP recommends the Council initiate a discussion paper to explore and assess changes in Pacific cod fishing effort in the BS and AI. The paper should include:

- how cod apportionments between the BS and AI have led to potential barriers to full harvest;
- impacts of incidental BS cod harvest to directed cod fisheries; and
- how reductions of AI harvest could lead to a race for cod in the BS.

Motion passed 12-10.

## Motion 4

The AP recommends the Council initiate a discussion paper to consider identifying longline pots as legal gear for Greenland turbot.

Motion passed 22-0.

## Motion 5

The AP recommends that the Council direct the Community Engagement Committee to discuss and provide recommendations on a staff position to act as a tribal liaison and a cultural education and outreach coordinator for the Council, AP, SSC, and associated committees.

Motion passed 21-1.

## Motion 6

Move to approve the October 2020 AP Meeting minutes.
Motion passed 22-0.

[^0]:    ${ }^{1}$ The Pacific halibut prohibited species catch (PSC) limit for hook-and-line gear is allocated to the demersal shelf rockfish (DSR) fishery and fisheries other than DSR. The Council recommended and NMFS proposes that the hook-and-line sablefish fishery, and the pot and jig gear groundfish fisheries, be exempt from halibut PSC limits.
